Hi Matt,

Thanks for the information. I don't think a site visit is needed at this time to confirm.

We are committed to service excellence.

MW-1 is the flush mounted well in the paved parking lot. We left the flush mount there but filled the well with bentonite. The flush mount is also filled with concrete. I checked with Kendyl, we believe the PFAS well, TW-82 is still there. We can site visit to confirm if need be.

Matt

Yeah text will work. Wondering if MW-1 and TW-82 were abandoned. In your PFAS notification there was a figure you provided that all the wells on-site (including these two wells were abandoned) in preparation for site redevelopment. I currently have in the PFAS work plan from Newell and it indicates on their map that MW-1 and TW-82 may still be there, so wanted to confirm that with you if they are there or were already abandoned.

We are committed to service excellence.

Hi Matt,

Could you give me a quick call on my work cell? Just have a quick question about well abandonment for this site.

Thanks,

Tauren
