FYI – Seasonal home located at 6771 Blue Jay Lane – WNW of the airport. No detections for PFAS.

Also, sampling of some golf course wells indicated very low levels of PFAS. I'm assuming biosolids utilized there as well?

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

ND = Not Detected (< LOD)

LOD = Limit of Detection

MCL = Maximum Contaminant Levels for Drinking Water samples.

The Maximum Contaminant Levels (MCL) are the Federal Safe Drinking Water limits established by the United States Environmental Protection Agency (EPA). All municipal public water supplies must achieve levels at or below the values for individual compounds as listed to have the water considered "safe" for consumption. You can compare your result to the Federal limit listed to see if it meets the same standard that is required of public drinking water systems.
