Hi Joe,

Yes the piping has been removed and of each of the ends were capped per the plans. There was some diluted residual product (approx. 200 gal total) in the piping which was collected and properly disposed of through OSI Environmental. Otherwise, there were no other issues or surprises with the removal.

Thanks,

**Kyle Morberg, PE (MN)**

**Subject:** Pipe to Former Murphy Marine Terminal - Status

Hello Kyle,

I hope construction is progressing well at the C. Reiss redevelopment site in Superior, Wisconsin.

Has the construction project gotten to the area where the pipe for the former Murphy Oil Marine Terminal and if so, was anything of interest observed while removing/abandoning any of the associated piping?

I would appreciate any update or observations that Stantec or C. Reiss can provide regarding the

pipeline that conveyed product from the tank farm to the oil terminal on the property.

Sincerely,

**We are committed to service excellence.**
