Subject: Smith's Union 76 TSSA

Hi Erica,

I am in receipt of the TSSA report for the Smith's Union 76 tank found during site paving. As a release is noted in the soil, this TSSA will go to the review committee. In order to relate this tank and the soil results found, it would be helpful to place this tank data/location/samples on an overlay of the residual contamination maps of the closed site. Basically the TSSA is asking for a NAR, so some data to support that would be required.

I will put this on the review date for the end of August/early September.

Thank you!
Barb
