SUBJECT: Final Case Closure
Pleasant Prairie Power Plant – Diesel AST Piping Run,
8000 95th Street, Pleasant Prairie, WI
DNR BRRTS Activity #: 02-30-576938
FID #: 230006260

Dear Mr. Prasad:

The Department of Natural Resources (DNR) considers Pleasant Prairie Power Plant – Diesel AST Piping Run closed. No further investigation or remediation is required at this time. Provide this letter to anyone who purchases this property from you.

This final closure decision is based on the correspondence and data provided and is issued under Wis. Adm. Code ch. NR 726. The DNR reviewed the request for closure on January 13, 2022. The DNR reviews environmental remediation cases for compliance with state laws and standards to maintain consistency in the closure of these cases. The DNR requested some corrections to the closure packet on February 8, 2022, and documentation that the conditions in that letter were met was received on May 10, 2022.

The contaminated area was associated with a piping run from an above ground diesel tank used to power boilers for the power plant. The extent and degree of contamination in soil was defined. An excavation was performed that removed the contaminated soil in this location.

Please be aware that the case may be reopened pursuant to Wis. Adm. Code, § NR 727.13, if additional information regarding site conditions indicates that contamination on or from the site poses a threat to public health, safety, or welfare or to the environment.

The DNR appreciates your efforts to restore the environment at this site. If you have any questions regarding this closure decision or anything outlined in this letter, please contact Shanna Laube-Anderson at shanna.laubeanderson@wisconsin.gov.

Sincerely,

Pamela A. Mylotta
Southeast Region Team Supervisor
