Subject: Notice of New Project Manager
Neighborhood Cleaners (Former) – 611 W Northland Ave, Appleton, WI
BRRTS Activity #: 02-45-585245

Dear Ms. Lewis,

The Wisconsin Department of Natural Resources (DNR) is informing you that the project manager for the Neighborhood Cleaners (Former) contamination case (the Site) has changed. Effective immediately, all correspondence, reports, and submittals concerning your Site should be sent to the following address:

Wisconsin Department of Natural Resources
Attn: Jeremy Mitchell
2984 Shawano Ave
Green Bay, WI 54313-6727

On August 21, 2020, the DNR received a Site Investigation Work Plan (SIWP) from Brian Youngwirth of General Engineering Company (GEC) and a Notice to Proceed was provided via email to you and your consultant on August 24, 2020. Please continue with your site investigation and submit a status update report once work is complete. A Site Investigation Report will be required when degree and extent is defined. In addition, please keep in mind that depending upon the results of the sampling, it may be necessary to expand the sampling to define the degree and extend of the contamination.

Also, you may have received a letter regarding emerging contaminants, specifically PFAS. Please be advised that PFAS should be scoped and addressed in future documentation submitted to the DNR.

If you have any questions or concerns, please feel free to contact me to discuss further. My direct line is (920) 366-6830 or feel free to email me at jeremy.mitchell@wisconsin.gov. Thank you for your diligence in this matter.

Sincerely,

Jeremy Mitchell
