Dear Mr. Feeney:

I am following up on the 906 S. Main St. property in West Bend, WI. It is the property to the North of 910 S. Main St. Konicek Enviromental Consulting LLC has been testing the properties for solvent contaminants for most of 2017. In Feb. 2018 I submitted the documentation to help identify DNR ID # 02-67-576350 case file to your office. I very much appreciate you calling me back at that time to discuss the process and address my questions. In April further testing (Pace Project #10424099) was done on the interior of our 906 building. I have received the results and notified by Konicek that your office will be making a determination on its results. I am not sure of, if any determination has been made by your office as to the 906 property's issues caused by 910.

I have the following questions for you:

- 1) Are there issues relevant to further action on the 906 property?
- 2) Any necessary remediation needed to give the 906 parcel a "clean certificate" for RESALE of the property?

Please give me a call with some direction as to what I need to know and do going forward. I wish not to have my wife Margaret, our children contend with something I need to take care of.

Regards,
