Karen,

As you know, Mr. Emery recently changed from his previous consultant to EnviroForensics. We are excited to move this site along. Brian Kappen will be the primary contact for the Site. He is currently on PTO and is copied here. His phone number is 262.745.5015 for your records. Also, copied is Ted Warpinski, Mr. Emery's counsel. EnviroForensics developed a work plan which Brian can submit in the first week of August upon his return.

In the meantime, if Danielle can switch the semi-annual reporting requirements to everyone on this email, we will make sure it is completed in a timely fashion.

Sincerely,

**Rob Hoverman**, Northern Midwest Regional Director

Hi John,

Thank you for the updated consultant information. I will add EnviroForensics – Brian Kappen as the consultant for our records. I will touch base with Brian when he is back in the office starting Aug. 2<sup>nd</sup>.

Have a good weekend.

-Karen

Hello Karen - I'm sorry we did not communicate the change of consultants to you. When Chris Rogers left Westwood earlier this year we had to re-evaluate options. As a result this spring we engaged EnviroForensics in the project. Our project manager is Brian Kappen, based out of Waukesha, at 414-326-4412. Brian issued a new work plan about a month ago and we expect to resume drilling yet this summer as soon as we get concurrence to drill on neighboring properties.

I've copied Brian on this email so perhaps you and he can discuss the status of the work plan and current NR700 that is due. I presume he can provide the work plan fairly soon. Please continue to include me in any correspondence.

Thanks for prompting me on this, and I apologize for the oversight.

Best regards,  
John

Hello John,

The DNR was just notified that Westwood is no longer the consultant for your site at 111 Steele Street, Algoma.

Please provide the name and contact information of the new consultant working on this site.

It has also been some time since we received a status update for this site. The NR 700 Semi-Annual report submitted in January 2022 stated a work plan was being drafted and would be submitted to the DNR in early 2022. We have yet to receive this work plan to further delineate the groundwater impacts on and off site.

In addition to the consultant information, please provide a timeline for when we can expect the work plan to be submitted.

Please let me know if you have any questions.

Thank you,

-Karen
