Subject: WDNR NR 141 Variance Approval, Ogden Cleaners Highland Plaza, 8600 West Brown Deer Road, Milwaukee WDNR BRRTs # 02-41-5579065, FID # 341286000

Dear Mr. Symeon:

Your request for the installation of a small diameter Chapter NR 141 groundwater monitoring well, in particular, Chapter NR 141.07 (1), well casing minimum inside diameter of 1.9 inches and NR 141.19 (1) (c), inside diameter of temporary (drill) casing shall be at least 4 inches greater than the inside diameter of the permanent well casing exemptions has been reviewed.

The Special Circumstances for granting the exemption are:

- Access within the Ogden Cleaners is limited
- Drilling equipment capability to install a standard 2-inch diameter monitoring well will not fit inside the Ogden Cleaners.

If you have any questions concerning this variance, please contact me at 414-263-8607.

Sincerely,

Binyoti F. Amungwafor  
Hydrogeologist
