EPA ID# WID990829475

FID# 618026530

Spill ID# 17704

ID 20220516WC18-1 – Waste Fuel Blend Material

Per Condition 86 of WRR Environmental Services' current Feasibility and Plan of Operations Report (FPOR), WRR is making the following spill report to the Department's designated Hazardous Waste Inspector assigned to WRR, to the Department's designated Hazardous Waste plan review staff person assigned to WRR and to the Department's designated Spills Coordinator.

This notification, required by Condition 86 of the WRR FPOR and NR 706.05(1), contains the following information to the extent practicable or applicable:

1. Name, address, and telephone number of the person reporting the discharge.

Becky Anderson – Director of Compliance
WRR Environmental Services Co., Inc.
5200 Ryder Road
Eau Claire WI 54701
715-577-7755 (Cell)

2. Name, address, and telephone number of the discharger, or owner and operator of the UST system and any other potentially responsible persons.

WRR Environmental Services Co., Inc.
5200 Ryder Road
Eau Claire WI 54701
715-834-9624 Main Number

3. Date, time, and duration of the discharge.

May 16, 2022 at midnight. Time to clean up the release was 5 hours.

Location of the discharge including street address, county, town, city or village

WRR Environmental Services Co., Inc.
5200 Ryder Road
Eau Claire WI 54701

Town of Washington

4. Identity, physical state, and quantity of the material discharged.

~75 gallons of the flammable hazardous waste with primary waste codes D001, F003 and F005.

Spill Notification for WRR Environmental Services Co – Fuel Blend 05162022

5. Physical, chemical, hazardous, and toxicological characteristics of the substance.

The release was a hazardous waste containing solvent, paint, ink and other industrial coatings. The main hazard associated with this product is flammability.

6. Cause of the discharge.

In the fuels building, WRR personnel were attempting to clean the site glass on a piece of equipment call a hydrapulper. A valve was left open on the site glass when the site glass was opened for cleaning. Approximately 75 gallons of fuel blend material was released before a supervisor arrived to close the valve.

7. Immediate actions being taken and the name of the contractor or other person performing the action.

Once the valve was closed, the majority of the material was pumped to drums. Absorbent was used to collect the residual material. The liquid portion was added back into the hydrapulper and the solids were collected in a drum.

All cleanup activities were conducted by WRR personnel.

8. Source, speed of movement, and destination or probable destination of the discharged hazardous substance.

The release was contained to a room with a concrete floor and no floor drains.

Included with this report is a facility map with the release location marked with a red arrow.

9. Actual or potential impacts to human health or the environment, including actual or potential impacts to drinking water supplies.

WRR personnel were wearing personal protective equipment at the time of the incident. No injuries were reported.

No drinking water supplies were impacted by the spill.

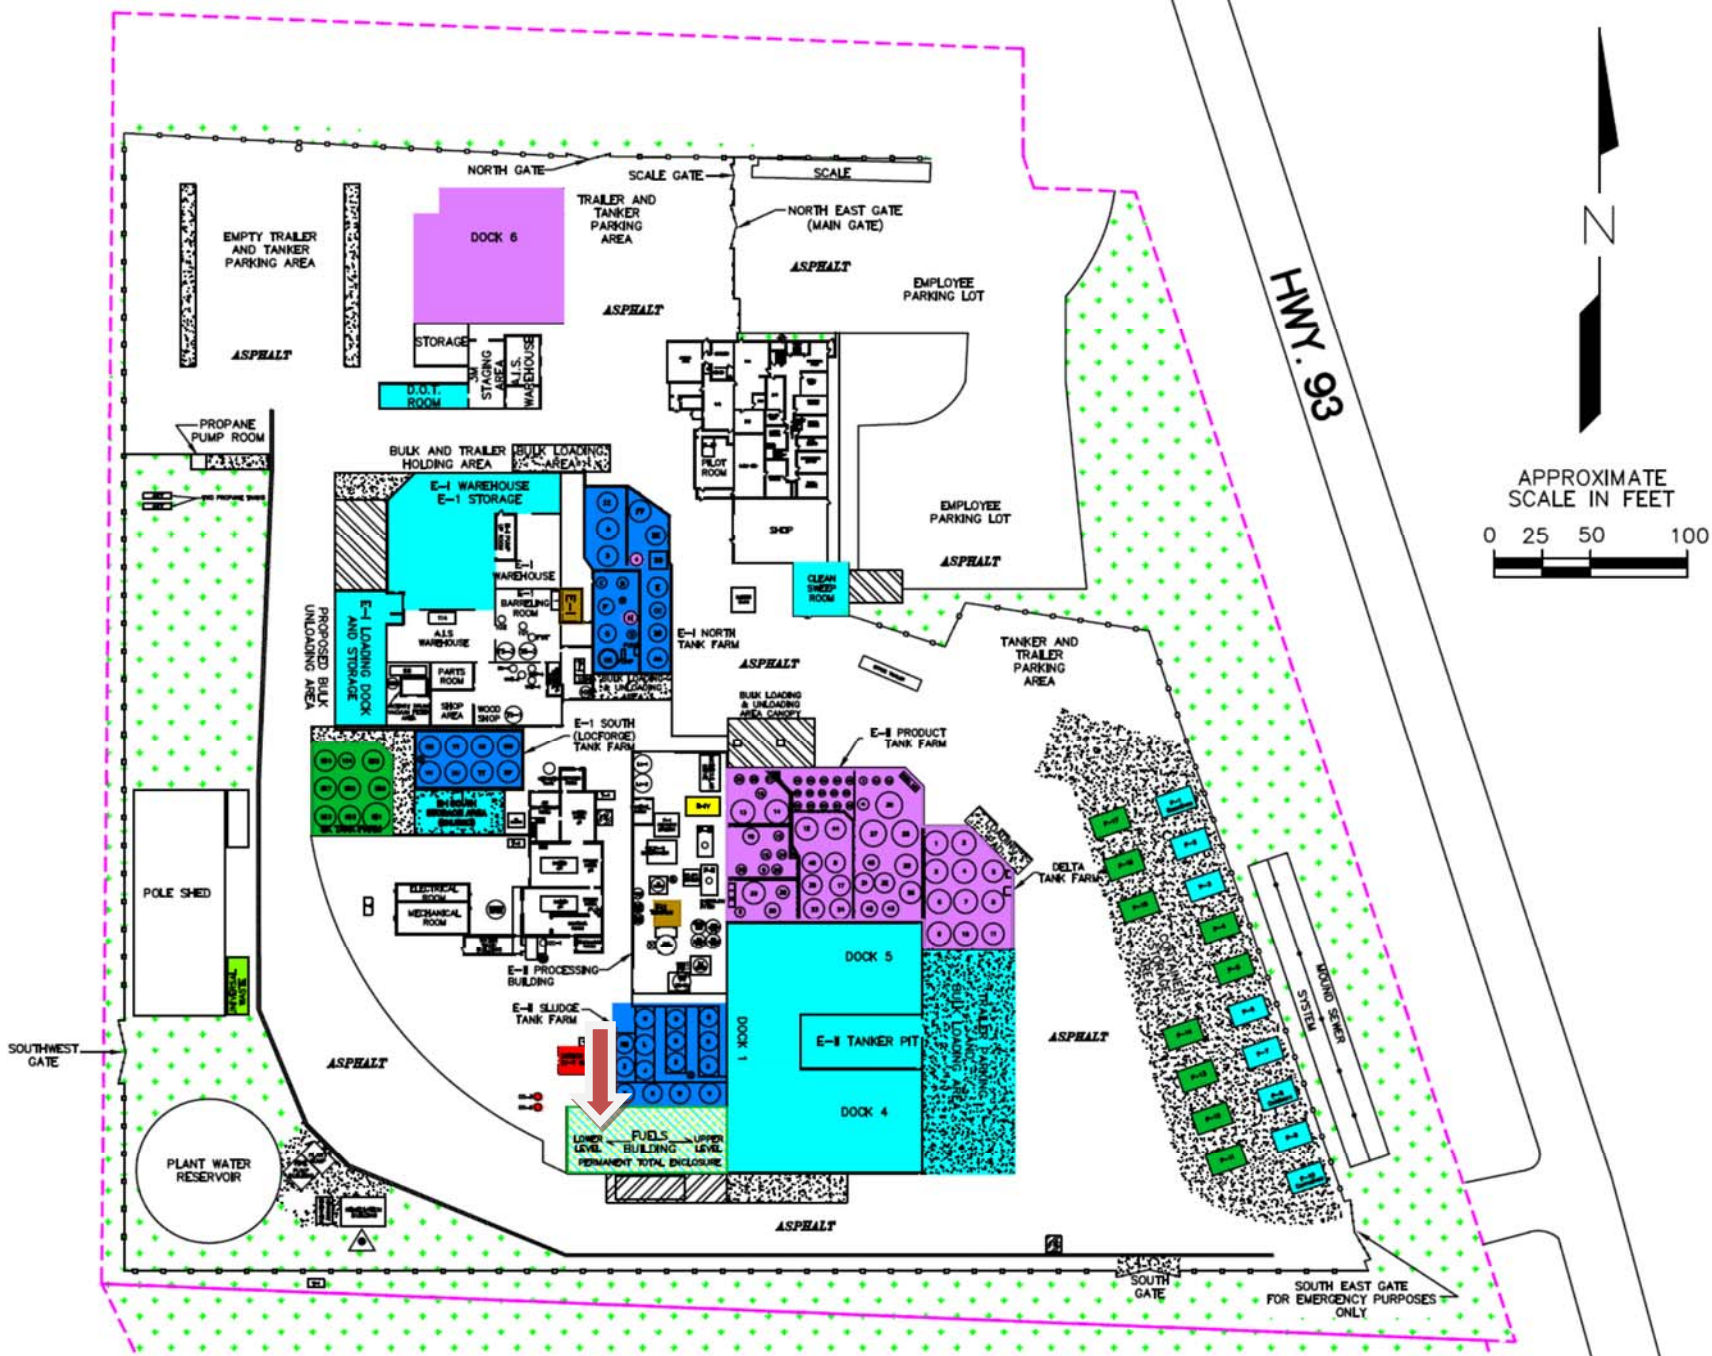

This waste contained.

10. Weather conditions existing at the scene, including presence of precipitation and wind direction and velocity.

The released occurred in a room. The release was not impacted by precipitation or wind.

11. Other agencies on-scene during the discharge incident.

No agencies were on-site during the discharge or clean-up.
