1.0 Introduction

AECOM was retained by the City of Kenosha (City) to provide limited site assessment activities associated with the closure and removal of three underground storage tank (UST) systems on the property located at 6415 28th Avenue in Kenosha, Wisconsin (subject property). The subject property was vacant and the buildings' structural integrity was compromised when a fire consumed a portion of one building within the last year. The tank closure and removal activities were conducted in conjunction with a raze permit issued and executed by the City due to public safety concerns.

1.1 Location

The subject property's location is shown on Figure 1 and consists of approximately 1.12 acres of land. Historically, the majority of the property was covered by buildings reportedly used as a dry cleaner and other light industrial uses. The subject property is currently owned by the Pyramax Group Inc.

The subject property is bordered by 64th Street to the north, a residential property to the south, 28th Avenue to the west, and a vacant property to the east. An overview of the subject property showing the configuration USTs relative to buildings is provided in Figure 2. The layout of the UST area is illustrated on Figure 2.

1.2 Background

Three USTs were registered to the subject property address in 1988, according to the Official Website of the Wisconsin Department of Safety and Professional Services Storage Tank Database¹. The registered USTs and their contents were:

- one 1,000-gallon tank, leaded gasoline;
- one 2,000-gallon tank, contents unknown; and
- one 8,000-gallon tank stored fuel oil.

Two USTs, (1,000 gallon and 2,000 gallon) are listed on the Storage Tank Database as removed, and they were not observed during razing activities. On approximately February 3rd or 4th, 2016, Macemon & Sons (Macemon) of Racine, Wisconsin (the raze contractor), uncovered three USTs during the demolition activities at the subject property. Two unregistered USTs; one 300-gallon steel tank and one 550-gallon steel tank and the registered 8,000-gallon tank (which was not removed as reported in the state's database, but closed in place [filled with concrete])

No historical releases associated with the subject property have been reported on the Wisconsin Department of Natural Resources (WDNR) BRTTS on the web database.

1.3 Scope of Work

Underground Power Corporation (UPC) was subcontracted by AECOM to perform the tank closure and removal, while AECOM provided the site assessment. The assessment activities were conducted on

¹ Wisconsin Department of Agriculture, Trade and Consumer Protection Bureau of Weights and Measures, Storage Tank Database Information, Official Website http://dvmwapps.wi.gov/ER_Tanks/ER-EN-TankSearch.htm for tank ID No. 404349.

February 17th, 2016 in accordance with the Wisconsin Department of Agriculture, Trade and Consumer Protection (DATCP), ch. SPS 310 *Flammable, Combustible and Hazardous Liquids*, Wisconsin Administrative Code (WAC) by a certified Tank System Site Assessor (TSSA). The following activities were completed during the closure/removal activity:

- Cleaned and removed three USTs;
- Performed limited UST closure assessments in accordance with DSPS SPS 310 code, the City of Kenosha Code of General Ordinances and the City of Kenosha Fire Department requirements;
- Collected and analyzed soil samples from beneath the USTs and sidewalls of tank beds. Soil samples were submitted to Pace Analytical Laboratory in Green Bay, Wisconsin for analysis of volatile organic compounds (VOCs).
- Properly disposed of USTs.

2.0 Tank Closure and Removal

AECOM completed site assessment activities for the closure and removal of three USTs on February 7, 2016. Macemon (raze contractor) had removed the 300 gallon UST and 550 gallon UST prior to UPC's (UST removal contractor) arrival at the subject property.

The certified Tank System Site Assessor was Mr. Tory Schultz (Wisconsin Department of Commerce Site Assessor No. 1130621 and DATCP Storage Tank Site Assessor certification No. 401298) of AECOM. The certified remover/cleaner was Mr. Brian James (Remover/Cleaner No. 42742) of National Tank Services of Wisconsin located in West Allis, Wisconsin. Mr. Leroy Nordmeyer, acting as Area 3 Tank Specialist District Inspector, was notified in advance by Underground Power of the UST removal activities and was not present during removal activities.

Tank No.	Historic Use	Contents at Closure	Tank Volume (gallons)	Construction	*Piping Length (feet)	Tank Condition	Status
1	Unknown	Residual Liquid	300	Bare steel	NA	Poor	**Removed 2/17/2016
2	Unknown	Residual Liquid	550	Bare steel	NA	Poor	**Removed 2/17/2016
3	Fuel Oil	concrete	8,000	Bare steel	NA	Poor	Removed 2/17/2016

*NA=Not Applicable. No piping was observed at the subject property.

**300 gallon UST and 550 gallon UST were removed from the tank bed by the raze contractor prior to the tank removal services.

The ambient air temperature during tank removal activities ranged from approximately 28°F to 32°F. Prevailing wind direction during tank removal activities was out of the west to southwest averaging 15mph. The following activities were conducted as part of the UST site assessment:

- Soil samples were collected from native soils below the tank bed and sidewalls. Native soils were described as greyish brown (10YR 5/2), sandy silt with fine to medium sand (ML).
- Excavations for each tank bed were measured and photographs of the USTs and the tank beds were taken.
- Soil sampling was conducted in accordance with, "Tank-System Site Assessment, A Guide to the Assessment and Reporting of Suspected or Obvious Releases from Underground and Aboveground Storage Tank Systems" (DATCP, 2013).
- A photo-ionization detector (PID), equipped with a 10.6eV lamp, was used to screen soils for volatile organic compounds that could indicate a potential release from the UST systems. The PID was calibrated to isobutylene according to manufacturer's recommendations and calibration notes were recorded.
- Soil samples, used for VOC screening, were placed into a plastic baggie and were heated for a minimum of 5 minutes before collecting a headspace reading using the PID.
- Soil samples intended for laboratory analysis were placed into laboratory supplied containers and stored on ice.
- A chain-of-custody form was completed and accompanied samples in a sealed cooler during shipment to the laboratory.

A photo log documenting the UST closure is provided in Appendix A. Copies of the Tank Registration (form TR-WM-137) and Tank System Service and Closure Assessment Report (form TR-WM-140) forms are provided in Appendix B.

Further discussion of the tank removals is provided below.

2.1 300 gallon UST (Tank 1) and 550 gallon UST (Tank 2)

Two USTs, a 300 gallon UST and a 550 gallon UST, were located in the north central portion of the subject property. The two USTs were not found on the Storage Tanks database and it is presumed they were not registered. The 300 gallon UST measured 4-feet diameter by 4-feet long and the 500-gallon UST measured 4-feet diameter by 6-feet long. The USTs were located adjacent to one another in a tank bed approximately 6 feet deep, 10 feet wide (north/south), and 10 feet long (east/west). Corrosion, pitting, and holes were observed on the USTs. See UST removal photographic log, provided in Appendix A. No staining of soils or groundwater was observed within the tank bed. There was no waste generated during the cleaning activities by UPC because the 300 gallon UST and the 550 gallon UST were observed to be empty. No piping from the USTs was observed with these two USTs.

Eight soil samples were collected using a backhoe bucket from native soil from the floor and sidewalls of the USTs location. Soil samples A(3-4), B(6-7), C(3-4), D(3-4), E(4-5), F(6-7), G(4-5), and H(4-5) were analyzed for VOCs. The depth of the sample in feet below ground surface is shown in the parentheses after the sample identification letter. Analytical results are summarized in Table 1 and discussed in Section 3.0. The USTs were transported off-site to Waukesha Iron and Steel in Waukesha, Wisconsin for recycling.

2.2 8,000 Gallon UST Fuel Oil (Tank 3)

An 8,000 gallon UST, located south of UST 1 and 2, was registered with regulation identification No. 404349 and was listed as "closed/removed". The UST was observed to be filled with concrete and water, apparently abandoned in place. The UST measured approximately 8-feet in diameter by 21-feet long and the UST was observed to have corrosion, pitting and holes (see photographic log, provided in Appendix A). The tank excavation measured approximately 11 feet deep, 12 feet wide (east/west), and 25 feet long (north/south). Water, at the time of UST removal, was observed in the tank bed at approximately 11 feet below ground surface (bgs). Staining on the soil and a sheen was observed on water that accumulated in the tank bed (see photographs 10 through 21 in Appendix A). No piping was observed during removal activities.

Five soil samples from native soil were collected from the excavation floor and sidewalls using a backhoe bucket and the soil samples (I(6-7), J(5-6), K(6-7), L(6-7), and M(11-12)) were analyzed for VOCs. Analytical results are summarized in Table 1 and discussed in Section 3.0. The UST was transported off-site to Waukesha Iron and Steel in Waukesha for recycling.

3.0 Soil Sampling Results

Analytical results are summarized in Table 1 and copies of the laboratory reports are included in Appendix C. Laboratory testing results indicate:

- Petroleum VOCs – ten petroleum-specific analytes were detected in the tank bed floor sample M(11-12) beneath the 8,000 gallon UST at depth of 11 to 12 feet below ground surface (bgs). These results did not exceed regulatory limits.
- Chlorinated VOCs – tetrachloroethene (PCE, a dry cleaning chemical) was detected in eleven of thirteen samples at concentrations that exceeded the direct contact (one sample) and/or groundwater pathway Wisconsin Residual Contaminant Levels (RCLs, NR720 Wisconsin Administrative Code). Associated compounds trichloroethene (detected in four samples) and cis-1,2-dichloroethene (2 samples) were detected above the groundwater pathway RCLs. The detection of chlorinated VOCs is consistent with the subject property's historical use as a dry cleaner.

4.0 Conclusions

Results of the tank closure and removal activities indicate:

- The tank closure and removal activities were conducted when the USTs were uncovered by the raze contractor during demolition activities for the subject property.
- The USTs were in poor condition and both pitting and corrosion were observed on the USTs.
- Reported laboratory concentrations of chlorinated VOCs exceed Wisconsin RCLs.
- Historical information indicates that the detection of the chlorinated VOCs are consistent with the historical use of the subject property.

UNDERGROUND FLAMMABLE/COMBUSTIBLE/HAZARDOUS LIQUID STORAGE TANK REGISTRATION

Underground tanks in Wisconsin that have stored or currently store petroleum or regulated substances must be registered. A separate form is needed for each tank. Send each completed form to the agency designated above. Have you previously registered this tank by submitting a form? Yes No
If yes, are you correcting/updating information only? Yes No

Personal information you provide may be used for purposes other than that for which it was originally collected (s. 15.04 (1)(m) Wis. Stats.)

This registration applies to a tank status that is (check one):

- In Use Closed - Tank Removed
 Newly Installed Closed - Filled with Inert Materials
 Abandoned with Product Abandon with Water
 Abandoned without Product (empty) Temporarily Out of Service - Provide Date: _____

Ownership Change (Indicate new owner name in block 2—attach deed)

Fire Department providing fire coverage where tank is located:

5. Has release been reported to the Department of Natural Resources? Yes No Release not evident at this time

300 gallon UST 1 ft. diameter x 4 ft. long
550 gallon UST 1 ft. diameter x 6 ft. long

D. CLOSURES (Check applicable box at right in response to all statements in section D)

Written notification was provided to the local agent 6 days in advance of closure date.

Y N NA

All local permits were obtained before beginning closure.

Y N NA

UST Form TR-VM-137 or AST Form TR-VM-118 filed by owner with the DATCP indicating closure.

Y

N NA

NOTE: TANK INVENTORY FORM TR-VM-137 OR TR-VM-118 SIGNED BY THE OWNER MUST BE SUBMITTED WITH EACH CLOSURE OR CHANGE-IN-SERVICE CHECKLIST.

D.1 TEMPORARILY OUT-OF-SERVICE

1. Product removed.

	Remover Verified	Inspector Verified	NA
--	---------------------	-----------------------	----

a. Product lines drained into tank (or other container) and liquid removed; and

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

b. All product removed to bottom of suction line, OR

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

c. All product removed to within 1' of bottom.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

2. Fill pipe, gauge pipe, tank truck vapor recovery fittings, and vapor return lines capped.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

3. All product lines at the islands or pumps located elsewhere are removed and capped, OR

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

4. Dispenser/pumps left in place but locked and power disconnected.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

5. Vent lines left open.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

6. Inventory form filed indicating temporarily out-of-service (TOS) closure.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

D.2 CLOSURE BY REMOVAL OR IN-PLACE

1. General Requirements:

a. Product from piping drained into tank (or other container).

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

b. Piping disconnected from tank and removed.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

c. All liquid and residue removed from tank using explosion-proof pumps or hand pumps.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

d. All pump motors and suction hoses bonded to tank or otherwise grounded.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

e. Fill pipe, gauge pipes, vapor recovery connections, submersible pumps and other fixtures removed.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

f. Vent lines left connected until tanks purged.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

g. Tank openings temporarily plugged so vapors exit through vent.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

h. Tank atmosphere reduced to 10% of the lower flammable range (LEL) - see Section E.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

2. Specific Closure-by-Removal Requirements:

a. Tank removed from excavation after PURGING/INERTING; placed on level ground and blocked to prevent movement.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

b. Tank cleaned before being removed from site.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

c. Tank labeled in 2" high letters after removal but before being moved from site.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

d. Tank vent hole (1/8" in uppermost part of tank) installed prior to moving the tank from site.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

e. Site security is provided while the excavation is open.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

3. Specific Closure-in-Place Requirements:

NOTE: CLOSURES IN-PLACE ARE ONLY ALLOWED WITH THE PRIOR WRITTEN APPROVAL OF THE DEPARTMENT OF AGRICULTURE, TRADE AND CONSUMER PROTECTION (DATCP) OR LOCAL AGENT.

a. Tank properly cleaned to remove all sludge and residue.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

b. Solid inert material (sand, cyclone boiler slag, or pea gravel recommended) introduced and tank filled.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

c. Vent line disconnected or removed.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

d. Inventory form filed by owner with the DATCP indicating closure in-place.

	<input type="checkbox"/> Y <input type="checkbox"/> N	<input type="checkbox"/> Y <input type="checkbox"/> N	
--	---	---	--

E. REPAIR, UPGRADE OR CHANGE-IN-SERVICE

Written notification was provided to the local agent 6 days in advance of service date.

All local permits were obtained before beginning service.

Form TR-VM-137 or TR-VM-118 filed by owner with the DATCP indicating change-in-service.

Y N NA

Y N NA

Y N NA

F. METHOD OF VAPOR FREEING OF TANK

Displacement of vapors by educator or diffused air blower.

• Educator driven by compressed air, bonded and drop tube left in place; vapors discharged minimum of 12 feet above ground.

• Diffused air blower bonded and drop tube removed. At pressure not exceeding 3 psig.

Inert gas using dry ice or liquid carbon dioxide.

Inert gas using CO₂ or N₂. NOTE: INERT GASES PRODUCE AN OXYGEN DEFICIENT ATMOSPHERE. LEL METERS MAY NOT FUNCTION ACCURATELY.

THE TANK MAY NOT BE ENTERED IN THIS STATE WITHOUT SPECIAL EQUIPMENT.

Gas introduced through a single opening at a point near the bottom of the tank at the end of the tank opposite the vent.

Gas introduced under low pressure not to exceed 5 psig to reduce static electricity. Gas introducing device grounded.

Readings of 10% or less of the lower flammable range (LEL) or 2% oxygen obtained before removing tank from ground.

Tank atmosphere monitored for flammable or combustible vapor levels prior to and during cleaning and cutting.

Calibrate combustible gas indicator and/or oxygen meter prior to use. Drop tube removed prior to checking atmosphere.

Tank space monitored at bottom, middle and upper portion of tank.

Part B – To be completed by environmental professional

Submit original Part B to the WDNR along with a copy of Part A

I. TANK-SYSTEM SITE ASSESSMENT (TSSA)

Site Name: WERNER'S CLEANERS

Address: 6415 28th AVE, KENOSHA, WI

Note: Site name and address must match with Part A Section 1.

To determine if a TSSA is required, see ATCP 93 and section II part B of ASSESSMENT AND REPORTING OF SUSPECTED AND OBVIOUS RELEASES FROM UNDERGROUND AND ABOVEGROUND STORAGE TANK SYSTEMS.

If a TSSA is required, then follow the procedures detailed in ASSESSMENT AND REPORTING OF SUSPECTED AND OBVIOUS RELEASES FROM UNDERGROUND AND ABOVEGROUND STORAGE TANK SYSTEMS.

1. Site Information

a. Has there been a previously documented release at this site? Y N

If yes, provide the DATCP # _____, or DNR BRRT's # _____.

b. Number of active tanks¹ at facility prior to completion of current services USTs 0 ASTs _____.

(NOTE 1: Do not include previously closed systems or system components.)

c. Excavation/trench dimensions (in feet). (Photos must be provided.)

EXCAVATION/TRENCH #	LENGTH	WIDTH	DEPTH
1	10 FEET (EAST/WEST)	10 FEET (NORTH/SOUTH)	6 FEET
2	20 FEET (NORTH/SOUTH)	12 FEET (EAST/WEST)	11 FEET

2. Visual Excavation/Trench Inspection (Photos must be provided for "Yes" responses, except item b.)

Do any of the following conditions exist in or about the excavation(s)?

a. Stained soils: Y N b. Petroleum odor: Y N c. Water in excavation/trench: Y N

d. Free product in the excavation/trench: Y N e. Sheen or free product on water: Y N

3. Geology/Hydrogeology

a. Depth to groundwater 11 feet b. Indicate type of geology² SLT

(Note 2: Use these symbols individually or in combination as appropriate: C = Clay, SLT = Silt, S = Sand, Gr = Gravel)

4. Receptors

a. Water supply well(s) within 250 feet of the facility? Y N If yes, specify UNKNOWN
b. Surface water(s) within 1000 feet of the facility? Y N If yes, specify UNKNOWN

5. Sampling

a. Follow the procedures detailed in ASSESSMENT AND REPORTING OF SUSPECTED AND OBVIOUS RELEASES FROM UNDERGROUND AND ABOVEGROUND STORAGE TANK SYSTEMS.
b. Complete Tables 1 and 2 as appropriate. (Attach chain-of-custody and laboratory analytical reports.)
c. Attach a detailed map of site features and sample locations.

J. NOTE RELEVANT OBSERVATIONS, SPECIFIC PROBLEMS OR CONCERNS BELOW

City of Kenosha raze contractor removed 300 gallon and 550 gallon USTs prior to AECOM arrived at 6415 28th Ave Site. Also prior to AECOM arrival, raze contractor indicated unknown liquids were observed and removed from both 300 gallon and 550 gallon USTs found along the north-central portion of the site during removal. Obvious release at 6415 28th Ave Site, as observed by staining on soil (300 gal./550 gal. tank bed), stained soil/olfactory/sheen observed on water accumulated in 8,000 gal. tank bed, pitting on all USTs. Contractor indicated unknown liquids were observed and removed from both 300 gallon and 550 gallon USTs

K. TANK-SYSTEM SITE ASSESSMENT INFORMATION

As a tank-system site assessor certified under Wis. Admin. Code section SPS 305.83, it is my opinion that there is no indication of a release of a regulated substance to the environment.

Sampling at the site indicates there has been a release to the environment. Pursuant to Wis. Admin. Code section ATCP 93.585 (2) (a) and Wis. Stats. section 292.11 (2) (a), the owner or operator or contractor performing work under chapter ATCP 93 shall immediately report any release of a regulated substance to the Wisconsin Department of Natural Resources. Failure to do so may result in forfeitures of a minimum of \$10 and a maximum of \$5000 for each violation under Wis. Stats. section 168.26 (5). Each day of continued violation and each tank are treated as separate offenses.

RE: Project: 60488203 6415 28TH AVE
Pace Project No.: 40128445

Dear Lanette Altenbach:

Enclosed are the analytical results for sample(s) received by the laboratory on February 19, 2016. The results relate only to the samples included in this report. Results reported herein conform to the most current TNI standards and the laboratory's Quality Assurance Manual, where applicable, unless otherwise noted in the body of the report.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Christopher Hyska

QUALIFIERS

Project: 60488203 6415 28TH AVE
Pace Project No.: 40128445

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above LOD.

J - Estimated concentration at or above the LOD and below the LOQ.

LOD - Limit of Detection adjusted for dilution factor and percent moisture.

LOQ - Limit of Quantitation adjusted for dilution factor and percent moisture.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected at or above the adjusted LOD.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.

LABORATORIES

PASI-G Pace Analytical Services - Green Bay

ANALYTE QUALIFIERS

W Non-detect results are reported on a wet weight basis.
