

Spill Notification for WRR Environmental Services Co., Inc.

EPA ID# WID990829475

FID# 618026530

Spill ID# 18345

ID 20221020WC18-1 – Coolant Machine

Per Condition 86 of WRR Environmental Services' current Feasibility and Plan of Operations Report (FPOR), WRR is making the following spill report to the Department's designated Hazardous Waste Inspector assigned to WRR, to the Department's designated Hazardous Waste plan review staff person assigned to WRR and to the Department's designated Spills Coordinator.

This notification, required by Condition 86 of the WRR FPOR and NR 706.05(1), contains the following information to the extent practicable or applicable:

1. Name, address, and telephone number of the person reporting the discharge.

Becky Anderson – Director of Compliance
WRR Environmental Services Co., Inc.
5200 Ryder Road
Eau Claire WI 54701
715-577-7755 (Cell)

2. Name, address, and telephone number of the discharger, or owner and operator of the UST system and any other potentially responsible persons.

KADINGER AUTO SALVAGE
N9919 130th St
Downing WI
715-834-9624 Main Number

3. Date, time, and duration of the discharge.

October 20, 2022 at 1:30 p.m. Time to clean up the release was 4 hours.

Location of the discharge including street address, county, town, city or village

WRR Environmental Services Co., Inc.
5200 Ryder Road
Eau Claire WI 54701

Town of Washington

4. Identity, physical state, and quantity of the material discharged.

~100 gallons of Used Machine Coolant – Vegetable Oil Based.

5. Physical, chemical, hazardous, and toxicological characteristics of the substance.

The release was a non-RCRA used coolant. The main hazard associated with this product was its oil component.

6. Cause of the discharge.

A Very Small Quantity Generator self-transported totes of this waste to WRR on a tilt bed auto transport truck. The driver tilted the bed to get a tote towards the end of the trailer so a forklift would remove it. The bed tilted too much, and the tote tumbled onto the parking lot, releasing material on the blacktop.

7. Immediate actions being taken and the name of the contractor or other person performing the action.

The spilled material was contained with booms, pads and cleaned up with floor-dri. The contaminated spill materials were

All cleanup activities were conducted by WRR personnel.

8. Source, speed of movement, and destination or probable destination of the discharged hazardous substance.

The release was contained to the blacktop parking lot.

Included with this report is a facility map with the release location marked with a red arrow.

9. Actual or potential impacts to human health or the environment, including actual or potential impacts to drinking water supplies.

WRR personnel were wearing personal protective equipment during cleanup operations. No injuries were reported.

No drinking water supplies were impacted by the spill.

This waste contained.

10. Weather conditions existing at the scene, including presence of precipitation and wind direction and velocity.

The release occurred on black top. It was a sunny day, and 56F with a slight breeze at the time of the release.

11. Other agencies on-scene during the discharge incident.

No agencies were on-site during the discharge or clean-up.
