Subject: RE: Site Investigation Workplan Discussion

Great!

To confirm from our previous discussion, the objective is to complete the SI sampling this winter/spring (minus perhaps GW monitoring for a year, if necessary). Portions of the property will then be transferred to private developers who will then develop the RAP/Soil Mgmt. Plans for their particular parcel. Those plans will then give you the trigger for opening new BRRTS cases to carry those projects to closure.

In parallel, the City will develop RAP/Soil Management Plans for the ROWs and will retain the existing BRRTS case number going forward.

Harris Byers, Ph.D.

Sr. Brownfields Project Manager
