Subject: Ashview Terrace Work Plan

Joe,

I have reviewed the work plan for the Ashview Terrace Apartments case and have the following comments:

- The soil sample at SB16-06 from 16-19 feet bgs needs to also be analyzed for PCBs; since you are sampling for PAHs you do not need to sample for SVOCs.
- The soil samples from the 3 probes on the north side of the site need to be analyzed even if no sludge is noted. You do not need to analyze the samples for SVOCs, GRO and DRO.
- The temporary groundwater sample needs to be sampled for VOCs, PAHs, PCBs and RCRA Metals.

Contact me if you have any questions.

Bob
