RE: Budget Request-Rath (BRRTS: 03-22-563937, PECFA #53807-9551-04)  
1304 Saint Rose Road  
Cuba City, Wisconsin 53807

Dear Ms. DiMaggio:

Seymour Environmental Services, Inc. (Seymour) is submitting this budget request for excavation and off-site disposal of accessible contaminated soil at the site. We estimate that up to 450 tons of contaminated soil will require removal. The total budget request is for \$32,362.86. This includes items on the U&C Schedule as well as a variance for the remedial excavation costs.

In June 2019 a Geoprobe™ investigation was initiated at the site. Soil samples were collected from seven direct push borings. Soil samples were collected to a maximum depth of 15 feet where refusal was encountered. No groundwater sampling was performed but we did collect a sample from the private water supply well. Sample analysis shows that soil contamination exceeding the groundwater pathway RCLs is located near the former tanks. In the area of the former tank bed soil contamination extends from 7 feet to 15 feet. The top of the soil contamination becomes deeper away from the tank bed. It appears that ~450 tons of soil containing PVOCs above the groundwater pathway RCL are present at the site. Excavation of the contaminated soil would require moving about 200 tons of overburden.

We recommend conducting remedial excavation to remove the contaminated soils. The results of the Geoprobe™ investigation indicate that the contamination does not extend under the neighboring roads. Based on the distribution of the soil contamination and the presence of a building at the property it may not be possible to excavate all the impacted soil. During the remediation the accessible soil contamination on the source property will be removed. Soil samples will be collected from the sidewalls and the base of the excavation to characterize the presence of any residual contaminant levels and bedrock that is encountered will be described for the presence of fractures, and evidence of contamination in contact with the bedrock. This information will be used to determine whether additional investigation including groundwater sampling is necessary.

We understand that we are required to request a variance to the U&C schedule since the excavation costs exceed \$10,000. A bid for the anticipated soil remediation subcontractor activities was obtained from Wiederholt Enterprises. This bid was used to develop the cost for the proposed soil remediation. Details of the remediation costs for the variance items are summarized in the following table.

Soil Remediation Costs			
ITEM	Amount	Unit Cost	Total
Contractor Mobilization/Signage/Fencing	1	\$1,500	\$1,500.00
Excavate/Load/Haul Contaminated Soil	450 ton	\$25.50	\$11,475.00
Excavation and Stockpile Clean Overburden	200 ton	\$5.75	\$1,150.00
Provide/Compact Backfill	450	10.50	\$4,725.00
Backfill and Compact Stockpiled Soil	200	7.50	\$1,500.00
Gravel Surface and Placement	0 ton	\$14.00	\$0.00
Tipping Fees-Orchard Hills landfill	450 ton	\$14.00	\$6,300.00
Profile Fee			\$100.00
Total Commodity Costs			\$26,750.00
Consultant Oversight (contaminated)	18	94.13	\$1,694.34
Consultant Oversight (overburden)	4	94.13	\$376.52
Total Consultant Cost			\$2,070.86
<b>Total Variance Excavation Cost</b>			<b>\$28,820.86</b>

All other activities needed at the site can be completed for the U&C rates. These include consultant mobilization, confirmation soil sampling, a letter report, cost request and per diem. I also included the cost to conduct a well reconnaissance and to collect another sample from the private well. We will submit the remediation report and include the information about the well reconnaissance once we have the results of the confirmation sampling. Please call me if you have any questions at 608-838-9120 or 608-225-9407 (cell).

Sincerely,  
**Seymour Environmental Services, Inc.**

Robyn Seymour  
 Hydrogeologist
