**Subject:** Response to Additional Investigation of PCBs and PFAS for Hamilton Industries Site (Former), BRRTS # 02-36-578316

Hi David,

As discussed last week, the DNR reviewed the additional site investigation results submitted in August 2023 for PCBs and PFAS.

The site investigation for PCBs is adequate. The PCB contamination above soil standards will need to be delineated on future soil figures and will be handled under a soil continuing obligation for the site.

The site investigation for PFAS is not complete. Additional investigation off-site is needed to define degree and extent.

Regards,
