Hi Tauren,

Each home had a water softener, iron removal filter and a reverse osmosis system. These details are provided on the completed field sample forms.

I have attached a photo log of the pressure tanks where the sample taps were located.

Tauren,  
I had sent you data validation and tabulated lab results and beyond that had nothing else to report. However I do have a field sheet that was completed for each sample location and pictures of where the sample was collected.  
I will put these together and get them over to you.  
Regards,

Lanette,

Good morning Lanette,

Looking back at the potable well sampling that was completed by AECOM. Was I supposed to get a letter report as part of the contract? The reason I ask is Ramboll (Newell's consultant) is proposing to do some additional potable well sampling and is asking if DNR has the field notes and sample collection forms associated with the four potable samples collected by AECOM. I don't think I received any of that information, but if you at least have that information available in a raw format, could you send me that information?

Thanks,

**We are committed to service excellence.**

Residential Water System Survey

Residence Name: Amy & Dave Bastien Date: 12/15/21

Residence Address: 2519 Woodland Dr Surveyor Initials: RW

Potable Well Sample Location (circle):

Pressure Tank Sample Port?  Hose Bib?

Fixture? Location - Basement NE corner

Exterior of House (sketch a map on the back side of this form):

Septic System Location - relative to house (circle): NO north south east west

Existing Well Location - relative to house (circle): north south east west

Existing Well Depth: 80-90 feet

Note: information from homeowner or sticker on pressure tank?

Is there more than one potable well on the property (circle): Yes No If yes describe in "Notes" below.

Interior of House:

Supply pipe from well enters house/basement (circle): north wall south wall east wall west wall floor

Equipment present - TAKE PHOTOS OF ALL EQUIPMENT:

Pump - is pump present in the basement or down-well (circle)? NA basement down-well  
make: Pentair Pro source model: size: 2 40 gallons

Kimberly  
two Rivers  
pump  
3-4 yrs  
990c

Pressure Tank:  
make: model: size:

Water Softener - present (circle): Yes No  
make: Water Right model: size: 40-50 gallons

Iron Filter - present (circle): Yes No  
make: Impression model: 1354 size: 5 gallons

Is there a dedicated Drinking Water Tap (typically for unsoftened or RO treated water) at the kitchen or bathroom sinks? (circle) Yes No

Reverse Osmosis (RO) System - present (circle) Yes No Note: RO system typically located under a kitchen sink.  
make: Water Right model: Falispe size:

Notes - interview the home owner and record any comments about well depth, water quality and taste:  
did not notice

**To:** Beggs, Tauren R - DNR  
**Subject:** Former Mirro Plant No. 2 (BRRTS: 02-36-588656)

Good Morning Tauren,

Sorry to send another request your way, but would it be possible for us get copies of field notes and sample collection forms associated with the four potable well samples collected by AECOM in December 2021? This information will help make sure that our team is fully up to speed and assist in identifying any changes that may have occurred since the original samples were collected.

Thank you again for your assistance on this project and have a great upcoming holiday weekend!

Kind regards

**Susan Petrofske**
