Subject: Response to SIWP for the GP Broadway Mill Expansion - PFAS site (BRRTS # 02-05-586429)

Melissa,

DNR has reviewed the site investigation work plan (SIWP) received on January 26, 2022, for additional work proposed at the above referenced site. The proposed investigative work involves the installation of additional groundwater monitoring wells and soil and groundwater sampling for PFAS to further define degree and extent of contamination. Depending on the analytical results, additional investigative work may be needed to adequately define degree and extent of contamination. A summary report is expected to be submitted within 60 days of receipt of the analytical results.

This email serves as your notice to proceed with the proposed work.

Thanks,

-Keld
