Subject: Notification of Occupants

See attached DVIT notes for discussion regarding when notification of occupants is recommended. Based on the notes and the data at the site I recommend holding off on requesting notification of occupants at the Lake Superior Cleaners site for now.

I've also included a word document that has draft response language for common vapor intrusion scenarios. I use this document as a starting point when forming vapor related responses, however there is usually some editing needed depending on site specifics. Take a look and feel free to use it as a starting point for future responses.

The "TCE Health Risk" paragraph is modified language from a paragraph in the new RP letter template. SER has included versions of this paragraph in push letters or in responses to high sub-slab TCE results. This may be a helpful paragraph to include when you request a work plan from the RP.

Let me know if you have any questions.

We are committed to service excellence.
