

DATE: November 8, 2022

TO: Site File

FROM: Scott Inman

SUBJECT: Where to find Additional Information – Portage Canal (02-11-543021, 02-11-02-11-577055, 02-11-577056, and 02-11-577057).

While the main documents required by NR 700 are uploaded to BRRTS, some information is not suitable for BRRTs (e.g. GIS and CADD files). As part of closing the contract with Anchor QEA, the consulting firm for the Segment 2 work, they sent me a flash drive containing the following information in a native format:

**Documents**

- Alum special study
  - Word version of text
  - Excel version of tables
  - Final PDF (full document)
- CDR
  - Word version of text
  - Final PDF (full document)
- Cost Memo Amendment
  - Word version of text
  - Excel version of tables
  - Final PDF (full document)
- Design Clarifications
  - Survey Memo
    - Word version of text
    - Final PDF (full document)
  - New Culvert Memo
    - Word version of text
    - Final PDF (full document)
  - Coir Fabric
    - PDF that shows revision
- Substantial Completion Form
  - Word version of text
  - Final PDF (includes signatures)

**Data Analysis**

- Mass Calculations
  - Excel File of mass removed
- SWAC
  - Excel file of SWAC calculations
- Dredge Volumes
  - Excel file of removal volumes

**GIS and CAD**

- CAD Files

- CAD files associated with final figures
- As-Builts from ENTACT
  - Cap/cover
  - Multiuse path
  - Dredge
  - RSA
- Location Figure (i.e., vicinity map figure)
- Shapefiles
  - Cap/cover
  - Multiuse path

I have copied these files to folder named “Portage\_Canal\_Seg2\_Native\_Files\_from\_Anchor.” This folder is located on DNR servers at M:\Project\Portage\Segments 2 – 4. The M drive is currently located at inmans ([\\dnr\home\rr](#)). Also note that I do not have any files on my work computer hard drive for the Portage Canal, the information is located at M:\Project\Portage.
