Good morning,

I have started reviewing the report and in Section 1.1 Site Investigation, you request a Site Investigation Complete Determination in addition to the request for approval of the remedial action option you selected. Emerging contaminant (EC) scoping is part of the Wis. Admin. Code ch. NR 716 site investigation process, so as of right now with the information I have, the site investigation will not be approved since there is no emerging contaminant scoping. If you would like DNR to be able to determine whether the site investigation is complete as part of this fee review, the emerging contaminant scoping will have to be provided. You may submit the emerging contaminants review letter separately as a supplemental document to the Site Status and Remedial Action Options Report, then the DNR will review both documents to determine if the site investigation is complete. Please let me know what you decide to do.

Tauren:

A check to cover the RAOR review fee is being cut this week and will be sent out. We are preparing an emerging contaminants review letter that will be submitted separately.

Best Regards,

John

Hi David,

A couple questions I have for the above referenced report:

- In the cover letter, it indicates a required \$1,050 review fee is being submitted separately. What fee are you referring to? Are you submitting a review fee because you want a DNR response letter to a site investigation review, a remedial action options review, or some other review completed?
- In previous phone discussions, I thought it was planned to include an emerging contaminant scoping evaluation in this report, is that correct? I didn't see a scoping evaluation in the report.

Please let me know when you get a chance.

Thanks,

**We are committed to service excellence.**
