Hi BJ – Thank you. Relative to the sampling, we decided that the timing is too tight and I think we will wait to conduct any further sampling until after we have approval of the work plans.

Accordingly, we'll plan on a PFAS scoping document and an updated Site Investigation Work Plan by November 17.

Please let me know if that is acceptable.

Thanks,
Mike

Hi Mike,

Yes, received. Also, you may extend the deadline of the PFAS work plan another 30 days, to the same time the full work plan was required.

I am speaking with my closure committee today to assess the pitfalls you may encounter if you choose to sample prior to providing a work plan. I'll let you know what we discuss.

BJ

Hi BJ – I just wanted to follow-up briefly to verify you received the attached letter and to check in to see if you think the extension of the PFAS scoping document can be extended past October 17.

Thank you,
Mike

Hi BJ,

In follow-up to our conversation last week and my voice message from this afternoon, please see the attached letter for your review. Please feel free to let me know of any questions or concerns.

Best Regards,
Mike

Mike,

Please find attached the work plan comments from the DNR Northeast Region peer review committee. As discussed, there is some additional work to do at the property, as outlined in the letter. The committee (with the approval of our central office) also requests a PFAS scope for the next round of sampling. We'd like to review that before the final WP is submitted, mostly as a way to help you consolidate your field effort. Wood can send that to me in draft format if they like. Or submit a fee and we'll review in detail.

If you have any questions, please let me know.

BJ
