BRIEF DESCRIPTION OF INCIDENT:

Training unit from the first major culmination training exercise of the year (WAREX) apparently did not drain all of the MOGAS inside of their fueling hose before returning their vehicle to the Equipment Concentration Site (ECS) 67. New unit participating in CSTX (2nd major training exercise) began their preventive maintenance, checks and services when one of the soldiers opened up the storage hose valve releasing approx. 5-10 gallons of MOGAS. ECS-67 personnel was notified, and spill response was initiated and executed. ECS-67 personnel excavated 6,120 LBS of contaminated soil and placed the soil in the licensed soil storage building. Photos, weight tickets and map indicating the location of the release are attached for review. Wisconsin DNR Emergency Spill Hotline was notified and briefed on this reportable spill.
