Subject: Approval – Update Site Investigation Work Plan
Chippewa Valley Regional Airport, 3800 Starr Avenue, Eau Claire
DNR BRRTS# 02-18-588115

Dear Ms. Zich:

On January 6, 2022 the Department of Natural Resources (Department) received, on your behalf from AECOM, an updated Site Investigation Work Plan (SIWP) for Per- and Polyfluoroalkyl Substances (PFAS) at the Chippewa Valley Regional Airport (CVRA) located in Eau Claire, Wisconsin. A technical assistance request for review of the SIWP was submitted with the original site investigation work plan

The SIWP addressed potential sources of PFAS through the use of soil and groundwater sampling. Locations identified include the aqueous film forming foam (AFFF) testing area, live fire training areas, and an aircraft accident site. The department has reviewed your updated proposal and approves the scope of work as outlined in the report dated December 23, 2021.

The Department appreciates your willingness to investigate potential PFAS source areas on the CVRA site. Please contact me at (715) 492-2304 or by email at matthewa.thompson@wisconsin.gov with questions regarding this determination.

Sincerely,

Matt Thompson
Hydrogeologist – West Central Region
Remediation and Redevelopment
