Subject: RE: 2024 PFAS Site Investigation Work Plan (BRRTS #: 02-05-586429)

Hi Mike,

DNR has reviewed the workplan which describes the proposed installation of an additional monitoring well west of the previously identified PFAS contamination in groundwater. DNR concurs with the proposed well installation and this email serves as your notice to proceed.

It may be beneficial to include any additional existing on-site monitoring wells in the PFAS monitoring schedule. In particular, any wells installed as part of the Cinco Mill development may help provide additional delineation of the groundwater plume in the northly direction.

Depending on the future results, additional investigative work may be needed to fully define degree and extent of contamination.

Let me know if you would like to discuss anything in more detail.

Have a great weekend.

-Keld

Subject: 2024 PFAS Site Investigation Work Plan (BRRTS #: 02-05-586429)

**CAUTION: This email originated from outside the organization.
Do not click links or open attachments unless you recognize the sender and know the content is safe.**

Keld,

Please see the attached PFAS Site Investigation Work Plan (SIWP) for the Georgia-Pacific Broadway LLC (GP) facility located at 1919 South Broadway, Green Bay WI. This is the fourth SIWP for the PFAS investigation (BRRTS #:

02-05-586429). The 2024 SIWP includes the completion of up to two soil borings and the installation of up to one monitoring well to further delineate PFAS impacts southwest of the Broadway facility and one round of groundwater PFAS sampling following drilling activities. GP is requesting WDNR concurrence that this SIWP is acceptable. Tetra Tech and GP have identified resources to complete the 2024 SIWP scope the week of August 12, 2024, however, in accordance with NR 716.09(3)(b), GP will not execute the 2024 SIWP scope until the work plan has been approved by the WDNR or 30 days after its receipt by the department.

Please let me know if there are any questions and if a paper copy of the SIWP is required.

Thank you,
Mike
