---

Thank you John,

I will stop the review of the current closure request for the above noted project. In order to stop the clock on this review I will enter a code 80 (Closure not approved) into the BRRTS database. I will attach this email string as the explanation for that code being entered. Once the excavation is completed and the confirmation sampling indicates that all the contaminated soils are removed, per our discussion I understood that was the plan, you can resubmit an updated, complete closure packet and we will review it for closure at that time.

Shanna

-  
Hello Shanna,

Thank you for taking time to discuss the Pleasant Prairie Power Plant tank system site (BRRTS # 02-30-576938) with me. As we discussed, we request the Department stop review of our BRRTS # 02-30-576938 closure submittal. The impacted soil under the paved area will be addressed when the site is excavated.

Please contact me with any questions.

Sincerely,

**John Delwiche, P.E.**
