**Cc:** 'John Emery'  
**Subject:** Notice to Proceed with Site Work Plan at Allyn Property, BRRTS # 02-31-564071

Good morning Don,

This email acts as my acknowledgement of receipt/notice to proceed with the October 2, 2015 Site Work Plan for the Allyn Property received by the DNR on October 7, 2015. All actions must comply with the ch. NR 700 rule series, Wis. Adm. Code, and all other applicable state statutes and administrative rules. This email does not represent a DNR approval.

To note:

- The vapor intrusion pathway and potential receptors will need to be assessed and if initial investigative results indicate a risk of vapor intrusion, then additional investigation and delineation will be necessary to assess the risk from the vapor intrusion pathway.
- In the former drum storage area, if the drums historically leaked, there could have been contaminants that infiltrated from the surface, so I recommend collecting a soil sample within the upper four feet in that location.
- The ch. NR 140 standards for cis-1,2-dichloroethene (Preventive Action Limit (PAL): 7µg/L and Enforcement Standard (ES): 70µg/L) are not included in the groundwater data table. Please include these standards in future submittals.

If you have any questions, please feel free to contact me.

Thanks,

**We are committed to service excellence.**

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
