Subject: RE: Notice of Noncompliance- C. Reiss Dock Project 84245

Hi Matt,

As requested, here are some photos showing the repaired silt fence anchoring/splicing, ECB trenching, and removal/replacement of the coal/coal dust material from the temporary berm in that one location along the east side of the berm. I should note that additional staples were not able to be placed yet in the ECB due to frozen ground. In addition, ECB is not yet installed in the location where the temporary berm material was replaced today. Northland will get these items completed this week with no significant precip in the forecast and we will update you when it is done. Let me know if you would like to see photos of any other areas in particular and I will send them along.

As far as the silt fencing goes, the material installed around the berm should not receive flow due to the temporary berm/ditch surrounding it. Should any problem areas be identified where material could

discharge offsite or into sensitive areas, we would propose installing a row of biologs as another BMP measure in that location. If you would like to discuss this item further, perhaps we could set up a call later this week.

Thanks,

Kyle Morberg, PE (MN)

Subject: Notice of Noncompliance- C. Reiss Dock Project 84245

You don't often get email from matthew.jacobson@wisconsin.gov. [Learn why this is important](#)

Dear Mr. Zuidmulder,

Please the attached Notice of Noncompliance regarding the stormwater discharge permit for the C. Reiss Dock Project. There were some items that require immediate attention.

If you or your contractors have any questions or would like to discuss, let me know. Thank you.

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
