Subject: BRRTS#02-36-588656 (Former Mirro Plant No. 2) Potable Well Sampling Update

Hello Tauren,

This e-mail provides a brief update regarding implementation of the potable well sampling activities proposed in the April 2022 Immediate Action Work Plan approved by the WDNR on May 15, 2022 for the former Mirro Plant No. 2 facility (BRRTS #02-36-588656). To date, four of five access agreements have been secured from the residences identified for sampling. Potable well samples were collected from the four homes on the dates indicated below:

- 3202 Mirro Drive (July 28, 2022)
- 2519 Woodland Drive (August 1, 2022)
- 2722 Woodland Drive (July 29, 2022)
- 3104 Woodland Drive (July 29, 2022)

The samples have been submitted to the testing laboratories for PFAS analysis and we anticipate receiving the results during the week of August 22nd. In accordance with the approved work plan, Ramboll will submit the NR 716.14 data transmittals within 15 business days from receipt of the final lab reports.

We also wanted to advise you that numerous attempts have been made to secure access to the fifth residence (1750 Mirro Drive). Most recently, Ramboll representatives were able to speak with the homeowner in person on August 1st; however, the homeowner did not agree to allow the sampling activities. Ramboll provided the homeowner with another paper copy of the access agreement to review along with contact information should they have any questions or decided to allow access to sample their well for PFAS.

Please let me know if you have any questions.

Thank you.
