## Job Narrative 320-113244-1

### Revision

The report being provided is a revision of the original report sent on 7/19/2024. The report (revision 1) is being revised to report only the original analysis for Perfluorohexanoic acid (PFHxA) for the following samples: MW-06-202406 (320-113244-1), MW-07-202406 (320-113244-2), MW-08-202406 (320-113244-3), DUP-09-202406 (320-113244-4), EB-09-202406 (320-113244-5), FB-01-202406 (320-113244-6), TB-01-202406 (320-113244-7), MW-03-202406 (320-113244-8), PZ-01-202406 (320-113244-9), MW-05-202406 (320-113244-10) and MW-02-202406 (320-113244-11). Due to a sample processing error that affected the QC for Perfluorohexanoic acid (PFHxA) in preparation batch 320-774110 and analytical batch 320-775469 these samples were re-extracted; however, the client has requested that only the original PFHxA data be reported.

### Receipt

The samples were received on 6/21/2024 9:30 AM. Unless otherwise noted below, the samples arrived in good condition, and where required, properly preserved and on ice. The temperature of the cooler at receipt was 3.1° C.

### LCMS

Method 537 (modified): The concentration of one or more analytes associated with the following samples exceeded the instrument calibration range: MW-01-202406 (320-113244-12) and MW-04-202406 (320-113244-13). These analytes have been qualified; however, the peaks did not saturate the instrument detector. The samples were diluted within calibration range, and both sets of data were reported.

Method 537 (modified): The "I" qualifier means the transition mass ratio for the indicated analyte was outside the established ratio limits. The qualitative identification of the analyte has some degree of uncertainty. However, analyst judgment was used to positively identify the analyte: MW-05-202406 (320-113244-10).

Method 537 (modified): Results for sample MW-02-202406 (320-113244-11) were reported from the analysis of a diluted extract due to high concentration of the target analyte in the analysis of the undiluted extract. The dilution factor was applied to the labeled internal standard area counts and these area counts were within acceptance limits.

Method 537 (modified): Results for samples MW-01-202406 (320-113244-12) and MW-04-202406 (320-113244-13) were reported from the analysis of a diluted extract due to high concentration of the target analyte in the analysis of the undiluted extract. The dilution factor was applied to the labeled internal standard area counts and these area counts were within acceptance limits.

Method 537 (modified): The low level laboratory control sample (LLCS) and the laboratory control sample duplicate (LCSD) for preparation batch 320-774110 and analytical batch 320-775469 recovered outside control limits for the following analytes: Perfluorohexanoic acid (PFHxA) due to a sampling processing error. The associated samples were re-prepared with LLCS and LCSD recovery within control limits, however there was method blank laboratory artifact present in the re-extraction batch. Per client request, only the original run was reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

### Organic Prep

Method 3535: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 320-774110.

Method 3535: The following sample in preparation batch 320-774110 was light yellow in color prior to extraction: PZ-01-202406 (320-113244-9).

Method 3535: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 320-776203.

Method 3535: The following samples in preparation batch 320-776203 were observed to have floating particulates present in the sample bottle: PZ-01-202406 (320-113244-9) and MW-05-202406 (320-113244-10).

Method 3535: Insufficient sample volume was available to perform a matrix spike/matrix spike duplicate (MS/MSD) associated with preparation batch 320-776366.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.
