Tauren:

Hope you are well.

We have made progress on several fronts.

- The eighth quarterly groundwater sampling event was completed in March. We received the lab data and are preparing a report that summarizes all eight rounds. It includes a statistical trend analysis and an evaluation of the MNA parameters run on the last round.
- The vapor and soil sampling work plan has been updated to incorporate the last set of comments that were included in the February 4, 2020 approval e-mail.
- Last week, we obtained a signed access agreement from the owner of the 1303 19<sup>th</sup> Street property and are making preparations to proceed with sub-surface utility clearance prior to an initial round of sub-slab vapor sampling.
- Now that the shelter at home order has been lifted, we are preparing to perform the field work, including sewer vapor sampling, hand auger soil sampling, and sub-slab vapor sampling.

Reply as needed with any questions or comments.

Best Regards,

John

Hi David,

Can you provide an update on the most recent work completed for this site? This was outlined in your January 23, 2020 Vapor Intrusion Evaluation Work Plan and my follow up to the work plan on February 4, 2020.

Thanks,

**We are committed to service excellence.**
