**Subject:** RE: Former Neighborhood Cleaners-Appleton

Hello Brian,

This email acts as my acknowledgement of receipt/notice to proceed with the Site Work Plan for the **BRRTS: 02-45-585245 Neighborhood Cleaners (Former)** case received by the DNR on 08/21/2020. All actions must comply with the ch. NR 700 rule series, Wis. Adm. Code, and all other applicable state statutes and administrative rules. This email does not represent a DNR approval. If you would like a formal decision on any of the actions listed in the SIWP, you would need to submit a Fee and Technical Assistance request. More information on this can be found in the following link: <https://dnr.wisconsin.gov/topic/Brownfields/Fees.html>

That said, after a quick review I noticed a few items that we had previously discussed via phone:

1. PFAS will need to be scoped and addressed in future documentation, prior to coming in for closure.
2. We had discussed placing a Monitoring Well near TW-6 & TW-7, however I do not see a proposed well in this location on Figure 4.
3. We also discussed placing a piezometer to help define vertical extent of contamination, but did not see a proposed location in the work plan.

In addition, please keep in mind that depending upon the results of the sampling, it may be necessary to expand the sampling to define the degree and extend of the contamination.

If you have any questions, please feel free to contact me.

Thanks,

**We are committed to service excellence.**

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

Jeremy, I uploaded the SI Work Plan for the Former Neighborhood Cleaners site this morning. I will have a hard copy sent out in the mail today. Please let me know if you have any concerns with the work plan. As we discussed, we will likely be performing vapor sampling within the three manholes in the source area but this may not happen to will have data from the new sampling points. Please let me know if you have any questions.
