Subject: Hill Farms Heating Plant (03-13-590436) - Additional Information Requested

Hi Ray,

I have reviewed the site investigation report and have also taken it to the closure committee as well as the PFAS review committee. DNR is generally agreeable to approving the NFA request, but we would like some additional information before granting the NFA:

Multiple PFAS compounds were detected in several soil samples. Provide additional justification as to why groundwater does not need to be sampled for PFAS. This justification could include developing site-specific soil to groundwater pathway standards, discussion of the conceptual site model as it relates to PFAS partitioning and migration, etc.

Let me know if you have any questions.

Thanks,
Luke

We are committed to service excellence.

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.
