Frank,

Thank you for your site investigation update today, overall there did not seem to be significant gaps in the investigation work so far. If you have a general idea or estimated timeframe you expect to submit the remedial action plan or remedial design plan following the SIR submittal that may be helpful for us to know (I'm sorry if you had mentioned at the meeting and I might have forgotten).

Included [here](#) is a link to the sewer VI study done by the DOD that we had talked about at the meeting. The link includes the whole study, an executive summary with diagrams that are helpful, and sampling protocol details. This link is also on the DNR vapor intrusion webpage.

Link to study: <https://www.serdp-estcp.org/Program-Areas/Environmental-Restoration/Contaminated-Groundwater/Emerging-Issues/ER-201505/ER-201505>

DNR VI resource page: <https://dnr.wi.gov/topic/Brownfields/Vapor.html>

If you have any other questions regarding the vapor intrusion aspect of investigation at this site, let me know.

Thanks,

Adam
