Subject: General Notice to Proceed for 2022 Work Plan Addendum II - Pre-Design Groundwater and Soil Investigation, Hamilton Industries Site (Former), BRRTS # 02-36-578316

Hi John,

This email acts as a general notice to proceed with the above referenced work plan submitted to DNR on August 30, 2022 with the below comments:

- Based on the results of the media evaluation proposed for surface water and sediment, sampling may be necessary.
- In the letter Response to Technical Assistance Request – Contaminants of Concern and Media Evaluation, issued by DNR on May 4, 2022, it indicated that additional PFAS sampling is needed before a determination can be made that PFAS is not associated with releases on-site. It appears the site conceptual model will be updated as part of this work plan, but there is no PFAS sampling proposed. Therefore, this will still need to be addressed.

Regards,

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
