Mae,

I will prepare the Form 4400-89 "GROUNDWATER MONITORING WELL INFORMATION FORM" for both Closed Landfill 2 and Fire Training Burn Pit 3. The form asks for the initial water level prior to well development. I won't have that information. But, I can provide the water level from a recent sampling event. I don't imagine those levels will be significantly different in the sandy soil we have here.

Craig,

Tried to return your call, but missed you. It would be great if you could send an updated well inventory form. Thanks for letting me know.
