

Spill Notification for WRR Environmental Services Co., Inc.

EPA ID# WID990829475

FID# 618026530

Spill ID# 16187

ID 20210216WC18-1 – Flammable Hazardous Waste

Per Condition 86 of WRR Environmental Services' current Feasibility and Plan of Operations Report (FPOR), WRR is making the following spill report to the Department's designated Hazardous Waste Inspector assigned to WRR, to the Department's designated Hazardous Waste plan review staff person assigned to WRR and to the Department's designated Spills Coordinator.

This notification, required by Condition 86 of the WRR FPOR and NR 706.05(1), contains the following information to the extent practicable or applicable:

1. Name, address, and telephone number of the person reporting the discharge.

Becky Anderson – Director of Compliance
WRR Environmental Services Co., Inc.
5200 Ryder Road
Eau Claire WI 54701

2. Name, address, and telephone number of the discharger, or owner and operator of the UST system and any other potentially responsible persons.

WRR Environmental Services Co., Inc.
5200 Ryder Road
Eau Claire WI 54701

3. Date, time, and duration of the discharge.

February 16, 2021 at 2:35 pm. Time to clean up the release was 3.0 hours.

Location of the discharge including street address, county, town, city or village

WRR Environmental Services Co., Inc.
5200 Ryder Road
Eau Claire WI 54701

Town of Washington

4. Identity, physical state, and quantity of the material discharged.

~8 gallons of a flammable hazardous waste, residue from WRR's solvent recycling activities.

5. Physical, chemical, hazardous, and toxicological characteristics of the substance.

The material is a waste mixture of common solvents, paint and ink with a flashpoint <70F.

6. Cause of the discharge.

The operator did not monitor the level in a tanker as it was being filled.

7. Immediate actions being taken and the name of the contractor or other person performing the action.

The pumping operation was stopped.

Spill material was contained on a concrete pad. The material was cleaned up with floordri and pads by 2 workers in 3 hours. The floordri and pads was placed in open top drums for disposal.

All cleanup activities were conducted by WRR personnel.

8. Source, speed of movement, and destination or probable destination of the discharged hazardous substance.

The release was contained to the outdoor concrete pad where the tanker was parked. No material impacted soil or contaminated the WRR stormwater collection area.

Included with this report is a facility map with the release location marked with a red arrow.

9. Actual or potential impacts to human health or the environment, including actual or potential impacts to drinking water supplies.

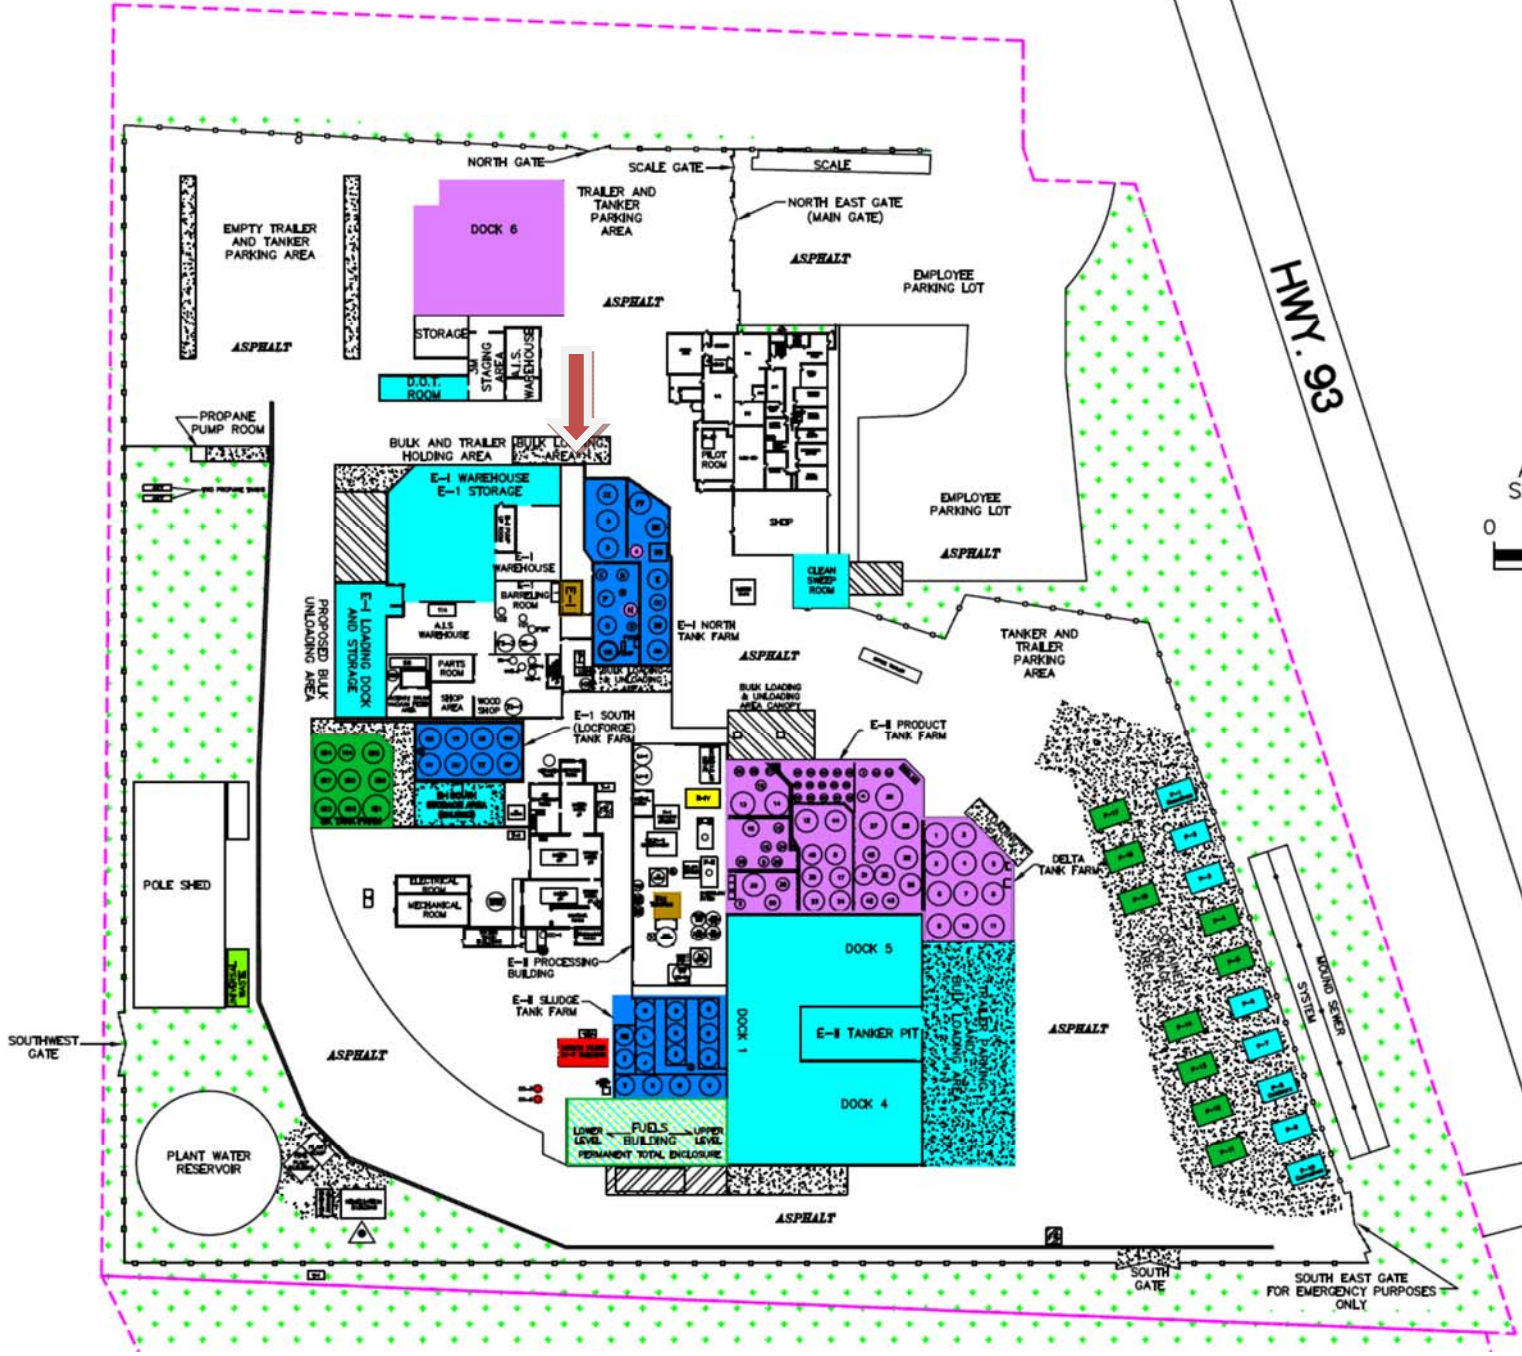

No drinking water supplies were impacted by the spill. Total air emissions from the spill were calculated to be ~1.4 lbs based on the weather conditions at the time of the release and cleanup activities.

10. Weather conditions existing at the scene, including presence of precipitation and wind direction and velocity.

The release occurred outside a building. The temperature at the time of the spill was 14F with a 5 mph wind. There was no precipitation.

11. Other agencies on-scene during the discharge incident.

No agencies were on-site during the discharge or clean-up.
