Subject: 02-36-588656 MIRRO CO PLT 2 (FORMER): WDNR NR700 Semi-Annual Reporting

Good morning Tauren;

This e-mail serves as a NR700 Semi-Annual progress report for the former Mirro Plant No. 2 (BRRTS No. 02-36-588656) in Manitowoc, Wisconsin for the reporting period of July 1 to December 31, 2022. Please note, Ramboll attempted to completed the reporting requirements via the WDNR provided notification e-mail; however, a report was already submitted. As such, the web-link is no longer valid.

Ramboll, on behalf of Newell Operating Company (NOC), completed two rounds of potable well sampling at five residences as discussed in the WDNR approved Immediate Action Work Plan. The initial round of sampling was completed in July and August 2022 and the data transmittal letters were distributed in September and October 2022. Based on the results from the initial round of sampling, WDNR requested a second round of sampling at all five residences. The second round of potable well sampling was completed on November 4 and 21, 2022. The data transmittal letter for the residence sampled on November 4th was distributed on November 23rd, 2022. The remaining potable well analytical data was received on December 16th and validated the week of December 19th. The associated data transmittal letters were submitted the week of January 2nd, 2023. Ramboll anticipates submitting the Immediate Action Documentation Report to the WDNR during the first quarter of 2023.

On-site environmental investigations were initiated by Geosyntec, on behalf of Tramontina, in the second half of 2022. Geosyntec submitted a Site Investigation Report (with associated fee) documenting on-site investigation activities to the WDNR on December 15, 2022.
