Re: Approval of the Operable Unit 1 Institutional Control Implementation and Assurance Plan;
Lower Fox River and Green Bay Superfund Site, WI

Dear Mr. Hartman:

The U.S. Environmental Protection Agency and the Wisconsin Department of Natural Resources (“Response Agencies”) have completed their review of the September 19, 2023 Operable Unit (OU) 1 Institutional Control Implementation and Assurance Plan (ICIAP), prepared by Foth Infrastructure & Environment, LLC, on behalf of Glatfelter Corporation. The purpose of the ICIAP is to ensure the long-term protectiveness of the Remedial Action to address contaminated sediments in OU1. Contaminated sediments within OU1 contained beneath engineered caps are subject to this ICIAP.

Therefore, the Response Agencies approve the OU1 ICIAP.

Please let me know if you have any questions regarding this matter.

Sincerely,

A handwritten signature in cursive script that reads "James Saric".

James A. Saric
