Subject: Town of Phelps

Dick,

This is a follow up to our phone conversation of 3/17 regarding the CM Christiansen site and the Town of Phelps development approval.

As mentioned, to properly assess the development proposal, I requested further information including:

- The development request only included fencing as an option in protection the public from the existing capped areas of soil contamination. I would like to see a brief review of other options (i.e. soil removal, improve existing cap) including estimated costs.
- More detail on specifications and location of fencing/signage.

If you have further questions regarding this request please feel free to contact me.

--John
