**Subject: Environmental Investigation Sample Results  
BRRTS: 03-41-581019**

*Received  
12/04/2018*

Dear Mr. Fassbender:

In accordance with Wisconsin Department of Natural Resources (WDNR) regulation NR 716.14, EnviroForensics, LLC. (EnviroForensics) is providing the results of environmental samples collected from within the City of Wauwatosa right-of-way. The soil samples were collected on November 8, 2018. The sampling locations (DP-7 and DP-8) are depicted on the attached **Figure 1**. The sampling activities are part of an environmental investigation being performed for the One Hour Martinizing facility located at 6737 Milwaukee Avenue in Wauwatosa, Wisconsin (Site) at the direction of the WDNR pursuant to the authority granted to it under State and Federal law. The chemicals of concern for the investigation are petroleum compounds related to former gasoline station operations located at the above reference property.

The Responsible Party is:

OHM Properties 5 LLC  
W229 N2494 County Highway F  
Waukesha, WI 53186

### **Sampling Results**

A total of four (4) soil samples were collected for laboratory analysis from within the city right-of-way at boring locations DP-7 and DP-8 shown on **Figure 1**. Continuous soil cores were collected at both locations and a composite sample at each two-foot depth interval was screened using a photoionization detector (PID) instrument calibrated to detect volatile petroleum compounds. The results of the PID screening allowed us to select samples for laboratory analysis from suspect intervals. Soil cores were collected and screened with the PID to a maximum depth of 25 feet at DP-7. Soil cores were collected to a maximum depth of 50 feet at DP-8; however, field screening was limited to the depth interval between 26 to 50 feet because soil analyses had been previously performed at this location (DP-4) in the upper 26 feet.

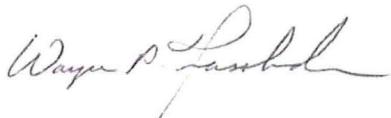

Two (2) soil samples were selected from each boring location for laboratory analysis of total volatile organic compound (VOCs) and polycyclic aromatic hydrocarbons (PAHs) based on the PID readings. The laboratory results of VOC and PAH analyses are summarized and compared to WDNR standards on the attached **Table 1** and **Table 2**, respectively. A copy of the laboratory report that relates to the soil samples is also attached.

As can be seen in **Table 1**, no VOC compounds were detected in soil above the laboratory detection limits at DP-7, and none of the compounds detected at DP-8 exceeded either the industrial or residential direct contact residual contaminant levels (RCLs) established for protection of human health. Ethylbenzene, naphthalene, and 1,2,4-trimethylbenzene were detected in soil collected from DP-8 at concentrations above their respective soil to groundwater RCLs.

As can be seen in **Table 2**, polycyclic aromatic hydrocarbons (PAHs) acenaphthylene and phenanthrene were detected in soil collected from locations DP-7 and DP-8, respectively. These compounds do not have established RCLs.

If you have any questions or concerns, please contact us at 414-982-3988 or by email at [wfassbender@enviroforensics.com](mailto:wfassbender@enviroforensics.com). The WDNR project manager, Binyoti Amungwafor, can be reached at 414-263-8607. We greatly appreciate your help and patience with this matter. We will contact you about the additional investigation activities for the site.

Sincerely,  
**EnviroForensics, LLC**

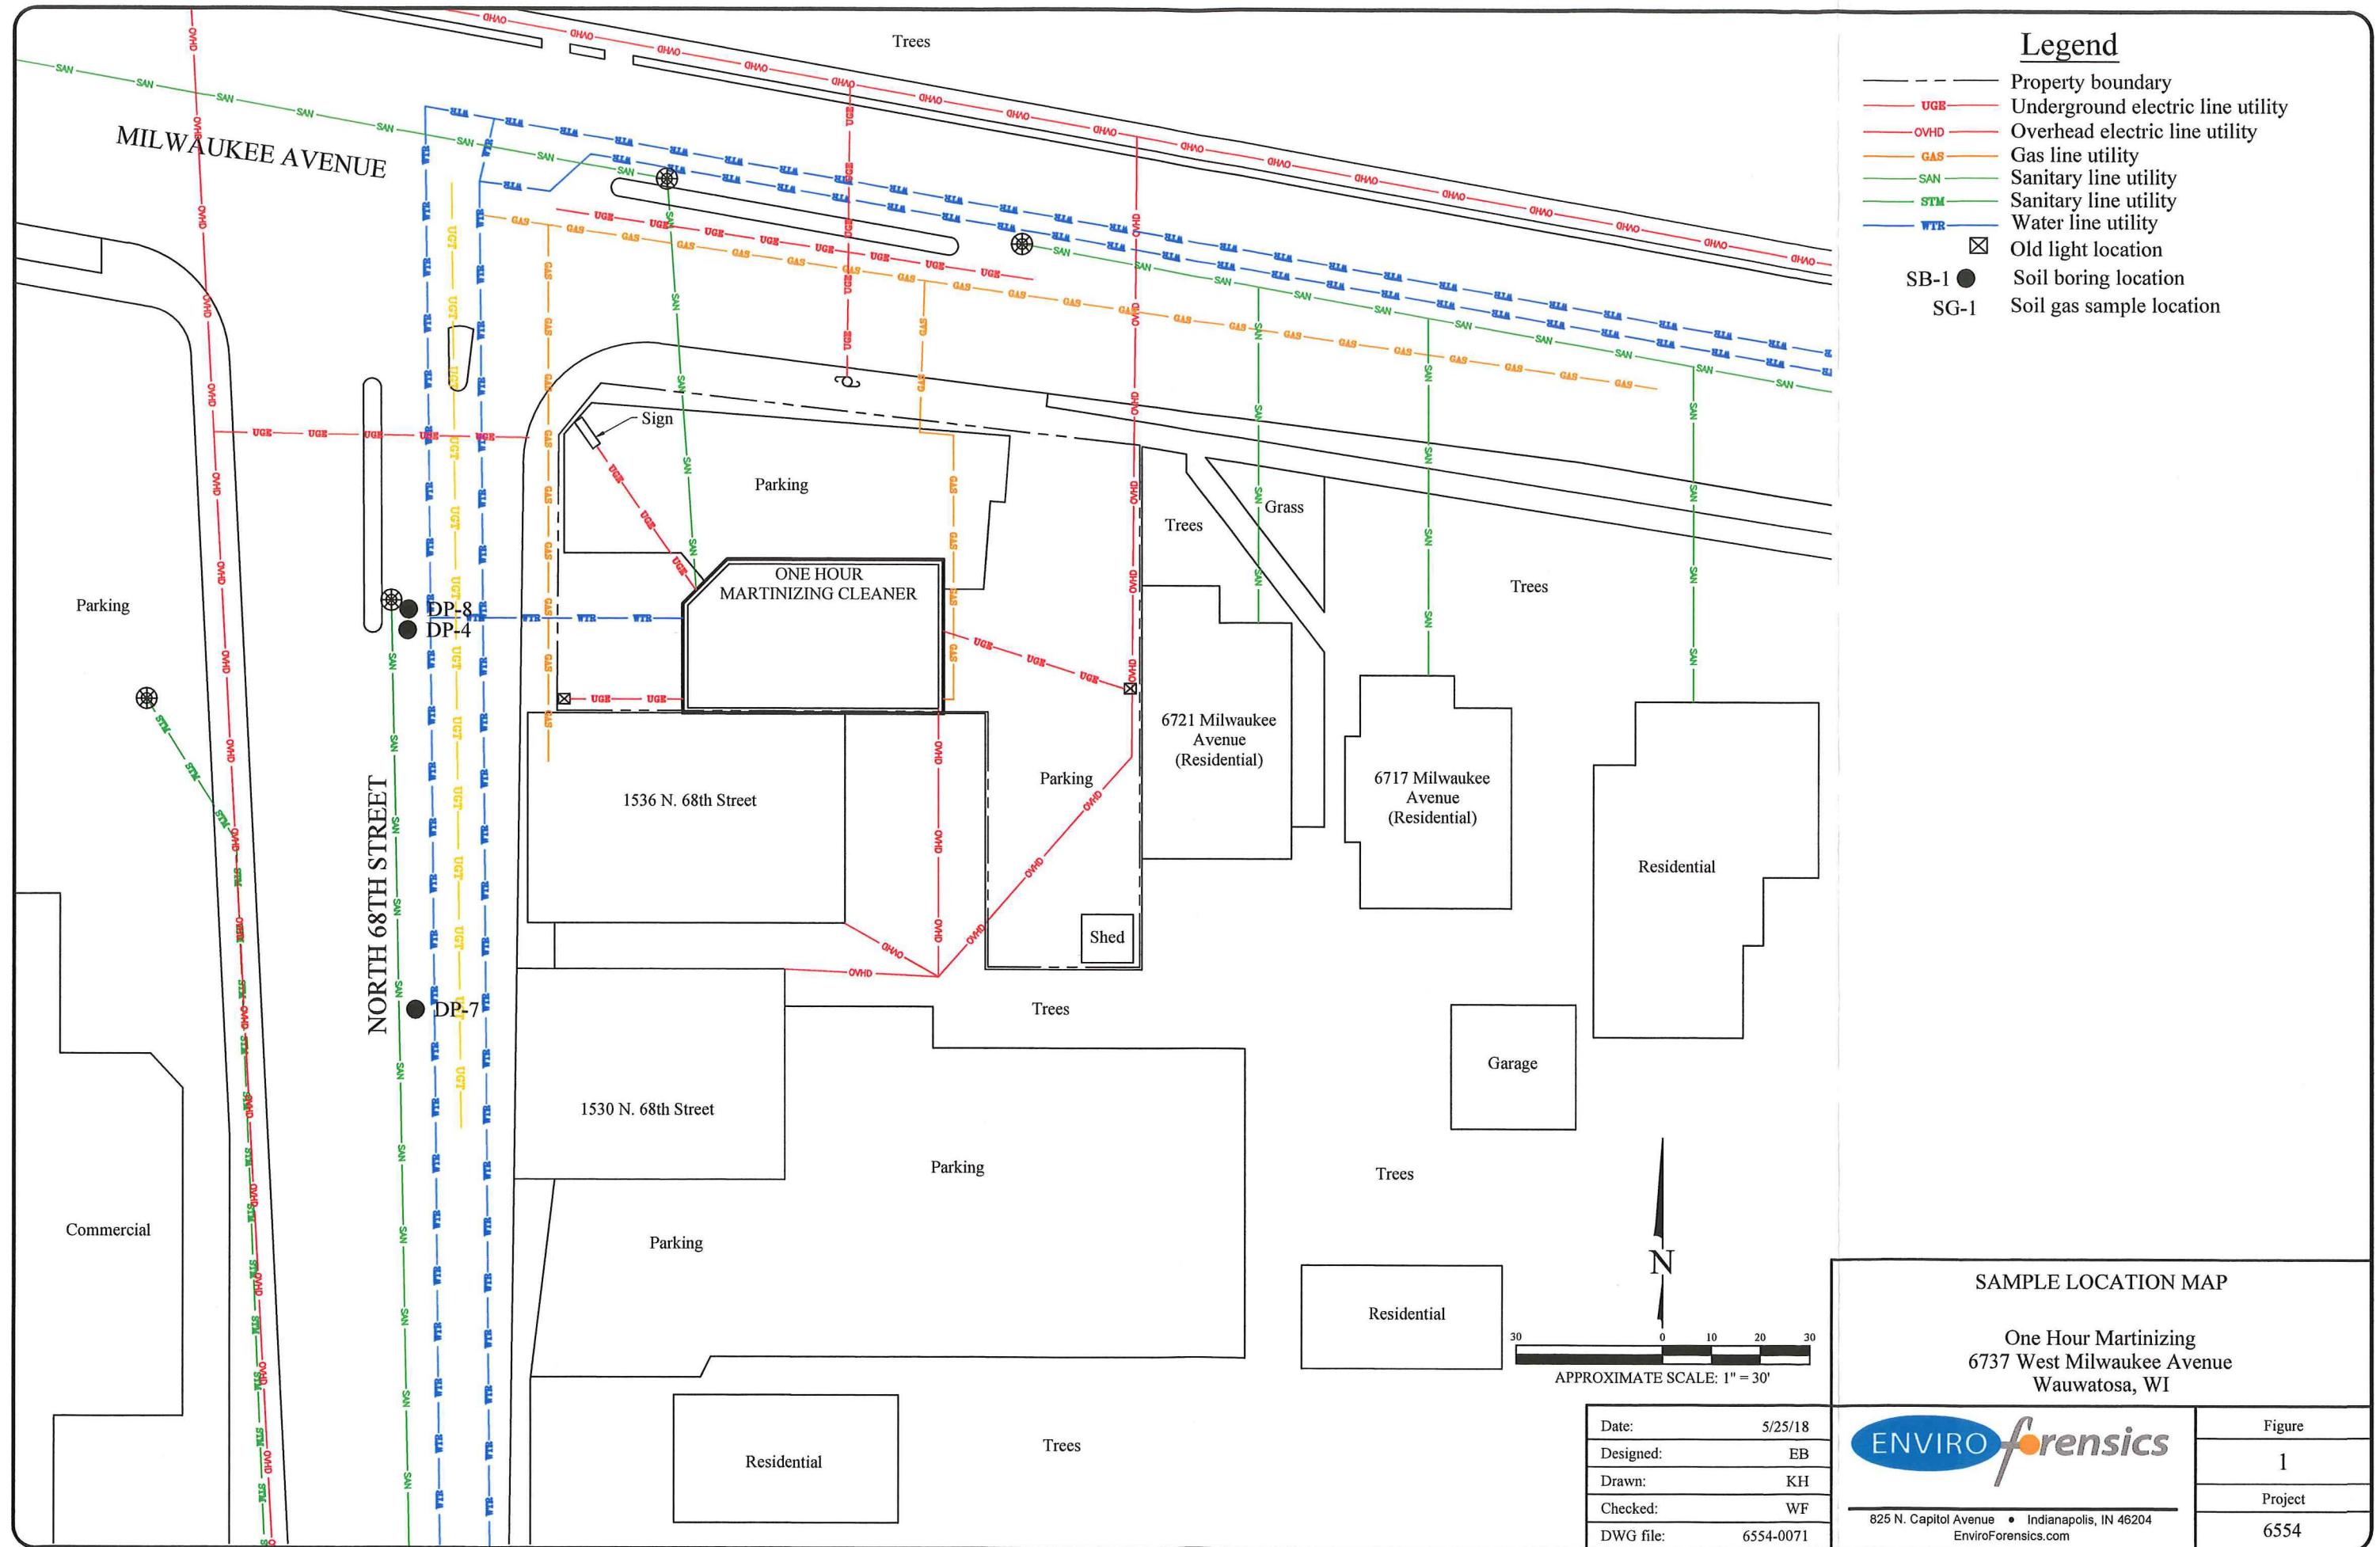

Wayne Fassbender, PG  
*Senior Project Manager*

**Notes:**

Residual Contaminant Levels (RCL) are based on Wisconsin Department of Natural Resources NR 720 Wisconsin Administrative Code and publication RR-890.

Units are in micrograms per kilogram =  $\mu\text{g}/\text{kg}$

VOCs = volatile organic compounds

**Bolded** and Shaded blue values are above WDNR generic Soil to Groundwater Residual Contaminant Levels

J = Analyte concentration detected between the laboratory Reporting Limit and the laboratory Method Detection Limit

NE = Not Established

**Notes:**

<sup>1</sup> Residual Contaminant Levels calculated according to the procedures described in WDNR Publication RR-890

Updated with WDNR's June 2018 Remediation Redevelopment Program RCL spreadsheet

All concentrations reported in micrograms per kilogram µg/kg

**Bolded** values are above Laboratory Detection Limits

Samples analyzed using EPA SW-846 Method 8270

J = Estimated concentration between the Method Detection Limit and the Reporting Limit

NE = Not Established

RCL = Residual Contaminant Level

PAHs = Polycyclic Aromatic Hydrocarbons

**Code**      **Comment**

1      Laboratory QC within limits.

All solid sample results reported on a dry weight basis unless otherwise indicated. All LOD's and LOQ's are adjusted for dilutions but not dry weight. Subcontracted results are denoted by SUB in the analyst field.

**Authorized Signature**
