UNIT INVOLVED (IF APPLICABLE): 439 QTR Master Company

SUPPLIES USED: Extavator, Bulldozer

HOME ADDRESS: Middle Town Connecticut

DODAC #: N/A

TOTAL MAN-HOURS: 4

BRIEF DESCRIPTION OF INCIDENT:

On Sunday, April 30, 2017, the 439th Quarter Master Company was conducting fueling operations in a parking lot near Big Sandy lake on Ft McCoy's South post. During the operation a dump valve failed and released approximately 25 gallons of F-24 (Aviation Fuel) fuel on to the parking lot. The spill was on the other side of the parking lot away from the lake and no contaminants reached the water source. The spill was immediately contained and reported to Environmental. After Environmental arrived on the scene the 439th began excavating the contaminated soil. All the contaminated soil was cleaned up and the scene was then cleared by Environmental. Approximately 34,000 LBS of contaminated soil was placed in the Fort McCoy permitted soil storage building for later disposal. Photos, and a map indicating the location of the release are attached for review. On 30 April 2017 an effort was made to contact the Wisconsin DNR Spill Hotline but there was no answer. The following day 1 May 2017 another call was made to the Wisconsin DNR Emergency Spill Hotline and they were notified and briefed on this reportable spill.
