Subject: Sampling of Potable Well not used for drinking

Hi Susan,

The DNR won't require the well not being used for drinking to be sampled, but it may be beneficial data for the overall investigation depending on well construction, location to other surrounding potable wells, etc. I don't know the specific details of the well, but the construction could differ from the other nearby well, which may then make it beneficial to sample.

Hope this helps.

Regards,

We are committed to service excellence.
