RE: Phase I Environmental Site Assessment
Commercial Property
1021 South Broadway Street
Menomonie, Wisconsin 5475
AET Project No. P-0001366

Dear Ms. Kuehn:

American Engineering Testing, Inc. has completed Phase I Environmental Site Assessment services at the commercial property located at 1021 South Broadway Street, Menomonie, Wisconsin. This Phase I Environmental Site Assessment was done in accordance with our proposal no. P-0001366.

We appreciate the opportunity to serve you on this project. If you have any questions regarding the information presented in this Phase I Environmental Site Assessment report, or if we may be of additional service, please contact me.

Sincerely,
American Engineering Testing, Inc.

A handwritten signature in black ink that reads 'Susan Mickus'. The signature is fluid and cursive, with the first name 'Susan' being more prominent than the last name 'Mickus'.

Susan Mickus, PG
Senior Geologist

**PHASE I
ENVIRONMENTAL SITE ASSESSMENT
COMMERCIAL PROPERTY
1021 SOUTH BROADWAY STREET
MENOMONIE, WISCONSIN**

AET PROJECT NO. P-0001366

EXECUTIVE SUMMARY

In accordance with proposal no. P-0001366, American Engineering Testing, Inc. performed a Phase I Environmental Site Assessment of the commercial property located at 1021 South Broadway Street, Menomonie, Dunn County, Wisconsin (the Site). Services were performed in accordance with the scope and limitations of the Standards and Practices of the United States Environmental Protection Agency's All Appropriate Inquiries rule (40 CFR Part 312, December 30, 2013) and the American Society for Testing Materials Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process – ASTM E1527-13 for the exclusive use of Village Bank.

Review of the historical data indicates the Site and surrounding properties have been residential and commercially developed since at least the late 1930s. The Site was residential prior to commercial development as a laundry facility in the 1960s. The current building dates to the early 1960s.

This assessment has revealed no evidence of recognized environmental conditions in connection with the Site except as follows:

- The past use as a dry cleaner and generation of hazardous solvent wastes.

This assessment has revealed evidence of recognized environmental conditions in connection with the Site. In accordance with the United States Small Business Association (SBA) SOP 50 10 6, effective date October 1, 2020, the SBA indicates if the Environmental Professional (EP) concludes that additional investigation is warranted, the Certified Development Company (CDC) must submit the results of the Environmental Investigation to the SBA with recommendations and seek SBA's concurrence. Based on the past presence of a dry cleaner, it is AET's opinion that additional investigation of soil, groundwater and soil vapor is warranted at this Site.

This assessment has revealed no evidence of controlled recognized environmental conditions in connection with the Site.

No significant data gaps were encountered with regard to evaluating the Site for this Phase I Environmental Site Assessment.

1.0 INTRODUCTION

1.1 Purpose and Methodology

The purpose of this Phase I Environmental Site Assessment (ESA) is to identify, to the extent reasonable pursuant to the methodology prescribed below, recognized environmental conditions (RECs) in connection with the commercial property located at 1021 South Broadway Street, Menomonie, Wisconsin (hereafter referred to as the Site). American Engineering Testing, Inc. (AET) understands this Phase I ESA is being performed as part of the due diligence process for Village Bank to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) liability. AET further understands that Village Bank and the purchaser are considering financing the purchase and development of the property with the assistance of a loan from the U.S. Small Business Administration (SBA).

This Phase I ESA was conducted in accordance with the United States Environmental Protection Agency's (USEPA's) All Appropriate Inquiries (AAI) rule (40 CFR Part 312), December 30, 2013 and the American Society for Testing and Materials (ASTM) Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process – ASTM E 1527-13 and SBA SOP 50 10 6 Guidance.

A list of the acronyms and abbreviations and definitions of common terms used in this report is included as Appendix A.

1.2 Scope of Services

The scope of this Phase I ESA was defined in AET's proposal no. P-0001366 which Ms. Ilia Kuehn authorized on April 9, 2021. The scope of services included the following items:

- Review reasonably ascertainable and readily available records and historical use information to help identify RECs in connection with the Site.
- Perform a reconnaissance of the Site to obtain information indicating the likelihood of identifying RECs in connection with the Site.
- Interview owners, occupants, state, and/or local government officials to obtain information indicating RECs in connection with the Site.
- Interpret information collected in conjunction with performing the records review, site reconnaissance, interviews, and present the results in a written report.

1.3 Limitations and Exceptions of Assessment

Although the USEPA AAI rule and the ASTM standard have been followed, the scope of services is not exhaustive and there may be certain environmental conditions AET cannot ascertain and will not be AET's responsibility. Localized contamination related to disposal of contaminants not reported to appropriate government agencies, not made known to AET or not reasonably observable at the time of AET's Site visit may be on Site.

The services performed by AET have been conducted in a manner consistent with the level of skill and care ordinarily exercised by other members of the profession currently practicing in this area. No environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this Phase I ESA is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs in connection with the Site.

The findings, opinions, conclusions, and recommendations presented in this report are based on AET's understanding of the client's intended use of the Site. If the intended use of the Site changes, or if conditions differing from AET's original findings are found, AET should be notified to review these changes and to determine the impact, if any, of the changes on the presented findings, opinions, conclusions, and recommendations.

1.4 Reliance

This Phase I ESA has been prepared for the exclusive use of Village Bank for specific application to the Site.

In addition, and on the basis of the same terms, conditions, and limitations presented in the previously referenced proposal, AET states that SBA can rely, to the extent their requirements are coincidental with the needs of Village Bank, on this Phase I ESA report.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

Figure 1 shows the location of the Site and Figure 2 shows the configuration of the Site. The Site comprises one parcel located in Section 26, Township 28 N, Range 13 W, Dunn County, Wisconsin and is identified as Parcel Identification Number (PID) 1725122813263300014. According to the Dunn County Property website, the address is listed as 1021 South Broadway Street. Parcel information is included in Appendix B.

2.2 Current Site Use

The Site comprises less than one acre located in a commercially developed area of Menomonie. The Site is currently occupied by the Outback Wash Shack laundromat.

2.3 Current Use of Adjoining Properties

The Site is adjoined as noted below.

North:	University of Wisconsin Stout paved parking lot.
East:	South Broadway Street followed by University of Wisconsin Stout tennis courts.
South:	State Highway 29 followed by a commercial business with paved parking lot.
West:	University of Wisconsin Stout paved parking lot.

3.0 USER PROVIDED INFORMATION

As indicated in AET's proposal to Village Bank, the User will share with AET all available and relevant information pertaining to the Site. Village Bank provided a copy of their Environmental Risk Assessment Questionnaire which is included in Appendix B.

AET also provided Village Bank with a User Questionnaire and requested the completed Questionnaire be returned to AET. The questionnaire, attached in Appendix B, was completed by Village Bank representative Timothy Walker, and he responded "None" or "No" to questions regarding knowledge of environmental liens; activity and use limitations; specialized knowledge or experience related to the Site or nearby properties; specific chemicals that are present or that once were present; spills or other chemical releases that have taken place at the Site; environmental cleanups that have taken place at the Site; or obvious indicators that point to the presence or likely presence of releases at the Site. Mr. Walker was aware that the Site is currently a laundromat and referred to the Village Bank Environmental Risk Assessment Questionnaire completed by the property owner Wayne Moser. Mr. Walker's response also indicates the purchase price being paid for the Site reasonably reflects the fair market value of the Site if it were not contaminated.

In the Village Bank Environmental Risk Assessment Questionnaire, Mr. Moser responded "No" to questions regarding the presence of hazardous waste, underground storage tanks, septic systems, or wells at the Site. Mr. Moser has owned the Site for more than 30 years. In a separate email, Mr. Moser explained that the Site had never been used as a dry cleaner. They had kept the name Aussie's Laundry and Dry Cleaner but only used the Site as a drop-off location. Dropped off clothing was taken to Aussie's Laundry and Dry Cleaner at 1400 North Broadway property for cleaning. Cleaned clothing was returned to the Site for customer pick-up. A copy of the email statement is included in Appendix B.

4.0 RECORDS REVIEW

4.1 Physical Setting

Spills, leaks, or disposal of hazardous substances or petroleum products at a Site will generally migrate on the surface or in the subsurface via soil, groundwater, and/or vapor. There is also a potential for surface or subsurface contamination in connection with a release to migrate to or from adjoining properties toward a Site depending on subsurface conditions.

Our review of the 1982 Geologic Atlas by the University of Wisconsin Geological and Natural History Survey (WGNHS) and the 1989 United States Department of Agriculture (USDA) Soil Conservation Service (SCS) Soil Survey of Dunn County, Wisconsin revealed the following:

- The uppermost bedrock underlying the Site is Cambrian age sandstone at depths of 20 to 50 feet (Mudrey, Brown and Greenburg 1982).
- Surficial soils in the vicinity of the Site are well-drained deposits of alluvium comprised of sandy loam sediment underlain by loamy material and sand (Wing, G.N., 1975).
- The regional surficial groundwater gradient in the vicinity of the Site is likely west southwest toward the Red Cedar River. Groundwater is estimated to be at a depth of 15 to 20 feet bgs.

It is important to note that our agreed upon scope of services did not include performing soil borings or rock coring at the Site. Soil borings/rock coring would need to be performed to judge the engineering properties (strength, compressibility, etc.) of soils and rock that underlie the Site and to confirm bedrock formations and depths to the top of bedrock. Also, installation and monitoring of groundwater monitoring wells or piezometers would be required to document current groundwater elevations and localized flow patterns at the Site.

The Wisconsin Geological Survey (WGS) maintains a limited database of water well records. AET reviewed this database for logs of wells located at and near the Site. This search did not find any wells registered to this Site.

4.2 Database Search

Historical Information Gatherers (HIG) provided Federal, State, Local, and Tribal record information within ASTM-specified minimum search distances of the Site through their contracted vendor, Environmental Risk Information Services (ERIS). A copy of their report, dated April 19, 2021, Project #2049968 is included in Appendix C. The results of the database searches are discussed below.

4.2.1 Standard Environmental Record Sources for the Site

The Site was identified in the following databases:

- Wisconsin Department of Natural Resources (WDNR's) Solid and Hazardous Waste Information Management System (SHWIMS), Facility Registry System (FINDS/FRS), and Resource Conservation and Recovery Act (RCRA) – Very Small Quantity Hazardous Waste Generator (VSQG):** Menomonie Quick Wash at 1021 South Broadway Street is listed by the WDNR SHWIMS, FINDS/FRS, and RCRA VSQG databases based on its identification as a site subject to environmental regulations or of environmental interest, a hazardous waste generator, and for the regulated chemicals listed in products they use. RCRA Generators are required to have plans for proper handling, storage and disposal of hazardous materials. The information provided by ERIS indicates that as of January 2021, there are no Compliance Monitoring or Enforcement (violation) records associated with this facility. Hazardous wastes generated at this VSQG site include numerous spent halogenated solvents including tetrachloroethylene (PCE) and trichloroethylene (TCE). The information provided by ERIS indicates that as of January 2021, there are no Compliance Monitoring or Enforcement (violation) records associated with this facility.

AET considers the use, generation, and storage of hazardous waste on the Site to be a suspect REC in connection with the Site.

4.2.2 Standard Environmental Record Sources for Surrounding Properties

The following table identifies ASTM specified databases that were searched, distances searched, and the number of sites identified within the searched distances.

Regulatory Database	Search Distance (miles)	Federal	State/Tribal Equivalent
NPL	1.0	0	0
NPL (Delisted)	0.5	0	NA
CERCLIS	0.5	0	0
CERCLIS-NFRAP	0.5	0	NA
RCRA CORRACTS	1.0	0	NA
RCRA-TSD	0.5	0	NA
RCRA Generators	Adjoining Properties	0	NA
Landfill/Solid Waste Disposal Sites	0.5	NA	0
Registered Leaking Storage Tanks	0.5	NA	11
Registered Storage Tanks	Adjoining Properties	NA	1

Regulatory Database	Search Distance (miles)	Federal	State/Tribal Equivalent
Voluntary Cleanup Sites	0.5	NA	0
Brownfields Sites	0.5	NA	4

NA: Not applicable – this database is not included in the ASTM standard.

Because the properties identified are located cross or down groundwater gradient and/or sufficiently distant from the Site, they are not likely to have an impact on the Site, except the following:

- **Cenex C Store/Vista U Pump #12** at 1103 South Broadway Street located south of the Site is identified within the WDNR’s Bureau for Remediation and Redevelopment Tracking System (BRRTS), Closed Remediation Site (CRS), Leaking Underground Storage Tanks (LUST), and Registered Underground Storage Tanks (UST) databases based on its identification as a site subject to environmental regulations or of environmental interest, for the regulated chemicals listed in products they use, being a former leak and remediation site, and having a registered UST.

The site is listed as having seven registered USTs. One, single-walled, 8,000-gallon and two, single-walled, 10,000-gallon, unleaded gasoline USTs were closed on May 17, 2007. Three, fiberglass, unleaded gasoline USTs, 4,000-gallon, 6,000-gallon, and 12,000-gallon capacity, were closed on October 6, 2015. One 5,000-gallon fiberglass diesel fuel UST was also closed in October 2015.

AET reviewed information available on the BRRTS database, which is summarized in Section 4.3.5 below.

4.2.3 Unplottable Summary and Non-ASTM Specified Databases

ERIS also included a list of sites that could not be mapped due to poor or inadequate address information (Orphan Summary or Unlocatable Properties) and various non-ASTM specified databases. The Unplottable Summary and non-ASTM specified databases and distances searched are listed in the ERIS report.

Based on our review of the Orphan Summary or Unlocatable Properties listings and the additional non-ASTM specified database search results, we did not identify any sites that we consider suspect RECs in connection with the Site.

4.3 Historical Use Information

Historical records were reviewed because past land use is an indication of whether hazardous substances or petroleum products have been used at the Site and adjoining properties and potentially introduced to the subsurface. The historical records were searched for and reviewed, if available, for types of businesses regulated for hazardous substances or petroleum products, evidence of spills, leaks, or disposal, and potential routes of entry to the subsurface.

In evaluating historical land use, the hazardous substances or petroleum products are generally inferred from what was typical of the tenant on the Site. The tenants are determined from User provided information, insurance maps, city directories, wells logs, building and fire inspection records, and interviews or they are inferred from aerial photographs, topographic maps, and plat maps. The routes of entry may be determined from User provided information, fire insurance maps, aerial photographs, and the Site reconnaissance. Releases including the import of fill may be determined from User provided information, aerial photographs, topographic maps, the Site reconnaissance, boring logs, and regulatory data.

The historical records discussed below were found in the User provided information and/or were provided to AET by Historical Information Gatherers, Inc. (HIG) and are included in Appendix D.

4.3.1 Topographic Maps

AET reviewed United States Geological Survey (USGS) 7.5- and 15-Minute Series Topographic Maps. These are limited in urban areas because improvements are not always shown. Topographic maps were reviewed for evidence of land use and changes in topography suggesting the import of fill. The review comprised the Site and adjoining properties. Our review of the topographic maps is summarized in the table below.

Summary of Topographic Maps Review		
Year	Direction	Observations
1940, 1942	Site	The Site and surrounding properties appear to be in an urban area of Menomonie, Wisconsin. The Site elevation ranges from 840 feet to 860 feet above mean sea level (amsl). A small size building icon is present.
	North	A small size building icon is present.
	East	A roadway with a small size building icon beyond.
	South	A roadway with a small size building icon beyond.
	West	A small size building icon is present.
1972, 1981	Site	Developed section within the City of Menomonie; however, individual structures are not shown.

Summary of Topographic Maps Review		
Year	Direction	Observations
1972, 1981	North	Developed section within the City of Menomonie; however, individual structures are not shown.
	East	Developed section within the City of Menomonie; however, individual structures are not shown. The roadway is labeled Broadway.
	South	Developed section within the City of Menomonie; however, individual structures are not shown. The roadway is labeled State Highway 29.
	West	Developed section within the City of Menomonie; however, individual structures are not shown.
2010, 2013, 2015	Site	Similar infrastructure to previous maps with no improvements or structures visible.
	North	Similar infrastructure to previous maps with no improvements or structures visible.
	East	Similar infrastructure to previous maps with no improvements or structures visible. The roadway is labeled State Highway 25/29.
	South	Similar infrastructure to previous maps with no improvements or structures visible.
	West	Similar infrastructure to previous maps with no improvements or structures visible.

4.3.2 Aerial Photographs

AET reviewed aerial photographs that include the Site area. These are limited by the quality and resolution of the photograph. The aerial photographs were reviewed for indications of land use; routes of entry such as unpaved areas, and indications of spills, leaks, or disposal such as stains, lack of vegetation, or debris. The review comprised the Site and adjoining properties. Our review of the aerial photographs is summarized in the table below.

Summary of Aerial Photographs Review		
Year	Direction	Observations
1938, 1945, 1951, 1958	Site	Forested residential property.
	North	Forested residential property.
	East	A roadway with residential property beyond. By 1958 the building east of the roadway is gone.
	South	A roadway with residential property beyond. By 1958 the roadway has been widened.
	West	Residential property.

Summary of Aerial Photographs Review		
Year	Direction	Observations
1965, 1973, 1980, 1986, 1988	Site	A new commercial size building is present.
	North	Similar to the previous aerial photographs. By 1988 the building has been removed.
	East	Similar to the previous aerial photographs. By 1973 tennis courts are present east of the roadway.
	South	Similar to the previous aerial photographs. By 1973 a new commercial size building is present south of the roadway.
	West	Similar to the previous aerial photographs.
1992, 1995, 2005, 2008	Site	Similar to the previous aerial photographs.
	North	Paved parking lot.
	East	Similar to the previous aerial photographs.
	South	Similar to the previous aerial photographs.
2010, 2013, 2015, 2017, 2018	Site	Similar to the previous aerial photographs.
	North	Similar to the previous aerial photographs.
	East	Similar to the previous aerial photographs.
	South	Similar to the previous aerial photographs. By 2017 the building south of the roadway has been removed.
	West	Similar to the previous aerial photographs.

4.3.3 Fire Insurance Maps

AET reviewed fire insurance maps for the Site and adjoining properties. These are limited by the quality and availability of maps. Maps of occupants and fire hazards, created by insurance companies, were reviewed for land use and the specific use and storage of hazardous substances or petroleum products such as fuels and solvents. The maps were also reviewed for confirmation of street addresses associated with the Site. AET reviewed fire insurance maps for the Site area; below is a summary of each year.

Summary of Fire Insurance Maps Review		
Year	Direction	Observations
1894	Site	No coverage.
	North	No coverage.
	South	No coverage.
	East	No coverage.
	West	No coverage.
1902	Site	No coverage.
	North	No coverage.

Summary of Fire Insurance Maps Review		
Year	Direction	Observations
1902	South	No coverage.
	East	No coverage.
	West	No coverage.
1910	Site	A residential dwelling with a detached garage on the west side.
	North	A dwelling.
	South	West 11 th Avenue with a dwelling beyond.
	East	Broadway Street with a dwelling beyond.
	West	A dwelling.
1925	Site	Similar to previous map.
	North	Similar to previous map.
	South	Similar to previous map.
	East	Similar to previous map.
	West	Similar to previous map.
1941	Site	Similar to previous map.
	North	Similar to previous map.
	South	Similar to previous map.
	East	Similar to previous map.
	West	Similar to previous map.

4.3.4 City Directories

City directories were provided by HIG, limited by errors in cross street location and thoroughness of validation. Directories (approximately every 5 years), indexed by address, were reviewed for tenant identification/land use at the Site and adjoining properties. Based on the fire insurance maps, street map, and an overview of the directories, addresses reviewed for the Site and adjoining properties were those indicated in the table below. The Site address and adjoining properties were registered in the directories as follows.

Summary of City Directory Listings for the Site & Adjoining Addresses Review			
Year	Site 1021 S. Broadway St	Adjoining South 1103 S. Broadway St.	Adjoining North 1015 S. Broadway St.
1967	No Listing	No Listing	A Leavens
1970	Menomonie Quick Wash	R Vosz	A Leavens
1975	Menomonie Quick Wash	No Listing	A Leavens T Lehtinen M Schilling

Summary of City Directory Listings for the Site & Adjoining Addresses Review			
Year	Site 1021 S. Broadway St	Adjoining South 1103 S. Broadway St.	Adjoining North 1015 S. Broadway St.
1982	Commercial Laundry Systems Menomonie Quick Wash	Self Service Oil Company	M Schilling
1985	Commercial Laundry Systems	Self Service Oil Company	T Curtin M Housic M Phillips D Bloomquist M Ellis
1994	Aussie's Dry Clean Press	U-Pump gas station	No Listing
1998	Menomonie Quick Wash	U-Pump gas station K Risier	No Listing
2003	Aussie's Dry Clean Press	Menomonie Farmers Coop gas station	No Listing
2008	Outback Wash Shack	Menomonie Farmers Coop gas station Dish 1 Network Sales Mountain Mudd Espresso	No Listing
2013	No Listing	Cenex gas station Southside Subs	No Listing
2018	No Listing	No Listing	No Listing

The following are considered suspect RECs in connection with the Site:

- The use of the Site as a laundry facility and dry cleaner, and
- The use of the adjoining property as a gas station.

4.3.5 Historical Plat Maps/Atlases/WDNR Database/National Pipeline Mapping System

Plat Maps: AET reviewed historical plat maps/atlasses for the Site area provided by HIG. These are limited when urban areas are not detailed. Plat maps/atlasses were reviewed for land use. The review comprised the Site and adjoining properties. One historic map, dated 1949 was available for the Site. No specific land uses could be determined from the information on the map.

National Pipeline Mapping System: AET's review found that no pipelines were identified on the Site or adjoining properties.

Wisconsin Remediation and Redevelopment Database (WRRD): AET reviewed the WRRD for active/closed remedial action sites at the Site and adjoining properties. One remedial action was identified on the adjacent south property on the WRRD database. Cenex C Store/Vista U Pump #12 at 1103 South Broadway Street located south of the Site is identified as a LUST (BRRTS No. 03-17-183724). In March 1998, petroleum contamination was reported from the unleaded gasoline UST system. The site investigation included seven soil borings and six groundwater monitoring wells. Soil contamination was minimal and three years of groundwater monitoring determined groundwater contamination did not extend off-site and petroleum contaminant concentrations were decreasing. Based on the limited amount of soil and groundwater contamination and lack of off-site contamination, the WDCOM closed the site on November 26, 2001 with a groundwater use restriction due to the presence of residual soil and groundwater contamination. Based on the above information, complete closure of the service station in 2017, and the lack of additional remediation following the station closure at the adjoining property, AET does not consider the presence of a closed petroleum release and gas station a suspect REC in connection with the Site.

4.3.6 Additional Record Sources

AET reviewed the following additional documents provided by HIG regarding the Site. These documents are provided in Appendix D and include the following:

- Dunn County Tax Records
 - The Site: 1021 South Broadway Street PID #172512228132633000014;
 - The Site is less than one acre and the building built in 1961;
 - Current owner is Wayne Moser; and
 - Property type is G2 commercial.

4.3.7 Historical Information Summary

Review of the historical data indicates the Site and surrounding properties have been residential and commercially developed since at least the late 1930s. The Site was residential prior to commercial development as a laundry facility in the 1960s. The current building dates to the early 1960s.

AET considers the historical use of the Site as a laundry and dry-cleaning facility a suspect REC in connection with the Site.

5.0 SITE RECONNAISSANCE

The Site was visited by Michael K. Neal of AET on April 23, 2021. Photographs taken at the time of AET’s visit are included in Appendix E. Mr. Neal was accompanied by Mr. Wayne Moser, the property owner.

5.1 Site Description

Information contained in this section is based on a visual reconnaissance conducted while walking through the Site and the accessible interior areas of structures, if any, and interviewing Mr. Moser during the Site reconnaissance.

Site Description	
Feature	Description
Structures	A single approximately 2,000-square foot slab on grade commercial building occupies the Site. The eastern portion is the self-serve laundromat area, restroom, and storage closet. The western portion is an office area, restroom, and storage closet.
Drinking Water/ Sanitary Sewer	The Site building is connected to the municipal drinking water supply and the municipal sanitary sewer system.
Stormwater Runoff	Surface water at the Site drains to topographically low areas and is directed to the municipal stormwater system at and adjacent to the Site.
Roads	Access to the Site is currently from 11 th Avenue West along the south Site boundary.
Other	Parking areas are located on the south and west sides of the building. No other observations of environmental consideration were noted.

5.2 Site Observations

The following table summarizes Site observations and/or on-site interviews.

Site Observations	
Feature	Description
Containers	Quart and liter size containers of household and office cleaners were observed in the storage closet.
Storage Tanks	No storage tanks or evidence of storage tanks such as pipes or vents were observed.
Drums	No drums were observed.
Odors	No significant odors were observed during the site visit.
Liquids/Stains/Corrosion	No liquids, stains or corrosion was observed.
Stressed Vegetation	No stressed vegetation was observed. The Site is generally free of vegetation and covered with the building and pavement.

Site Observations	
Feature	Description
Drains/Waste Traps/Sumps	No waste traps or sumps were observed. A floor drain was observed in the storage room. The drain was observed to be in good condition with no significant staining. The floor drain is connected to the municipal sanitary sewer system.
PCB Containing Equipment	A pole-mounted transformer was observed on the southwest corner of the Site. These transformers are typically owned by the local power company who is responsible for any maintenance and cleanup. AET observed no evidence of leaks or releases associated with the transformer.
Pits, Ponds or Lagoons	No pits, ponds, or lagoons were observed on or adjoining the Site.
Solid Waste Disposal	No evidence of indiscriminate dumping or solid waste disposal was observed on the surface of the Site.
Physical Setting Analysis	The Site is located in a commercial area in the City of Menomonie.
Other Observations	Most buildings contain thermostats, switches, door closers (hydraulic), fluorescent lights, etc. Some of these components contain regulated materials. No other observations of environmental consideration were noted.

Based on the Site reconnaissance, no suspect RECs were observed in connection with the Site.

6.0 INTERVIEWS

AET representative Michael K. Neal interviewed various parties as part of this Phase I ESA. The results of the interviews are summarized below.

Wayne Moser – Owner

The owner, Mr. Moser, is not aware of any pending, threatened, or past litigation, administrative proceedings, or notices from any governmental entity relevant to hazardous substances or petroleum products in, on or from the Site. He stated the Site has always been a self-serve laundromat and drop-off facility only for dry clean clothing. Mr. Moser has owned the Site for more than 30 years. In a separate email Mr. Moser explained that the Site had never been used as a dry cleaner. They had kept the name Aussie’s Laundry and Dry Cleaner but only used the Site as a drop-off location. Dropped off clothing was taken to Aussie’s Laundry and Dry Cleaner at 1400 North Broadway property for cleaning. Cleaned clothing was returned to the Site for customer pick-up. Mr. Moser also stated that there was not any dry-cleaning equipment on the Site when he purchased the property in the early 1990s.

Kim Gerth, City of Menomonie Building Inspections

AET contacted the Menomonie Building Inspection Department for information concerning petroleum or hazardous material storage tanks, spills, leaks, or releases that may have occurred at the Site and whether there are any environmental type issues at or in the vicinity of the Site. Ms. Kim Gerth indicated they have no record of hazardous materials being stored, used or disposed of at the Site. Ms. Gerth confirmed the building was constructed in 1961 and that except for the commercial property being named “Aussie’s Dry Clean Press”, they have no records of dry cleaning being conducted on the Site.

Brady Bleskacek, Lieutenant - Menomonie Fire Department

AET contacted the Menomonie Fire Department by email for information concerning petroleum or hazardous material storage tanks, spills, leaks, or releases that may have occurred at the Site and whether there are any environmental type issues at or in the vicinity of the Site. Mr. Brady Bleskacek responded by email and indicated they have no record of hazardous materials being stored, used or disposed of at the Site. They have no records of releases of hazardous materials at the Site nor has the fire department responded to any calls at the Site.

7.0 FINDINGS AND OPINIONS

The following suspect RECs and AET’s opinions concerning the suspect RECs are provided below.

Historical information gathered about the Site from city directories indicates that a former dry cleaner facility operated at the Site. According to the property owner, he has operated the Site as a self-serve laundromat and drop-off facility only for dry clean clothing, and he has not operated dry cleaning or dry-cleaning equipment on the Site. Regulatory records, however, identify a former business at the Site, Menomonie Quick Wash, as a generator of hazardous wastes associated with dry cleaning. Based on the history of the Site and identification of the previous occupant as a hazardous waste generator, AET considers the historical listing as a dry cleaner to be a REC in connection with the Site.

8.0 DATA GAPS

No significant data gaps were encountered with regard to evaluating the Site for this Phase I Environmental Site Assessment.

9.0 CONCLUSIONS

AET has performed a Phase I ESA in conformance with the scope and limitations of the USEPA All Appropriate Inquiries rule (40 CFR Part 312) and ASTM Practice E 1527-13 of the Site. Any

exceptions to, or deletions from, this practice are described in Section 1.3 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the Site, except as follows:

- The past use as a dry cleaner and generation of hazardous solvent wastes.

This assessment has revealed no evidence of controlled recognized environmental conditions (CRECs) in connection with the Site.

10.0 RECOMMENDATIONS

This assessment has revealed evidence of recognized environmental conditions in connection with the Site. In accordance with the United States Small Business Association (SBA) SOP 50 10 6, effective date October 1, 2020, the SBA indicates if the Environmental Professional (EP) concludes that additional investigation is warranted, the Certified Development Company (CDC) must submit the results of the Environmental Investigation to the SBA with recommendations and seek SBA's concurrence. Based on the past presence of a dry cleaner, it is AET's opinion that additional investigation of soil, groundwater and soil vapor is warranted at this Site.

12.0 QUALIFICATIONS AND RESUMES

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Site. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

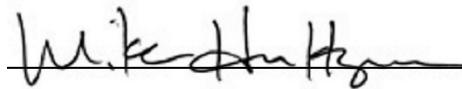

Refer to Appendix F for resumes of the AET personnel associated with this Phase I ESA.

DEFINITIONS

Controlled recognized environmental condition (CREC): a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

De minimus condition: a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate government agencies. Conditions determined to be de minimus conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

ACRONYMS AND ABBREVIATIONS

AET Standard List

Historical recognized environmental condition (HREC): a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).

Recognized environmental condition (REC): the presence or likely presence of hazardous substances or petroleum products in, on, or at a property: 1) due to release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.

User Questionnaire
Laundromat Property, 1021 S. Broadway, Menomonie, WI
AET Project No. P-0001366
Page 1 of 2

In order to qualify for one of the Landowner Liability protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"), the User must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The User should provide the following information to the environmental professional. Failure to conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete.

(1.) Environmental liens that are filed or recorded against the Site (40 CFR 312.25).

Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the Site under federal, tribal, state, or local law? If yes, please explain.

NONE FOUND

(2.) Activity and use limitations (AULs) that are in place on the Site or that have been filed or recorded against the Site (40 CFR 312.26(a)(1)(v) and (vi)).

Did a search of recorded title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the Site and/or have been filed or recorded against the Site under federal, tribal, state or local law? If yes, please explain.

NONE FOUND,

(3.) Specialized knowledge or experience of the person seeking to qualify for the LLP (40 CFR 312.28).

Do you have any specialized knowledge or experience related to the Site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business? If yes, please explain.

NO SPECIALIZED KNOWLEDGE,

(4.) Relationship of the purchase price to the fair market value of the Site if it were not contaminated (40 CFR 312.29).

Does the purchase price being paid for the Site reasonably reflect the fair market value of the Site? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Site?

BASED ON AVAILABLE INFO PRICE SEEMS FAIR. APPRAISAL ORDERED.

User Questionnaire
Laundromat Property, 1021 S. Broadway, Menomonie, WI
AET Project No. P-0001366
Page 2 of 2

(5.) Commonly known or reasonably ascertainable information about the Site (40 CFR 312.30).
 Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

(a.) Do you know the past uses of the Site? If yes, please explain.

YES, LAUNDROMAT,

(b.) Do you know of specific chemicals that are present or once were present at the Site? If yes, please explain.

NO, SEE EQ BY OWNER.

(c.) Do you know of spills or other chemical releases that have taken place at the Site? If yes, please explain.

NO, SEE EQ BY OWNER.

(d.) Do you know of any environmental cleanups that have taken place at the Site? If yes, please explain.

NO, SEE EQ BY OWNER

(6.) The degree of obviousness of the presence or likely presence of contamination at the Site, and the ability to detect the contamination by appropriate investigation (40 CFR 312.31).

Based on your knowledge and experience related to the Site are there any obvious indicators that point to the presence or likely presence of releases at the Site? If yes, please explain.

RISK ASSESSMENT QUESTIONNAIRES

ENVIRONMENTAL RISK ASSESSMENT QUESTIONNAIRE

(To be completed by the Borrower)

Name WAYNE MOSIER
 Street Address & Town N 7487 STATE RD 25
 Nature of Your Business LAUNDROMAT

1. In the course of your business; do you generate, store, or dispose of any hazardous wastes?
 Yes No

If yes, indicate type and quantity of hazardous materials

Are you a registered hazardous waste generator? Yes No

2. Do you own or lease your current premises? OWN

3. Are there, or were there ever, any underground or above ground storage tanks on the property? Yes No
(If yes, please complete Supplemental Questionnaire)

4. Is there a well located on the property? Yes No

If so, is the water used for human consumption? Yes No

Has any well been abandoned? Yes No

Loan Policy
Page 81 of 108

5. Is there, or was there ever, a septic system or other type of waste treatment on the property?
 Yes No

If so, please describe _____

6. Has the property ever been used for any of the following: (If so, please check all which apply and describe below).

- | | | |
|--|--|---|
| <input type="checkbox"/> gas station | <input type="checkbox"/> car wash | <input type="checkbox"/> auto, truck, bus or boat |
| <input type="checkbox"/> auto dealership | <input type="checkbox"/> auto body shop | <input type="checkbox"/> maintenance or repair |
| <input type="checkbox"/> chemical mfg. | <input type="checkbox"/> metal plating | <input type="checkbox"/> electronic component mfg. |
| <input type="checkbox"/> dry cleaning | <input type="checkbox"/> machine shop | <input type="checkbox"/> coal, gas or tar plant |
| <input type="checkbox"/> railroad yard | <input type="checkbox"/> leather/tanning | <input type="checkbox"/> sand or gravel pit |
| <input type="checkbox"/> farm operations | <input type="checkbox"/> electrical substation | <input type="checkbox"/> landfill (including waste disposal site) |
| <input type="checkbox"/> junkyard | | <input type="checkbox"/> wood product processing or treating |

7. Please describe any other prior uses of the property and the name of any known prior owners. (Prior 20 years)

OWNE PROPERTY FOR 30+ YEARS

8. Are there any environmental or land use licenses, permits, approvals, authorizations, registrations, certifications, notices or filings required by any federal, state or local governmental agency for the operation of your business, construction of facilities, or alterations on the property?

Yes No

If so, please indicate which and attach copies:

Are you in compliance with the requirements of such licenses and permits? Yes No

If no, please comment
N/A

Loan Policy
Page 82 of 108

- 9. Are there any prior Phase I, Phase II or Phase III environmental or engineering reports or tests or Environmental Compliance audits which relate to the property? ___ Yes No

If so, please attach copies:

- 10. Is air pollution control or waste water treatment equipment required or used for operations on the property? ___ Yes No

If so, describe the operations and control equipment. _____

- 11. Are you (your company or partners, if applicable) now subject to, or have you ever been subject to, an environmental regulatory inquiry, proceeding or lawsuit by federal, state or local government or private parties relating to environmental law violations? ___ Yes ___ No

If yes, explain

The undersigned certifies he has exercised due diligence and made all appropriate inquiries in completing this questionnaire that the foregoing information is true and correct to the best of his knowledge. In the event that additional environmental analysis is required by the bank, the undersigned authorizes the Village Bank or its agents to directly discuss the results of those analyses with any consultants the undersigned has retained to perform them.

The undersigned acknowledges that this questionnaire is for Village Bank's financing risk assessment purposes only. Should Village Bank lend to the Borrower after review of this questionnaire and any other evaluations it may require, such lending decision should not be construed as Secured Party determination or implicit representation that the real property or mode of operation is free of actual or potential environmental problems.

Mike,

good chatting with you today...I shared Wayne's contact info with you. He said that he feels better about things and has no problem with you doing a site visit tomorrow; he is looking forward to your call.

Additionally, here is some history/info from Wayne for your report:

"Wayne Moser

4:03 PM (57 minutes ago)

to me

By wisconsin statute, any building where dry cleaning is done must register and have an address with the state DNR. Aussie's Laundry and Dry Cleaning at 1021 South Broadway st. was never registered under that requirement because it was never a location where dry cleaning operations were performed. All dry cleaning was done at the L-Mart shopping center after I purchased Fred and Lucy Lammert's dry cleaning business there. It was Fred who trained me how to do it. That is when I got into the dry cleaning business. All the equipment was moved to 1400 north broadway st shortly after i bought that store. I had an attendant who took in dry cleaning clothes, tagged them and left them for me to pick up to take to the north plant. After processing, the clothes were taken back to Outback finished and hung on the rack for customers to pick up. The attendant ironed laundered shirts while there. The sign said Aussie's Dry Cleaning and so did the north store sign. In that time there were many grocery stores that had dry cleaning drop-off counters too and would do the same thing. I had a tenant recently (his sign is still there) . He had a sewing and alterations business. He was from the twin cities and he would take dry cleaning in, drop it off at a Clean n Press in minneapolis to be dry cleaned and then bring it back to menomonie in 2 days. A drop station cannot pollute anything."

thanks again and please feel free to reach out if you have any questions, etc....thanks

Violation/Evaluation Summary

Note: NO RECORDS: As of Jan 2021, there are no Compliance Monitoring and Enforcement (violation) records associated with this facility (EPA ID).

Handler Summary

Importer Activity: No
Mixed Waste Generator: No
Transporter Activity: No
Transfer Facility: No
Onsite Burner Exemption: No
Furnace Exemption: No
Underground Injection Activity: No
Commercial TSD: No
Used Oil Transporter: No
Used Oil Transfer Facility: No
Used Oil Processor: No
Used Oil Refiner: No
Used Oil Burner: No
Used Oil Market Burner: No
Used Oil Spec Marketer: No

Hazardous Waste Handler Details

Sequence No: 1
Receive Date: 19870406
Handler Name: MENOMONIE QUICK WASH
Federal Waste Generator Code: 3
Generator Code Description: Very Small Quantity Generator
Source Type: Notification

Waste Code Details

Hazardous Waste Code: F002
Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
---------	-------------------	-----------	------------------	----------------	------	----

1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Action Information

Action Date:	11/26/2001
Action Code:	730
Action Name:	CO Packet created for Recorded Groundwater Use Restriction
Action Desc:	Date DNR created a Continuing Obligations (CO) Packet for a site closure where a Groundwater Use Restriction (GWUR) was required and recorded at the Register of Deeds. DNR Staff created the packet from available file material. A copy of the deed filing can be found in the CO Packet
Action Comment:	*** AUTO-POPULATED ***
Action Date:	11/26/2001
Action Code:	11
Action Name:	Activity Closed
Action Desc:	Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.
Action Comment:	*** NR726 Closure from Commerce Data Interchange ***
Action Date:	03/05/2002
Action Code:	100
Action Name:	CO Packet and GIS QAQC Completed by DNR
Action Desc:	Date DNR staff reviewed information within the Continuing Obligations Packet for completeness and readability and the geolocation was confirmed.
Action Comment:	
Action Date:	07/02/2013
Action Code:	89
Action Name:	DSPS (formerly Commerce) Transferred Back to DNR
Action Desc:	Date the WI Dept of Safety and Professional Services (DSPS) transfers oversight of activity back to the DNR. DSPS was part of the Dept of Commerce until 2011.
Action Comment:	PECFA PROGRAM TRANSFER 2013-2015 STATE BUDGET
Action Date:	03/17/2020
Action Code:	171
Action Name:	Chlorinated VOC Initial Screening Completed
Action Desc:	Date DNR performed an initial screening of site documentation to identify whether chlorinated volatile organic compounds (VOC) were previously discovered during investigation. A secondary technical screening may be required to evaluate the potential for vapor intrusion based on data.
Action Comment:	SECONDARY SCREENING RECOMMENDED
Action Date:	11/26/2001
Action Code:	56
Action Name:	Continuing Obligation(s) Applied
Action Desc:	Closure or ongoing cleanup was approved with one or more continuing obligations to give notice of residual contamination; require or restrict certain actions to protect the public or environment; minimize human or environmental exposures.
Action Comment:	*** AUTO-POPULATED ***
Action Date:	08/24/2001
Action Code:	84
Action Name:	Remaining Actions Needed

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
Action Desc:					Date DNR sends a letter outlining the remaining actions needed to achieve final closure. The site will not be formally closed until receipt of documentation. This action was formerly known as conditional closure.	
Action Comment:					*** Conditional Closure from Commerce Data Interchange ***	
Action Date:					06/15/2001	
Action Code:					37	
Action Name:					Site Investigation Report (SIR) Received (non-fee)	
Action Desc:					Date DNR received a site investigation report (SIR) to determine degree & extent of contamination and form a basis for choosing the appropriate remedial action.	
Action Comment:					*** SITE INVESTIGATION DETERMINED BY DSPS TO BE COMPLETE - FROM DSPS DATA INTERCHANGE ***	
Action Date:					06/11/2007	
Action Code:					33	
Action Name:					Tank System Site Assessment (TSSA) Report Received	
Action Desc:					Date DNR received a tank system site assessment (TSSA) regarding tank closure or change in services for an above-ground or underground tank system.	
Action Comment:					REMOVED ALL TANKS FROM THIS SITE.	
Action Date:					10/13/2000	
Action Code:					76	
Action Name:					Activity Transferred to DSPS (formerly Commerce)	
Action Desc:					Oversight of medium or low risk petroleum cleanup has been transferred to the WI Dept of Safety and Professional Services (DSPS). DSPS was part of the Dept of Commerce until 2011.	
Action Comment:						
Action Date:					08/24/2001	
Action Code:					50	
Action Name:					GIS Registry Site	
Action Desc:					Site conditions merit placement on GIS registry.	
Action Comment:						
Action Date:					11/26/2001	
Action Code:					236	
Action Name:					Continuing Obligation - Residual GW Contamination	
Action Desc:					Closure or ongoing cleanup was approved with the Continuing Obligation for residual groundwater contamination in excess of ch. NR 140 groundwater enforcement standard, to obtain DNR approval before well construction or reconstruction.	
Action Comment:					*** AUTO-POPULATED ***	
Action Date:					03/20/1998	
Action Code:					1	
Action Name:					Notification of Hazardous Substance Discharge	
Action Desc:					Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.	
Action Comment:

Action Information

Action Date:	09/08/2003
Action Code:	236
Action Name:	Continuing Obligation - Residual GW Contamination
Action Desc:	Closure or ongoing cleanup was approved with the Continuing Obligation for residual groundwater contamination in excess of ch. NR 140 groundwater enforcement standard, to obtain DNR approval before well construction or reconstruction.
Action Comment:	*** AUTO POPULATED AT FINAL CLOSURE DUE TO 700 ACTION ***
Action Date:	10/28/1998
Action Code:	33
Action Name:	Tank System Site Assessment (TSSA) Report Received
Action Desc:	Date DNR received a tank system site assessment (TSSA) regarding tank closure or change in services for an above-ground or underground tank system.
Action Comment:	
Action Date:	10/08/2007
Action Code:	100
Action Name:	CO Packet and GIS QAQC Completed by DNR
Action Desc:	Date DNR staff reviewed information within the Continuing Obligations Packet for completeness and readability and the geolocation was confirmed.
Action Comment:	
Action Date:	04/12/2000
Action Code:	76
Action Name:	Activity Transferred to DSPS (formerly Commerce)
Action Desc:	Oversight of medium or low risk petroleum cleanup has been transferred to the WI Dept of Safety and Professional Services (DSPS). DSPS was part of the Dept of Commerce until 2011.
Action Comment:	
Action Date:	03/13/2003
Action Code:	710
Action Name:	Database Fee Paid for Soil Continuing Obligation(s)
Action Desc:	Date fee received for residual soil contamination and related continuing obligations.
Action Comment:	
Action Date:	09/08/1998
Action Code:	2
Action Name:	Responsible Party (RP) letter sent
Action Desc:	Date of DNR letter to responsible party (RP) notifying them of state law responsibilities associated with the investigation and cleanup of a hazardous substance discharge to the environment.
Action Comment:	
Action Date:	07/02/2013
Action Code:	89

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
Action Name:					DSPS (formerly Commerce) Transferred Back to DNR	
Action Desc:					Date the WI Dept of Safety and Professional Services (DSPS) transfers oversight of activity back to the DNR. DSPS was part of the Dept of Commerce until 2011.	
Action Comment:					PECFA PROGRAM TRANSFER 2013-2015 STATE BUDGET	
Action Date:					08/06/2003	
Action Code:					84	
Action Name:					Remaining Actions Needed	
Action Desc:					Date DNR sends a letter outlining the remaining actions needed to achieve final closure. The site will not be formally closed until receipt of documentation. This action was formerly known as conditional closure.	
Action Comment:					*** Conditional Closure from Commerce Data Interchange ***	
Action Date:					09/08/2003	
Action Code:					11	
Action Name:					Activity Closed	
Action Desc:					Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.	
Action Comment:					*** NR726 Closure from Commerce Data Interchange ***	
Action Date:					03/13/2003	
Action Code:					50	
Action Name:					GIS Registry Site	
Action Desc:					Site conditions merit placement on GIS registry.	
Action Comment:					Autopopulated from 700/710 entry	
Action Date:					03/13/2003	
Action Code:					700	
Action Name:					Database Fee Paid for Groundwater Continuing Obligation(s)	
Action Desc:					Date fee received for residual groundwater contamination and related continuing obligations.	
Action Comment:						
Action Date:					06/10/2020	
Action Code:					171	
Action Name:					Chlorinated VOC Initial Screening Completed	
Action Desc:					Date DNR performed an initial screening of site documentation to identify whether chlorinated volatile organic compounds (VOC) were previously discovered during investigation. A secondary technical screening may be required to evaluate the potential for vapor intrusion based on data.	
Action Comment:						
Action Date:					09/08/2003	
Action Code:					232	
Action Name:					Continuing Obligation - Residual Soil Contamination	
Action Desc:					Closure or ongoing cleanup was approved with the Continuing Obligation to address residual soil contamination at or above the Residual Contamination Level (RCL) or Site Specific Residual Contaminant Level (SSRCL) per rules, when moved.	
Action Comment:					*** AUTO POPULATED AT FINAL CLOSURE DUE TO 710 ACTION ***	
Action Date:					09/01/1998	
Action Code:					1	
Action Name:					Notification of Hazardous Substance Discharge	
Action Desc:					Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.	
Action Comment:						
Action Date:					09/08/2003	
Action Code:					56	
Action Name:					Continuing Obligation(s) Applied	
Action Desc:					Closure or ongoing cleanup was approved with one or more continuing obligations to give notice of residual contamination; require or restrict certain actions to protect the public or environment; minimize human or environmental exposures.	
Action Comment:					AUTO-POPULATED AS REPLACEMENT FOR CODE 50	
Action Date:					03/01/2000	
Action Code:					37	
Action Name:					Site Investigation Report (SIR) Received (non-fee)	
Action Desc:					Date DNR received a site investigation report (SIR) to determine degree & extent of contamination and form a basis for choosing the appropriate remedial action.	
Action Comment:					*** SITE INVESTIGATION DETERMINED BY DSPS TO BE COMPLETE - FROM DSPS DATA INTERCHANGE ***

Action Information

Action Date: 08/13/2007
Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.
Action Comment: LUC=CAP & MAINTENANCE PLAN.

Action Date: 10/18/2006
Action Code: 37
Action Name: Site Investigation Report (SIR) Received (non-fee)
Action Desc: Date DNR received a site investigation report (SIR) to determine degree & extent of contamination and form a basis for choosing the appropriate remedial action.

Action Date: 08/13/2007
Action Code: 222
Action Name: Continuing Obligation - Maintain Cap Over Contaminated Area
Action Desc: Closure or ongoing cleanup was approved with the requirement to maintain a cap or cover to protect against exposure to contaminated soil (direct contact) or to reduce the movement of residual contamination in soil or groundwater.

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
Action Comment:						
Action Date:			10/30/2007			
Action Code:			100			
Action Name:			CO Packet and GIS QAQC Completed by DNR			
Action Desc:			Date DNR staff reviewed information within the Continuing Obligations Packet for completeness and readability and the geolocation was confirmed.			
Action Comment:						
Action Date:			11/28/2005			
Action Code:			1			
Action Name:			Notification of Hazardous Substance Discharge			
Action Desc:			Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.			
Action Comment:						
Action Date:			01/04/2006			
Action Code:			35			
Action Name:			Site Investigation Workplan (SIWP) Received (non-fee)			
Action Desc:			Date DNR received a site investigation workplan (SIWP) which states the objectives of the site investigation to determine the degree and extent of contamination.			
Action Comment:			SI WP W/O FEE			
Action Date:			08/13/2007			
Action Code:			232			
Action Name:			Continuing Obligation - Residual Soil Contamination			
Action Desc:			Closure or ongoing cleanup was approved with the Continuing Obligation to address residual soil contamination at or above the Residual Contamination Level (RCL) or Site Specific Residual Contaminant Level (SSRCL) per rules, when moved.			
Action Comment:						
Action Date:			12/13/2005			
Action Code:			2			
Action Name:			Responsible Party (RP) letter sent			
Action Desc:			Date of DNR letter to responsible party (RP) notifying them of state law responsibilities associated with the investigation and cleanup of a hazardous substance discharge to the environment.			
Action Comment:						
Action Date:			10/18/2006			
Action Code:			79			
Action Name:			Case Closure Review Request Received			
Action Desc:			Date DNR Project Manager determined that the Case Closure - (Form 4400-202) submittal was administratively complete and appropriate fees have been paid for the review.			
Action Comment:						
Action Date:			11/10/2006			
Action Code:			56			
Action Name:			Continuing Obligation(s) Applied			
Action Desc:			Closure or ongoing cleanup was approved with one or more continuing obligations to give notice of residual contamination; require or restrict certain actions to protect the public or environment; minimize human or environmental exposures.			
Action Comment:						
Action Date:			05/18/2016			
Action Code:			185			
Action Name:			Continuing Obligation(s) Compliance Audit Complete			
Action Desc:			Date DNR completed a compliance audit of continuing obligations that were previously approved and applied to this activity to assure compliance. Audit activities include a site review and visit by DNR staff.			
Action Comment:						
Action Date:			08/13/2007			
Action Code:			99			
Action Name:			Miscellaneous			
Action Desc:			Miscellaneous action - See Action Comments			
Action Comment:			MAINTENANCE PLAN REC'D.			
Action Date:			10/18/2006			
Action Code:			710			
Action Name:			Database Fee Paid for Soil Continuing Obligation(s)			

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
----------------	--------------------------	------------------	-------------------------	-----------------------	-------------	-----------

Action Desc: Date fee received for residual soil contamination and related continuing obligations.

Action Comment:

Action Date: 11/10/2006

Action Code: 50

Action Name: GIS Registry Site

Action Desc: Site conditions merit placement on GIS registry.

Action Comment:

Action Date: 04/21/2020

Action Code: 171

Action Name: Chlorinated VOC Initial Screening Completed

Action Desc: Date DNR performed an initial screening of site documentation to identify whether chlorinated volatile organic compounds (VOC) were previously discovered during investigation. A secondary technical screening may be required to evaluate the potential for vapor intrusion based on data.

Action Information

Action Date:	03/13/1995	
Action Code:	2	
Action Name:	Responsible Party (RP) letter sent	
Action Desc:	Date of DNR letter to responsible party (RP) notifying them of state law responsibilities associated with the investigation and cleanup of a hazardous substance discharge to the environment.	
Action Comment:	RP LETTER	
Action Date:	04/21/1995	
Action Code:	35	
Action Name:	Site Investigation Workplan (SIWP) Received (non-fee)	
Action Desc:	Date DNR received a site investigation workplan (SIWP) which states the objectives of the site investigation to determine the degree and extent of contamination.	
Action Comment:	SI WORK PLAN RECV'D	
Action Date:	04/08/1999	
Action Code:	86	
Action Name:	Activity Closed with site specific conditions.	
Action Desc:	[OBSOLETE] Date the DNR sends a letter notifying RP that the site has been closed with site specific conditions described. For example, soil contamination may exist but if dug up, it would not pose a direct contact threat.	
Action Comment:		
Action Date:	04/27/1995	
Action Code:	36	
Action Name:	Site Investigation Workplan (SIWP) Approved	
Action Desc:	Date DNR provided notice that a site investigation workplan (SIWP) has been approved and site investigation activities can proceed as planned.

Action Desc:		Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.				
Action Comment:						
Action Date:		06/05/2020				
Action Code:		171				
Action Name:		Chlorinated VOC Initial Screening Completed				
Action Desc:		Date DNR performed an initial screening of site documentation to identify whether chlorinated volatile organic compounds (VOC) were previously discovered during investigation. A secondary technical screening may be required to evaluate the potential for vapor intrusion based on data.				
Action Comment:		SECONDARY SCREENING RECOMMENDED				
Action Date:		03/15/1999				
Action Code:		79				
Action Name:		Case Closure Review Request Received				
Action Desc:		Date DNR Project Manager determined that the Case Closure - (Form 4400-202) submittal was administratively complete and appropriate fees have been paid for the review.				
Action Comment:						
Action Date:		03/04/1997				
Action Code:		37				
Action Name:		Site Investigation Report (SIR) Received (non-fee)				
Action Desc:		Date DNR received a site investigation report (SIR) to determine degree & extent of contamination and form a basis for choosing the appropriate remedial action.				
Action Comment:						
Action Date:		03/01/1995				
Action Code:		33				
Action Name:		Tank System Site Assessment (TSSA) Report Received				
Action Desc:		Date DNR received a tank system site assessment (TSSA) regarding tank closure or change in services for an above-ground or underground tank system.				
Action Comment:						
Action Date:		03/01/1995				
Action Code:		1				
Action Name:		Notification of Hazardous Substance Discharge				
Action Desc:		Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.

Action Information

Action Date: 03/31/1993
Action Code: 33
Action Name: Tank System Site Assessment (TSSA) Report Received
Action Desc: Date DNR received a tank system site assessment (TSSA) regarding tank closure or change in services for an above-ground or underground tank system.

Action Comment:

Action Date: 10/06/1992
Action Code: 2
Action Name: Responsible Party (RP) letter sent
Action Desc: Date of DNR letter to responsible party (RP) notifying them of state law responsibilities associated with the investigation and cleanup of a hazardous substance discharge to the environment.

Action Comment:

Action Date: 10/05/1992
Action Code: 1
Action Name: Notification of Hazardous Substance Discharge
Action Desc: Date DNR received notice of a discharge of a hazardous substance under s. 292.11 Wis. Stats. Discharge was discovered during an environmental assessment or laboratory analysis of soil, sediment, groundwater or vapor samples. Includes historic contamination.

Action Comment:

Action Date: 05/06/2002
Action Code: 11
Action Name: Activity Closed
Action Desc: Date DNR sends a letter approving the final closure of an activity based on data provided and compliance with NR 726 and 727. No further investigation or remediation is required at this time.

Action Comment:

*** NR726 Closure from Commerce Data Interchange ***

Action Date: 08/29/1996
Action Code: 76
Action Name: Activity Transferred to DSPS (formerly Commerce)
Action Desc: Oversight of medium or low risk petroleum cleanup has been transferred to the WI Dept of Safety and Professional Services (DSPS). DSPS was part of the Dept of Commerce until 2011.

Action Comment:

Action Date: 04/08/1993
Action Code: 37
Action Name: Site Investigation Report (SIR) Received (non-fee)
Action Desc: Date DNR received a site investigation report (SIR) to determine degree & extent of contamination and form a basis for choosing the appropriate remedial action.

Action Comment:

*** SITE INVESTIGATION DETERMINED BY DSPS TO BE COMPLETE - FROM DSPS DATA INTERCHANGE ***

Action Date: 07/02/2013

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

Formerly Utilized Sites Remedial Action Program:

DOE FUSRAP

The U.S. Department of Energy (DOE) established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.

Government Publication Date: Mar 4, 2017

National Priority List:

NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Feb 23, 2021

National Priority List - Proposed:

PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Feb 23, 2021

Deleted NPL:

DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Feb 23, 2021

SEMS List 8R Active Site Inventory:

SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Jan 28, 2021

Inventory of Open Dumps, June 1985:

ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites:[SEMS ARCHIVE](#)

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: Jan 28, 2021

Comprehensive Environmental Response, Compensation and Liability Information System -[CERCLIS](#)**CERCLIS:**

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands:[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned:[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:[RCRA CORRACTS](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 22, 2021

RCRA non-CORRACTS TSD Facilities:[RCRA TSD](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Jan 22, 2021

RCRA Generator List:[RCRA LQG](#)

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 22, 2021

RCRA Small Quantity Generators List:

RCRA SQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 22, 2021

RCRA Very Small Quantity Generators List:

RCRA VSQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 22, 2021

RCRA Non-Generators:

RCRA NON GEN

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 22, 2021

Federal Engineering Controls-ECs:

FED ENG

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Feb 23, 2021

Federal Institutional Controls- ICs:

FED INST

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Feb 23, 2021

Land Use Control Information System:

LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Emergency Response Notification System:

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Nov 9, 2020

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 6, 2021

FEMA Underground Storage Tank Listing:

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan:

FRP

List of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Dec 2, 2020

Historical Gas Stations:

HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries:

REFN

List of petroleum refineries from the U.S. Energy Information Administration (EIA) Refinery Capacity Report. Includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year located in the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and other U.S. possessions. Survey locations adjusted using public data.

Government Publication Date: Jul 10, 2020

Petroleum Product and Crude Oil Rail Terminals:

BULK TERMINAL

List of petroleum product and crude oil rail terminals made available by the U.S. Energy Information Administration (EIA). Includes operable bulk petroleum product terminals located in the 50 States and the District of Columbia with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil that were active between 2017 and 2018. Petroleum product terminals comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings. Survey locations adjusted using public data.

Government Publication Date: Apr 28, 2020

LIEN on Property:

SEMS LIEN

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: Jan 28, 2021

Superfund Decision Documents:

SUPERFUND ROD

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Feb 23, 2021

State**Hazard Ranking List:**

SHWS

Last published in 1994, this is a list of sites which were investigated by the Department of Natural Resources (DNR) under the Wisconsin Environmental Repair Law. Hazard ranking of a site or facility was performed to determine if the site or facility presents a substantial danger to the public health, or welfare, or the environment. The DNR Bureau for Remediation and Redevelopment now maintains other programs for the investigation and cleanup of potential and confirmed contamination to soil and groundwater in Wisconsin. This database is state equivalent CERCLIS.

Government Publication Date: July 1994

Licensed Solid Waste Landfills:

SWF/LF

List of licensed solid waste landfills in the state of Wisconsin as recorded by the Department of Natural Resources (DNR). The DNR regulates landfills to prevent negative impacts to people and the environment. DNR staff inspect landfills regularly.

Government Publication Date: Dec 1, 2020

The Historic Registry of Waste Disposal Sites:

WDS

Prior to development of on-line databases, the Wisconsin Department of Natural Resources (DNR) provided public information about old waste disposal facilities in a printed publication called the Historic Registry of Waste Disposal Sites (the "Registry").

Government Publication Date: Jul 22, 2013

Solid & Hazardous Waste Information Management System:

SHWIMS

List of sites and facilities in the Solid and Hazardous Waste Information System (SHWIMS) regulated by the Wisconsin Department of Natural Resources (DNR) Waste and Materials Management (WMM) program. Activities that occur at site facilities include landfill operation, waste transportation, hazardous waste generation, wood burning, waste processing, sharps collection and many more.

Government Publication Date: Mar 30, 2021

Leaking Underground Storage Tanks:

LUST

List of Leaking Underground Storage Tank (LUST) sites as recorded by the Department of Natural Resources (DNR). When petroleum products are released from underground tanks into the soil or groundwater, the DNR will work with the responsible party and environmental professionals to clean up the spill to state standards.

Government Publication Date: Jan 19, 2021

Leaking Aboveground Storage Tanks:

LAST

List of Leaking Aboveground Storage Tank (LAST) sites as recorded by the Department of Natural Resources (DNR). When petroleum products are released from tanks into the soil or groundwater, the DNR will work with the responsible party and environmental professionals to clean up the spill to state standards.

Government Publication Date: Jan 19, 2021

Underground Storage Tanks:

UST

List of Underground Storage Tank (UST) locations. The Bureau of Weights and Measures, operating under the Department of Agriculture, Trade and Consumer Protection is responsible for the administration and regulation of the Wisconsin Administrative Code ATCP 93 - Flammable and Combustible Liquids.

Government Publication Date: Feb 18, 2021

Aboveground Storage Tanks:

AST

List of Aboveground Storage Tank (AST) locations. The Bureau of Weights and Measures, operating under the Department of Agriculture, Trade and Consumer Protection is responsible for the administration and regulation of the Wisconsin Administrative Code ATCP 93 - Flammable and Combustible Liquids.

Government Publication Date: Feb 18, 2021

Delisted Storage Tanks:

DEL STORAGE TANK

This database contains a list of closed storage tank sites that were removed from the storage tank database regulated by the Storage Tank Regulation Section of the Wisconsin Department of Agriculture, Trade, and Consumer Protection.

Government Publication Date: Feb 18, 2021

Delisted Leaking Tanks:

DELISTED LST

This database contains a list of closed leaking tank sites that were removed from the leaking tank database regulated by the Storage Tank Regulation Section of the Wisconsin Department of Natural Resources.

Government Publication Date: Jan 19, 2021

Closed Remediation Sites:

CRS

List of sites which have undergone remediation and where particular legal restrictions on property use are in place. To be considered a Closed Remediation Site, the Department of Natural Resources must be satisfied that no further efforts are necessary provided that the property is not used for certain purposes.

Government Publication Date: Mar 24, 2021

Deed Restriction at Closeout Sites:

AUL

List of sites for which a deed restriction is recorded at the Register of Deeds office. Deed restrictions limit property use or outline requirements for actions prior to future use. Deed restrictions are applied in cases where there is known soil contamination that is impracticable to remove, or an engineering requirement or NR270 industrial standards are in place.

Government Publication Date: Jan 19, 2021

Voluntary Party Liability Exemption Sites:

VCP

List of sites which have participated in the Voluntary Party Liability Exemption (VPLE) program, an elective environmental cleanup program administered by the Wisconsin Department of Natural Resources (DNR), and received an exemption from future environmental liability. Any individual, business or unit of government that conducts an environmental investigation and cleanup of a contaminated property - following state requirements with the oversight of DNR staff - can receive an exemption from future environmental liability. With some restrictions, most properties that have had a discharge of a hazardous substance are eligible for VPLE.

Government Publication Date: Jan 19, 2021

Brownfields Environmental Assessment Program:

BEAP

List of sites which participated in the Brownfields Environmental Assessment Program (BEAP) - a federal program that assisted municipalities with Environmental Site Assessments (ESAs) for tax delinquent or bankrupt properties, or properties a local government acquired for redevelopment. Site assessments to determine property contamination were conducted by the Department of Natural Resources staff.

Government Publication Date: Jan 19, 2021

Brownfields Listing:

BROWNFIELDS

The Department of Natural Resource (DNR)'s Remediation and Redevelopment program has a wide range of financial and liability tools available to assist local governments, businesses, lenders and others to clean up and redevelop brownfields in Wisconsin. DNR describes brownfields as abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfield properties present public health, economic, environmental and social challenges to the rural and urban communities in which they are located.

Government Publication Date: Jan 19, 2021

Environmental Repair:

ERP

Environmental Repair Program sites are those other than Leaking Underground Storage Tanks (LUSTs) that have contaminated soil and/or groundwater. Examples include industrial spills (or dumping) that need long term investigation, buried containers of hazardous substances, and closed landfills that have caused contamination.

Government Publication Date: Jan 19, 2021

Solid Waste - Landfills and Historic Waste Sites:

HIST LF

A list of active and inactive solid waste landfills and known historic waste sites available through the Wisconsin Department of Natural Resources' Open Data Portal. This list is based on the known or inferred limits of waste found in the 'Solid Waste - Landfills and Historic Waste Site Extents' dataset.

Government Publication Date: Dec 21, 2020

Tribal**Leaking Underground Storage Tanks on Indian Lands:**

INDIAN LUST

LUSTs on Tribal/Indian Lands in EPA Region 5, which includes Michigan, Minnesota, and Wisconsin.

Government Publication Date: Apr 14, 2020

Underground Storage Tanks (USTs) on Indian Lands:

INDIAN UST

USTs on Tribal/Indian Lands in Region 5, which includes Michigan, Minnesota, and Wisconsin.

Government Publication Date: Apr 14, 2020

Delisted Tribal Leaking Storage Tanks:

DELISTED ILST

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

Government Publication Date: Apr 14, 2020

Delisted Tribal Underground Storage Tanks:

DELISTED IUST

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

Government Publication Date: Apr 14, 2020

County

No County databases were selected to be included in the search.

Additional Environmental Record Sources**Federal****PFOA/PFOS Contaminated Sites:**

PFAS NPL

List of sites where PFOA or PFOS contaminants have been found in drinking water or soil. Made available by the Federal Environmental Protection Agency (EPA).

Government Publication Date: Mar 1, 2021

Facility Registry Service/Facility Index:

FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the Environmental Protection Agency (US EPA).

Government Publication Date: Nov 2, 2020

Toxics Release Inventory (TRI) Program:

TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Releases:

PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a Per- or polyfluorinated alkyl substance (PFAS) included in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances. The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment.

Government Publication Date: Feb 19, 2020

Perfluorinated Alkyl Substances (PFAS) Water Quality:

PFAS WATER

The Water Quality Portal (WQP) is a cooperative service sponsored by the United States Geological Survey (USGS), the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC). This listing includes records from the Water Quality Portal where the characteristic (environmental measurement) is in the Environmental Protection Agency (EPA)'s consolidated PFAS Master List of PFAS Substances.

Government Publication Date: Jul 20, 2020

Hazardous Materials Information Reporting System:

HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: Sep 1, 2020

National Clandestine Drug Labs:

NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Oct 5, 2020

Toxic Substances Control Act:

TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Apr 11, 2019

Hist TSCA:

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

[FTTS INSP](#)

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

[PRP](#)

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Feb 23, 2021

State Coalition for Remediation of Drycleaners Listing:

[SCRD DRYCLEANER](#)

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

[ICIS](#)

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Jan 6, 2021

Drycleaner Facilities:

[FED DRYCLEANERS](#)

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) online search. The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Feb 17, 2021

Delisted Drycleaner Facilities:

[DELISTED FED DRY](#)

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Feb 17, 2021

Formerly Used Defense Sites:

FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: Jan 28, 2020

Former Military Nike Missile Sites:

FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 1, 1984

PHMSA Pipeline Safety Flagged Incidents:

PIPELINE INCIDENT

A list of flagged pipeline incidents made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types.

Government Publication Date: Jul 7, 2020

Material Licensing Tracking System (MLTS):

MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: Aug 5, 2020

Historic Material Licensing Tracking System (MLTS) sites:

HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

MINES

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: Nov 3, 2020

Surface Mining Control and Reclamation Act Sites:

SMCRA

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of Abandoned Mine Land (AML) impacts, as well as information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Government Publication Date: Dec 18, 2020

Mineral Resource Data System:

MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2006

Uranium Mill Tailings Radiation Control Act Sites:

URANIUM

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

Government Publication Date: Mar 4, 2017

Alternative Fueling Stations:

ALT FUELS

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Jan 18, 2021

Registered Pesticide Establishments:

SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 31, 2020

Polychlorinated Biphenyl (PCB) Notifiers:

PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 19, 2020

State

Tier 2 Report:

TIER 2

A list of Tier 2 facilities in Wisconsin. This list is provided by the Wisconsin Department of Military Affairs Division of Emergency Management.

Government Publication Date: Jan 11, 2021

Spills:

SPILLS

List of spill events in the Wisconsin Department of Natural Resources (DNR) Bureau for Remediation and Redevelopment Tracking System. The Wisconsin DNR describes a spill as a discharge of a hazardous substance that may adversely impact, or threaten to impact public health, welfare or the environment.

Government Publication Date: Jan 19, 2021

Wisconsin Agricultural Spills:

AGSPILLS

List of agricultural spill sites reported to the Wisconsin Department of Agriculture, Trade and Consumer Protection. The Agricultural Chemical Cleanup Program (ACCP) is in place to identify and manage pesticide and fertilizer spills to prevent these products from reaching the groundwater. Once a site has been identified as requiring remediation, the ACCP provides reimbursement for eligible costs incurred by the responsible person.

Government Publication Date: Feb 3, 2021

Wisconsin Agricultural Spills - Remediation Locations:

AG SPILL REMED

List of agricultural spill site remediation locations made available by the Wisconsin Department of Agriculture, Trade and Consumer Protection. The Agricultural Chemical Cleanup Program (ACCP) is in place to identify and manage pesticide and fertilizer spills to prevent these products from reaching the groundwater. Once a site has been identified as requiring remediation, the ACCP provides reimbursement for eligible costs incurred by the responsible person.

Government Publication Date: Feb 3, 2021

Wisconsin Bureau for Remediation and Redevelopment Tracking System:

BRRTS

The Wisconsin Bureau for Remediation and Redevelopment Tracking System (BRRTS) contains information on the investigation and cleanup of potential and confirmed contamination to soil and groundwater in Wisconsin. This database includes: sites where an abandoned container with potentially hazardous contents has been inspected and recovered, and no known discharge to the environment has occurred; sites where there was, or may have been, a discharge to the environment and, based on the known information, the Department of Natural Resources (DNR) has determined that the responsible party does not need to undertake an investigation or cleanup in response to that discharge; materials management sites that receive contaminated soil from other properties; and sites which have been removed from the tracking system and archived.

Government Publication Date: Jan 19, 2021

Delisted BRRT:

DELISTED BRRT

The Wisconsin Bureau for Remediation and Redevelopment Tracking System (BRRTS) maintained by the Wisconsin Department of Natural Resources contains information on the investigation and cleanup of potential and confirmed contamination to soil and groundwater in Wisconsin. Sites and site details are removed from the data made available to the public when the source of contamination is unclear and an investigation to determine the source of contamination is in progress.

Government Publication Date: Oct 27, 2015

Per- and Polyfluoroalkyl Substances (PFAS):

PFAS

List of sites from the Bureau for Remediation and Redevelopment Tracking System (BRRTS) where one or more of the substances involved are in the PFAS Master List of PFAS Substances made available by the Environmental Protection Agency (US EPA). BRRTS contains information on the investigation and cleanup of potential and confirmed contamination to soil and groundwater in the state of Wisconsin. This list is made available by the Wisconsin Department of Natural Resources (DNR).

Government Publication Date: Jan 19, 2021

Dry Cleaner Environmental Response Fund:

DRYC REM

List of sites in the Dry Cleaner Environmental Response Fund Program made available by the Wisconsin Department of Natural Resources (DNR). This program reimburses dry cleaners for the investigation and clean up of the release of chemicals used in dry cleaning.

Government Publication Date: Mar 5, 2020

Five Star Recognition Program Sites:

DRYCLEANERS

The purpose of Wisconsin's Five Star Environmental Recognition Program for Drycleaners was to encourage drycleaners to become more environmentally-friendly. The program was divided into five different star categories, with the ultimate goal being to achieve the Five Star status. The program was sponsored by the Wisconsin Fabricare Institute (WFI), in cooperation with the Department of Natural Resources, the Department of Commerce, the University of Wisconsin Extension-Solid and Hazardous Waste Education Center and the Center for Neighborhood Technology. WFI discontinued the program on Jan 1, 2013

Government Publication Date: Jan 1, 2013

Delisted Dry Cleaner Environmental Response Fund:

DELISTED DRYC REM

Sites which once appeared on - but have since been removed from - the list of sites in the Dry Cleaner Environmental Response Fund Program made available by the Wisconsin Department of Natural Resources (DNR). The Dry Cleaner Environmental Response Fund Program reimburses dry cleaners for the investigation and clean up of the release of chemicals used in dry cleaning.

Government Publication Date: Mar 5, 2020

Liens and Notices of Contamination:

LIENS

A list of sites with liens and notices of contamination. This list is made available by the Wisconsin Department of Natural Resources (DNR).

Government Publication Date: Jan 19, 2021

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental record sources available for this State.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Chippewa Falls, WI

HIG Project

2049968

Client Project

P-0001366

Date Created

04/16/2021

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

Historical Aerial Photographs

Aerial photographs of the site location were used to create a multi-page file named AerialPhotos. Each aerial photograph has a title block that includes the year and scale of the photograph as well as project information submitted at the time the order was placed. The years provided are:

1938, 1945, 1951, 1958, 1965, 1973, 1980, 1986, 1988, 1992, 1995, 2005, 2008, 2010, 2013, 2015, 2017, 2018

City Directory Pages/Abstracts

Research Methodology: A search was conducted for city directories that include coverage of the site area using HIG's City Directory Collection and other sources, if needed. Directories for the following years were identified for the site area. A comma between date ranges indicates a gap of 10 years or more in available city directories:

Menomonie; 1967-1994

Chippewa Valley; 1998-2018

The above listed directories were reviewed at approximate 5 year intervals to determine if the street(s) specified in the order were included in the directories and had listings for the site area. HIG attempted to identify former street names and aliases and if identified, these were also included in the review.

Research Results: City directory information, when provided, was used to create a multi-page file(s) named CD- followed by the street name. When City Directory Pages are provided, the publication name and date are shown at the top of each page. When a City Directory abstract is provided, the first page of the abstract includes the relevant publication information. The years of coverage identified for each street and any identified historical street names are as follows:

Broadway Street South (1967-2018)

FIM+ Maps

The HIG Historical Map Collection and the United States Library of Congress Map Collection were searched for fire insurance maps (FIMs), real estate atlases and similar maps for the site location and adjoining properties. These maps were used to create a multi-page file named FIM+Maps. The maps have title blocks that include the map publisher, year the map was created and, if applicable, the year the map was last updated. The years provided are:

1894, 1902, 1910, 1925, 1941

Database Report

An ERIS Database Report is provided as a file named DBR.

Plat Map+

An online search was conducted for recent plat or parcel maps of the site location and coverage is provided in the file named PropertyMap.

In addition, a search was completed of the HIG Historical Map Collection for historical survey documents and cadastral maps. Maps that cover the site location were provided in a file named HistoricalMaps. The years of coverage provided

are listed below.

1949

Topographic Maps

The HIG Historical Map Collection was searched for topographic maps for the site location and adjoining properties. Maps from the HIG Collection were used to create a multi-page file named TopoMaps. The years provided are:

1940, 1942, 1972, 1981, 2010, 2013, 2015

Up to four different topographic maps may have been used to create a unified map showing the site location in the center. Unified maps show subdued modern topo features where corresponding maps of the same year were not published. The date in large font on each map is the date HIG has attributed to the map based on the date of first publication, or the most recent date of map inspection or revision. The definitions below provide clarification regarding the dates included in the HIG title block for each map.

Base Map Year - The year when a topographic map was first published or the date the map was significantly revised and given a new base map date.

Photo Year - The date of the most recent aerial photography used to create, revise, or inspect the map.

Photoinspected Year - The year the base map was compared to a more recent aerial photograph. If the comparison showed that no changes were needed, the map was marked photoinspected and no changes were made to the map.

Photorevised Year - During the photo inspection process, if enough changes were observed, the map would be revised by adding the new features. These changes were not field checked and are shown in purple on the photorevised maps.

Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the "Site Specific HIG Data") contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

HIG Copyright Notice

This Research Summary and the selection, arrangement and compilation of Site Specific HIG Data are the property of Historical Information Gatherers. © Copyright 2021 by Historical Information Gatherers, Inc. All rights reserved. The person or entity that ordered and paid for the Site Specific HIG Data is granted a personal, non-assignable, limited license to reproduce the Site Specific HIG Data solely for purposes of providing supporting documentation for reports produced for the site location which is noted on page one of this Research Summary. Any other reproduction or other use of the Site Specific HIG Data in any media or format, in whole or in part, is expressly prohibited without prior written permission from Historical Information Gatherers, and the person or entity that ordered and paid for the Site Specific HIG Data assumes all liability for the making of any such reproductions.

Licensing Agreement

The licensing agreement between Historical Information Gatherers and infoGroup provides that Historical Information Gatherers may create photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright. The licensing agreement also permits the person or entity that ordered and paid for the Site Specific HIG Data to include photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright as supporting documents for reports produced for the site which is the subject of the Site Specific HIG Data.

Appendix E

Site Photographs

PHOTOGRAPHS

Photo 1: Commercial Property located at 1021 South Broadway Street, Menomonie, Dunn County, Wisconsin.

Photo 2: Paved parking areas are on the west and south sides of the building.

PHOTOGRAPHS

Photo 3: Electrical panels and natural gas meter on the north side of the building.

Photo 4: East side of the building adjacent to South Broadway Street.

PHOTOGRAPHS

Photo 5: South Broadway Street adjoins the east side of the Site followed by University of Wisconsin Stout tennis courts.

Photo 6: 11th Avenue West adjoins the south side of the Site followed by a paved parking lot and commercial property.

PHOTOGRAPHS

Photo 7: University of Wisconsin Stout parking lot adjoins the west side of the Site.

Photo 8: University of Wisconsin Stout parking lot adjoins the north side of the Site.

PHOTOGRAPHS

Photo 9: Main self-serve laundry mat area on the east side of the building.

Photo 10: Main self-serve laundry mat area on the east side of the building.

PHOTOGRAPHS

Photo 11: Restroom in the west office room.

Photo 12: Restroom in the self-serve laundry mat area.

PHOTOGRAPHS

Photo 13: Municipal water line and household cleaning supplies located in storage room.

Photo 14: Natural gas water heaters located in storage room.

PHOTOGRAPHS

Photo 15: Office area space on the west side of the building.

Photo 16: Office area space on the west side of the building.

Appendix F

Resumes

Dennis P. McComas, P.G.

Senior Geologist, Due Diligence Manager

Background

Dennis McComas has 30 years of experience in the assessment, investigation and cleanup of over 150 contaminated Brownfields redevelopment sites and more than 500 petroleum spill/AST/UST release sites. He has also reviewed or performed over 800 Phase I ESA projects.

In the last two years, he was instrumental in securing over \$1.3M in cleanup grants for his clients. His expertise includes hydrogeological evaluations, soil vapor intrusion investigations, groundwater contamination investigations, preparation and implementation of RAPs and CCPs, environmental-related litigation experience, and brownfields grant applications.

Education

B.S. Geology,

University of Minnesota, 1988

Post-Graduate Coursework,

Contaminant Hydrogeology and Soil Physics,
Winona State University, 1992

Continuing Education

Princeton Groundwater Pollution and Hydrogeology Course, 1992

Minnesota Routine Assessment Method (MnRAM) for Wetlands, Version 3.0 Training, 2002

Crude Oil Spills Symposium, USGS Bemidji Minnesota Spill Site, 2012

Registrations/Certifications

Licensed Professional Geologist, Minnesota, No. 30503

Licensed Professional Geologist, Wisconsin, No. 656-13

Asbestos Inspector, Minnesota, No. AI3163

40-hour OSHA HAZWOPER training, 1989;
OSHA Annual 8-hour HAZWOPER refresher courses

Professional Memberships

Minnesota Groundwater Association
ASTM International Member, No. 1653297

AET Responsibilities

- Brownfield investigation, remediation and cleanup grants
- Phase I ESA project setup, review and coordination
- Due Diligence project coordination and management
- Project oversight, management, review and reporting
- Client management and regulatory relationships
- Assistance and negotiation with MPCA for Voluntary Brownfields Liability Assurances

Project Experience

The Keller Building Redevelopment, Northeast Minneapolis, MN (2017-present)

Coordinated environmental assessments and numerous environmental investigations of impacted soil, concrete, and soil vapor. Completed soil vapor pilot testing and vapor mitigation design of an abandoned former wagon manufacturer and military metal fabrication facility. Secured a \$600,000 DEED Cleanup grant to mitigate the vapor intrusion risks, and to remediate solvent-impacted, and hazardous-level impacted soil and concrete. When completed, the renovated facility will house a multi-use restaurant, commercial retail, and office complex.

4500 France Redevelopment, Edina, MN (2017-present)

Prepared an environmental assessment, soil and vapor investigations and a Response Action Plan (RAP) of a former Minnesota State Superfund listed dry cleaner, filling station and movie theatre complex to accommodate a future multi-use commercial and residential five story structure with an underground parking ramp. We were able to avoid the necessity of a vapor mitigation system, due the proposed installation of the properly ventilated underground parking ramp under the entire building. Secured a DEED Redevelopment grant and a Hennepin County Well Sealing program grant totaling \$330,000.

Huot Manufacturing Co., St. Paul, MN (2017-present)

Completed and managed an environmental assessment, numerous soil, vapor, and groundwater investigations, soil vapor pilot testing, installation of a retrofitted vapor mitigation system related to chlorinated solvent and petroleum impacts at an active metal fabrication facility. Prepared MPCA applications and obtained MPCA Voluntary Remediation Program liability assurances through the MPCA VIC program, and the MPCA State Superfund program. Also worked with both the owner and the purchaser to facilitate the sale of the business operations.

Dennis P. McComas, P.G.

Senior Geologist, Due Diligence Manager

Terrace Mall Development, Robbinsdale, MN (2015-2018)

Managed and completed and coordinated environmental assessment, soil and vapor site investigations, impacted perched water dewatering activities, response action planning and implementation of two Response Action Plans of an impacted Site with over 90,000 cubic yards of petroleum-related, asbestos-related and non-petroleum-impacted soil and debris. assisted with the preparation of two DEED Contamination Cleanup grants and one Hennepin County ERF grant for the redevelopment of an approximate 8-acre, blighted shopping mall and theatre into a \$20M grocery store, convenience store and fueling station. Secured DEED and ERF grants totaling approximately \$344,000.

Lehigh Hanson Development, Maple Grove, MN (2017-2018)

Completed and coordinated environmental assessment, soil, groundwater and vapor site investigations, response action planning, implementation of a Response Action Plan, completion of an underground storage tank petroleum Limited Site Investigation and geotechnical investigations for the redevelopment of an abandoned 48-acre concrete manufacturing facility into an approximate 900,000 square foot office-warehousing facility of three buildings, a storm water pond, and parking lots. The project was made economically feasible by AET proposing and utilizing dynamic compaction to cost-effectively address buried concrete debris, which covered approximately one third of the Site.

Riverside Holdings, LLC Development, South St. Paul, MN (2015-2016)

Completed and coordinated an environmental assessment and file review, site investigations, response action planning for the redevelopment of a former storage and fueling brownfield site into an office complex. The project was completed for the South St. Paul HRA and involved dewatering of highly impacted petroleum-related contamination, a vegetated swale stormwater holding pond, design and installation of a vapor mitigation system and removal highly impacted petroleum-related motor-fuel impacted soil.

Anishinabe Bii-Gii- Wiin Apartment, Minneapolis, MN (2016)

Completed and coordinated an environmental assessment and file review, numerous soil boring and test pit investigations, response action planning, implementation of a Response Action Plan, for the redevelopment of a residential addition to the existing apartment building and parking, green space, and storm water infiltration features. The work was completed for Project for Pride in Living, Inc. The response action included impacted soil and debris management, environmental oversight, and monitoring that occurred during Site redevelopment activities from January 2016 through July 2016.

Shoreham Yard East Side Property, Minneapolis, MN (2015)

Performed a Phase I Environmental Site Assessment (ESA) of the Shoreham Yard East Side Superfund Property located at 2800 Central Avenue Northeast, Minneapolis. The property is an approximate 16.5 acres, irregular-shaped parcel encompassing the addresses 2800 through 3100 Central Avenue NE. At the time of our assessment the Site included a Roundhouse/Diesel Shop, remediation treatment buildings and monitoring wells. Extensive assessment, investigation and cleanup activities have previously been completed at the Site. As of the date of our Phase I ESA, there were a total of 959 documents in the repository to review as part of the Phase I ESA. The earliest report was from May 1977 and the most recent report was from April 2015.

Commercial Property, Onalaska, WI (2016)

Completed and coordinated an environmental assessment and site investigation of a machine shop and storage unit complex in Onalaska Wisconsin. The project involved the installation of six monitoring wells, two vapor borings and chemical analysis of soil, groundwater, and vapor samples. The objective was to evaluate if impacts were present at the Site associated with the historic storage and use of petroleum products and chlorinated solvents at the site in combination with floor drains connected to an onsite septic system of the machine shop. The conclusion of the assessment and investigation was that minimal impacts were present from the historical operations at the property and the property transfer was allowed to move forward.

Dennis P. McComas, P.G.
Senior Geologist, Due Diligence Manager

Proposed Northgate Apartments, Owatonna, MN (2014-2015)

Project Manager for an assessment, investigation and remediation of a 4-acre property for the construction of an apartment complex. The services included the completion of a Phase I ESA, several iterations of Phase II investigation, and the preparation of a Response Action Plan (RAP) for the excavation and removal of asbestos-impacted soil and construction debris from several residences and forging facility/foundry waste associated with a former tool manufacturing facility. The clients for this project were both the developer and the city of Owatonna.

Siegel Oil Company, Titan Labs and Equipment Savers Portfolio Due Diligence, CO (2014-2015)

Managed and performed a due diligence project for a petroleum products bulk delivery, onsite fueling and maintenance, and automotive repair business consisting of four facilities in the metropolitan Denver area, the Front Range, Grand Junction and the western slope of Colorado. The due diligence services completed included Phase I Environmental Site Assessments (ESAs), Environmental Compliance Screening Evaluations (ECSEs), OSHA Inspections and Department of Transportation (DOT) assessments.

Cummins NPower SPCC Preparation; MN, WI (2014-2015)

Developed and managed the preparation of Spill Prevention, Control and Countermeasure (SPCC) Plans for three Cummins Facilities located in Minnesota and Wisconsin. The challenge for this project was developing new SPCC Plans for the facilities, which performed maintenance and repair of large vehicles as well as petroleum bulk distribution, including searching for and developing historical plans and related historical documentation needed to complete the SPCC Plans.

Shingle Creek Redevelopment, Brooklyn Center, MN (2014-2015)

Completed a comprehensive Phase I ESA for the former Brookdale mall site, consisting of 19 individual parcels. Extensive MPCA leak files were reviewed for the completion of the project. Based on the results of the Phase I ESA, a Soil Vapor Assessment (SVA), consisting of the preparation of a work plan to the MPCA and the advancement of 19 soil vapor borings and sub-slab vapor borings was completed. One of the challenges involved for this project was the presence of existing and newly constructed buildings as well as undeveloped parcels at the site. The goal was to assess previously uninvestigated building pad sites and, if vapor intrusion risks were present, prepare a site specific vapor mitigation design for the building. Our flexibility allowed for the construction of buildings at the site with minimal disruption or delays.

Michael K. Neal

Geomorphologist/Professional Hydrologist

Background

Michael Neal has 30+ years of experience supervising and managing environmental assessment, investigation and remediation projects of various phases and complexities in several different states, including Phase 1 and 2 ESAs, and pre-sale and pre-demolition Asbestos and Lead Inspections, and UST/AST closures. His expertise includes supervising and performing environmental field testing and monitoring and preparing investigation reports.

Education

MS, Physical Geography (Geomorphology), University of Wisconsin-Milwaukee, 1990
BA, Physical Geography, University of Wisconsin-Milwaukee, 1986

Registrations/Certifications/Training

Professional Hydrologist: Wisconsin (#101-111, 1999)
Environmental Site Assessor: Wisconsin (#41917, 1991)
Petroleum Environmental Cleanup Fund Award Program Consultant: Wisconsin (#41917, 1991)
Asbestos Inspector: Wisconsin (AII-207656, 2014)
Asbestos Inspector: Minnesota (AI12758, 2014)
Asbestos Site Supervisor: Minnesota (AS12758, 2018)
Lead Risk Assessor: Wisconsin (LHI-207656, 2016)
Lead Risk Assessor: Minnesota (LR5133, 2016)
40-hr. OSHA HAZWOPER, 1991
8-hr. HAZWOPER Refresher, 1992-2021
Red Cross First Aid & CPR Training, 1993-2021
Asbestos Inspector Refresher, 2014-2021
Lead Risk Assessor Refresher, 2016-2021
Federal Railroad Administration On-track Safety & CN Track Safety Training, 2015
CN Track Safety Refresher & Koch Pipeline Safety Standards, 2012

Employment

American Engineering Testing (2012-present)
Geomorphologist/Professional Hydrologist
Project Manager
Tetra Tech 2003-2012
Geomorphologist/Professional Hydrologist
Advent Environmental Services 1991-2003
Geomorphologist/Professional Hydrologist
Aqua-Tech, Inc. - 1991 Geomorphologist/Environmental Scientist
Carthage College, 1990 -1991
Assistant Professor of Geography

Professional Affiliations

Federation of Environmental Technologists
Eau Claire Chamber of Commerce

AET Responsibilities

- Supervise and manage environmental projects of various phases and complexities in several different states
- Draft and review reports for various projects
- Conduct environmental field testing and monitoring

Project Experience

American Phoenix, Eau Claire, WI (2018-2021)

Assisted company personnel in preparing and implementing Spill Prevention, Control and Countermeasures (SPCC) Plan, managed review of the facilities compliance with WDNR Air Permit and Hazardous Waste Contingency Plan.

Viking Stadium Constr., Minneapolis, MN (2013-2014)

Completed field tasks for the excavation of contaminated soils at the new Minnesota Vikings football stadium. Materials removed included over 51,000 tons of impacted soils including coal ash, foundry debris, and petroleum contaminated soils. Completed test pits, field screening, and sample collection and documentation of excavation activities.

Energy Park – St. Paul, MN (2013)

Completed field tasks for a large-scale utility upgrade in the Energy Park District of St. Paul. Oversaw general excavation of work area to ensure MPCA compliance, completed field screening and sample collection along the corridor.

Multiple Remediation Projects, Wisconsin (1991-present)

Managed projects; performed regulatory background reviews, site reconnaissance inspections, and remediation design; prepared reports. Supervised remediation and system installation. Collected soil, groundwater, and air samples for field screening and laboratory analysis. Methods included thermal treatment and landfill disposal, remediation of soil and groundwater through natural attenuation, soil vapor extraction, air sparge, groundwater pump-and-treat, and long-term groundwater monitoring

UST and AST Closure Assessments (1991-present)

Managed projects, prepared work plans and site safety plans, performed regulatory background reviews, site reconnaissance inspections, and restoration. Met with local officials and site representatives, and prepared reports. Supervised removals and decommissioning collection of soil samples for field screening and laboratory analysis.

Pre-sale/Pre-demolition Asbestos & Lead Inspections, WI (2014-present)

As a State Certified Asbestos & Lead Inspector, performed numerous inspections for business and residences as part of pre-sale or pre-demolition requirements.

Michael K. Neal

Geomorphologist/Professional Hydrologist

Site Investigations and Site Characterizations, WI (1991- present)

As Professional Hydrologist/Geomorphologist, completed hundreds of projects for private and public clients. Duties included project management, work plan preparation, site safety planning and development, regulatory background reviews, site reconnaissance inspections, meeting with local officials and site representatives and report preparation. Supervised soil boring and monitoring well installation. Collected soil and groundwater samples for field screening and laboratory analysis. Performed data analysis, map preparation, hydraulic conductivity testing and remediation design.

ESA /Transaction Screening Assessments (1991-present)

Since 1991, performed numerous Phase 1 ESAs, and transaction screening assessments according to ASTM E1527-13 and E1528-14 on sites throughout Wisconsin and Minnesota. Managed projects, prepared work plans, conducted regulatory background reviews, performed site reconnaissance inspections, met with local officials and site representatives, and prepare reports.

Detention Basin Sediment Sampling, Multiple Clients, WI (2012-present)

Conducted detention basin sediment sampling and assisting clients in determining appropriate sediment management options, in accordance with the Wisconsin Department of Natural Resources NR 528 "Management of Accumulated Sediment from Storm Water Management Structures" (NR 528, February 2012).

PCB Dredging Project Remedial Investigation / Feasibility Study, Fox River, WI (2010)

Performed pre- and post-dredging sample collection including in-situ sediment delineation as part of a field sampling crew obtaining data/verification of residual PCB contaminants for proposed and completed dredge areas. Duties include utilization of sediment sampling equipment, procurement, decontamination, and maintenance of sampling equipment, and commandeering the sampling boat.

Enbridge Energy Pipeline 6B – Kalamazoo River Spill, Marshall, MI (2010-2012)

As part of the Submerged Oil Task Force performed spring reassessment on approximately 40 miles of Talmadge Creek and Kalamazoo River. This included stream bed investigation, pre-oil recovery, and sediment poling qualitative assessments to determine the presence of submerged oil, collection of stream thalweg measurements and associated data and field activity documentation. As Operations Inspector directly supervised crews in recovery of submerged oil. Initial liberation methods included aeration, water washing, and mechanical agitation and aeration of submerged oil in soft sediments. Flush boats were also used to flush soft sediment and liberate submerged oil. Liberated oil was collected in downstream collection points and using surface sweep boats. All work was completed under strict adherence to Enbridge Health and Safety protocol.

Canadian National Railroad Geotechnical Program, Rail Crossing Bridge Assessments, IL (2008)

As Lead Field Technician performed boring logging and field soil classification in accordance with USCS, drill crew support, and client field contact in support of geotechnical/subsurface assessment of rail crossing bridges in remote southern Illinois. Included coordination of equipment conveyance via rail to remote bridge cross locations with client field project representative, materials, procurement, and working in adverse conditions. Work required specialized rail safety training to ensure compliance with client field safety protocol.

Carthage College, Geography Faculty, Kenosha, WI (1990-1991)

As Assistant Professor, taught Introduction to Physical Geography, Climatology, Applied Environmental Systems, Geography of Central America, and Hydrology and Soils.
