Subject: Waupaca Foundry Plant 4: Well-drilling considerations

Good morning,

Thanks for taking the time to speak with me last week. As we discussed, the SIWP is approved contingent on addressing the well-drilling procedures through the contamination on the Waupaca Foundry property. I located the well drilling procedures JCI used when drilling on their Stanton Street facility to avoid potential cross contamination of shallow and deep groundwater. The general procedures are outlined on page 333 of the [March 2021 Quality Assurance Project Plan](#).

If this link does not work the report is uploaded to BRRTS on the web (BRRTS #02-38-581955 JCI/Tyco Stanton (PFAS)).

2021-04-15	43	Site Activity Status Update Received		2021 Q1 STATUS UPDATE
2021-04-06	130	DNR Regulatory Reminder Sent		VAPOR INTRUSION AND TCE REMINDER LETTER
2021-03-22	135	Site Investigation Workplan (SIWP) Received (fee)		GROUNDWATER SITE INVESTIGATION WORKPLAN
2021-03-17	99	Miscellaneous		RESPONSE TO FOAM ACTION PLAN RECEIVED 2/15/2021
2021-03-16	97	Technical Assistance Request Received (fee)		REVIEW FOR QUALITY ASSURANCE PROJECT PLAN (QAPP)
2021-03-05	99	Miscellaneous		DIRECTION TO CONTINUE SAMPLING 36 PFAS
2021-01-26	195	Semi-Annual/PECFA Cost Reporting (NR700) Requirement Met		Period: 7/1/2020 - 12/31/2020

You are free to use this process or one of your own. Please document how you plan to address the drilling in an addendum email prior to beginning the field work. The DNR will issue the final approval letter for the SIWP once the addendum is received.

Also as we discussed, I will be reaching out the City of Marinette to discuss the property access issues with respect to the Ogden Street ROW and the property to the south.

If you have any questions, please feel free to reach out.

Thanks,
Dave

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
