Whitman Park Shopping Center
1035 Summit Ave
Oconomowoc, Wisconsin 53066

Subject: **Environmental sampling results**
BRRTS #02-68-582951
DNR FID #268087160

Dear Owner and Tenants

EnviroForensics, LLC (EnviroForensics) is providing the results of soil, groundwater, air, and sub-slab vapor samples collected from your property and former One Hour Martinizing (OHM) tenant space located at 1035 Summit Avenue, Oconomowoc, Wisconsin in accordance with the Wisconsin Department of Natural Resources (WDNR) regulation NR 716.14. The locations of the soil borings, indoor/outdoor air samples, and sub-slab samples are shown on attached **Figure 1**.

The chemicals of concern are the dry-cleaning solvent tetrachloroethene (PCE) and its associated breakdown products trichloroethene, dichloroethane, and vinyl chloride collectively known as the chlorinated volatile organic compounds (CVOCs) described in this report.

The Responsible Party is:

Mr. Brian Cass
OHM Holdings, Inc.
W229 N2494 Hwy F
Waukesha, WI 53186
Telephone: 262-521-9710

On July 27, 2021, indoor and background outdoor air samples were collected for 8-hours in Sun Laundry, Book & Company and Bruger's Bagels. Indoor air sample locations are depicted on **Figure 1**. The outdoor air sample was located along the west side of the building. On July 28, 2021 five (5) sub-slab vapor samples were collected, sample locations are depicted on **Figure 1**. The table below corresponds to the sample IDs at each location for the vapor samples:

| Location | | |
|--------------------|------------------------------------|--------------------|
| Books & Company | Stone Creek Coffee/Bruger's Bagels | Sun Laundry |
| 1039 Summit Avenue | 1043 Summit Avenue | 1027 Summit Avenue |
| Sample ID | | |
| SSV-5 | SSV-6, SSV-7, SSV-8 | SSV-4 |
| IA-3 | IA-4 | IA-2 |

Soil borings SB-5, SB-6, SB-7, SB-8 and SB-9 were completed on July 26 and 27, 2021. SB-5 was located inside the former One Hour Martinizing location at 1035 Summit Avenue, Oconomowoc. SB-6 through SB-9 were located along the northwest side of the Whitman Park shopping center. Borings SB-6, SB-7 and SB-9 were advanced to a depth of 35' while SB-5 and SB-8 were advanced to 21.5' and 29', respectively, where refusal occurred and the boring was abandoned. At SB-5, 14' beneath the ground surface auger refusal occurred, the boring location was adjusted 1' to the north and advanced to a depth of 21.5'.

Sampling Results

The laboratory results of soil, groundwater, and vapor samples collected are summarized and compared to public health criteria in attached **Table 1**, **Table 2**, and **Table 3**, respectively. The analytical laboratory reports are also attached.

Soil

Soil samples were collected every two feet and were immediately preserved in methanol and stored on ice. The samples were split and placed in zip lock bags. One (1) bag was immediately placed on ice in a cooler for potential laboratory analysis and the other was set aside for field screening using a photoionization detector (PID) that was capable of detecting volatile organic compounds in the parts per billion range. Soil samples were selected for laboratory analysis based on PID readings. Additional samples that were not selected for analysis were also sent to the laboratory on ice to be held if further analysis was necessary. All soil samples were analyzed for the CVOCs by EPA Method 8260.

As can be seen in **Table 1**, and the analytical results sheets, the 16-18' interval sample collected at SB-5 contained PCE at a level that exceeded the Soil to Groundwater Residual Contaminant Level. Soil samples from borings SB-6 through SB-9 did not contain CVOCs in concentrations exceeding the laboratory detection limits.

Groundwater

Borings SB-6, SB-7 and SB-9 were advanced into the water table, once the soil boring was completed a 1" PVC temporary well was installed. Each well was screened from 25-35'. Grab groundwater samples were collected using a bailer and were preserved in hydrochloric acid stored on ice. Once the groundwater samples were collected the PVC wells were removed and abandoned with 3/8-inch granular bentonite, SB-6 and SB-9 were capped with concrete as they were located on the pavement.

The SB-6 and SB-7 groundwater samples contained PCE above the Public Health Enforcement Standard, while SB-9 did not contain CVOCs in concentrations exceeding the laboratory detection limits. These results do not indicate a risk to you, as the groundwater is not the public water supply.

Indoor Air and Sub-slab Vapor

As seen in **Table 3**, and the analytical results sheets, CVOCs were not detected in concentrations above the laboratory detection limits in either the indoor air sample or the sample of outside air.

The CVOCs tetrachloroethene (PCE) was detected in all of the sub-slab samples collected, although the concentrations are below the small commercial vapor risk levels (VRSLS) for these compounds. The current property designation is considered small commercial. There does not appear to be a vapor risk to your building.

If you have any questions or concerns, please contact me at 414-630-0060 or by email at rhoverman@enviroforensics.com.

The WDNR project manager, Joseph Martinez, can be reached at 414-263-8705. We greatly appreciate your help and patience with this matter.

Sincerely,
EnviroForensics, LLC

Rob Hoverman, PG
Senior Project Manager

Notes

WDNR Residual Contaminant Levels (RCLs) were calculated according to the procedures described in WDNR Publication RR-890.

Samples analyzed using EPA SW-846 Method 8260

Bolded values exceed laboratory detection levels

Bolded and orange shaded values exceed the Industrial Residual Contaminant Level

Bolded and green shaded values exceed the Non-Industrial Residual Contaminant Level

Bolded and blue shaded values exceed the Soil to Groundwater Residual Contaminant Level

µg/kg = micrograms per kilogram

bgs = below ground surface

J = Result is less than the reporting limit but greater than or equal to the method detection limit and the concentration is an estimated value.

ND = Compound not detected above the laboratory method detection limit

NE = Not established

VOCs = Volatile Organic Compounds

* = Laboratory detection of p-Isopropyltoluene below applicable criteria

** = Saturated soil sample not applicable for comparison to residual contaminant levels

Samples/constituents not shown are below laboratory reporting limits

TABLE 2
GRAB GROUNDWATER SAMPLE ANALYTICAL RESULTS
One Hour Martinizing
1035 East Summit Avenue, Oconomowoc, Wisconsin

| Sample ID | Screened Interval (feet bgs) | Date Sampled | Tetrachloroethene | Trichloroethene | cis-1,2-Dichloroethene | trans-1,2-Dichloroethene | Vinyl chloride |
|-----------|------------------------------|--------------------------------|-------------------|-----------------|------------------------|--------------------------|----------------|
| | | | VOCs (µg/L) | | | | |
| | | Enforcement Standard | 5 | 5 | 70 | 100 | 0.2 |
| | | Preventive Action Limit | 0.5 | 0.5 | 7 | 20 | 0.02 |
| SB-6W | 25-35 | 7/27/2021 | 21.4 | <0.47 | <0.39 | <0.6 | <0.17 |
| SB-7W | 25-35 | 7/27/2021 | 6.9 | <0.47 | <0.39 | <0.6 | <0.17 |
| SB-9W | 25-35 | 7/27/2021 | <0.54 | <0.47 | <0.39 | <0.6 | <0.17 |

Notes:

µg/L = micrograms per liter

Samples analyzed using EPA SW-846 Method 8260

VOCs = Volatile Organic Compounds

Bolded and orange shaded values are above Public Health Enforcement Standard

Bolded and blue shaded values are above Public Health Preventive Action Limit

Bolded values are above detection limits

bgs= below ground surface

Samples/constituents not shown are below laboratory reporting limits

J = Analyte concentration detected between the laboratory Reporting Limit and the laboratory Method Detection Limit

NE = Not Established

NLRA = No laboratory results available

"J" Flag: Analyte detected between LOD and LOQ

LOD Limit of Detection

LOQ Limit of Quantitation

Code **Comment**

1 Laboratory QC within limits.

All solid sample results reported on a dry weight basis unless otherwise indicated. All LOD's and LOQ's are adjusted for dilutions but not dry weight. Subcontracted results are denoted by SUB in the analyst field.

EnvisionAir Project Number: 2021-377
Client Project Name: 200009 – OHM Summit

Dear Mr. Hoverman,

Please find the attached analytical report for the samples received July 30, 2021. All test methods performed were fully compliant with local, state, and federal EPA methods unless otherwise noted. The project was analyzed as requested on the enclosed chain of custody record. Please review the comments section for additional information about your results or Quality Control data.

Feel free to contact me if you have any questions or comments regarding your analytical report or service.

Thank you for your business. EnvisionAir looks forward to working with you on your next project.

Yours Sincerely,

A handwritten signature in black ink that reads "David Norris". The signature is fluid and cursive, with "David" on top and "Norris" below it.
