Subject: Site Investigation Report Submittal Request - Chippewa Valley Regional Airport PFAS

Ms. Zich,

The Department of Natural Resources (DNR) recognizes that over the last few years Chippewa Valley Regional Airport has taken some actions as documented in communications between the DNR and the airport (see BRRTS case 02-09-588115). More specifically, the airport (1) retained a consultant, (2) sampled monitoring wells in May 2022, and (3) submitted an initial site investigation work plan in November 2021.

The DNR received the Site Investigation Sample Results Notification, submitted by AECOM on July 22, 2022. It is our understanding that a Site Investigation Report is being prepared in accordance with Wisconsin Administrative Code Chapter NR 716.15 by your environmental consultant. The DNR looks forward to receiving the report, which by code, is due within 60 days of receiving laboratory data, in this case on January 15, 2023.

The DNR appreciates your cooperative approach to this matter and looks forward to working with you to continue progress at this site. The DNR would be glad to meet with you to discuss site investigation results, next steps, and timelines important in maintaining compliance with state law.

Thank you,
Matt Thompson

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
