**Subject:** RE: Monitoring Well Sealing

Samantha – Joe Graham is the DNR PM for the C Reiss Coal Dock site (02-16-589248), who I've copied on this email. Form 3300-005 should be submitted for the destroyed MW that is being abandoned and it should be done via the RR Submittal portal. As far as that being all that's needed, Joe (or John Hunt, if the MW is on the adjacent Amoco site) may request that the MW be replaced if it was being used to monitor GW conditions for either the C Reiss site or one of the Amoco sites adjacent.

Thanks,  
Grant

I believe it is associated with **BRRTS #:** 0216589248, but not 100% sure. We were contacted to seal the well by the contractor and from our end we wanted to make sure we submitted the right paperwork. We are not the environmental consultants...

Samantha – is there a BRRTS site associated with the Reece dock? Or do you know which PM required that it be abandoned?

Hi Grant,

Braun Intertec will be sealing/abandoning we well in WI on behalf of a contractor that accidentally sheered a monitoring well off at the Reece dock (not sure if you are the pm 😊). They did notify the WDNR and the PM is requiring it be sealed. I am assisting in this request and wanted to see if there is anything beyond filling out the attached 3300-005 form that must be completed.

Thanks!
