To whom it may concern

Regarding the letter dated July 25
2019 re: Contamination detected in
municipal Well #7

The commercial building at 5885
Highway 8 West was built before 1960.
We have been the sole occupants
until 6 years ago when the building
was leased to "Jeff's fabricating"
who (to my knowledge) does equipment
repair for Ponnse. (welding)

Other than the above, the property
& building were only used for equipment
(excavating) storage & repair.

Concerning remediation over 20
years ago a fuel tank leaked, and
this was remediated professionally
to legal specifications. (This was
diesel fuel)

Respectfully,

Patricia J. Bruyette
