

Spill Notification for WRR Environmental Services Co., Inc.

EPA ID# WID990829475

FID# 618026530

Spill ID# 18466

ID 20221117WC18-1 – Flammable Hazardous Waste

Per Condition 86 of WRR Environmental Services' current Feasibility and Plan of Operations Report (FPOR), WRR is making the following spill report to the Department's designated Hazardous Waste Inspector assigned to WRR, to the Department's designated Hazardous Waste plan review staff person assigned to WRR and to the Department's designated Spills Coordinator.

This notification, required by Condition 86 of the WRR FPOR and NR 706.05(1), contains the following information to the extent practicable or applicable:

1. Name, address, and telephone number of the person reporting the discharge.

Becky Anderson – Director of Compliance
WRR Environmental Services Co., Inc.
5200 Ryder Road
Eau Claire WI 54701
715-577-7755 (Cell)

2. Name, address, and telephone number of the discharger, or owner and operator of the UST system and any other potentially responsible persons.

WRR Environmental Services
5200 Ryder Road
Eau Claire WI 54701
715-834-9624

3. Date, time, and duration of the discharge.

November 16, 2022 at 10:30 p.m. Time to clean up the release was 4 hours.

Location of the discharge including street address, county, town, city or village

WRR Environmental Services Co., Inc.
5200 Ryder Road
Eau Claire WI 54701

Town of Washington

4. Identity, physical state, and quantity of the material discharged.

~20 gallons (~150 lbs) of Flammable Hazardous Waste.

5. Physical, chemical, hazardous, and toxicological characteristics of the substance.

The release was a flammable hazardous waste consisting mainly of solvents, paints and inks. The main hazard associated with this product was its flammability – waste code D001. D001 has an RQ of 100 lbs.

6. Cause of the discharge.

The release occurred in WRR's Fuel Building. The main piece of equipment located here is a large mixing vessel called a Hydrapulper. An operator couldn't get material to pump into the vessel, determining the pipeline was clogged. An incorrect alignment of pumping equipment allowed nitrogen pressure to be feed back into a hopper instead of into the pipeline. Material was released from the hopper onto the Fuel Building's floor.

7. Immediate actions being taken and the name of the contractor or other person performing the action.

The nitrogen was stopped, stopping the material release. The spilled material was contained and cleaned up with floor-dri. The contaminated spill materials were placed in open topped drums for treatment offsite.

All cleanup activities were conducted by WRR personnel.

8. Source, speed of movement, and destination or probable destination of the discharged hazardous substance.

The release was contained to the Fuels Building. The area is curbed and contains no drains.

Included with this report is a facility map with the release location marked with a red arrow.

9. Actual or potential impacts to human health or the environment, including actual or potential impacts to drinking water supplies.

WRR personnel were wearing personal protective equipment during cleanup operations. No injuries were reported.

No drinking water supplies were impacted by the spill.

This waste contained to the Fuels Building.

10. Weather conditions existing at the scene, including presence of precipitation and wind direction and velocity.

The released inside a room.

11. Other agencies on-scene during the discharge incident.

No agencies were on-site during the discharge or clean-up.
